Resources in Education ,1974 **Systems of Order and Inquiry in Later Eighteenth-Century Fiction** Eric Rothstein,2023-04-28 This title is part of UC Press s Voices Revived program which commemorates University of California Press s mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1975 *A Rhetoric of Irony* Wayne C. Booth,1974 Perhaps no other critical label has been made to cover more ground than irony and in our time irony has come to have so many meanings that by itself it means almost nothing In this work Wayne C Booth cuts through the resulting confusions by analyzing how we manage to share quite specific ironies and why we often fail when we try to do so How does a reader or listener recognize the kind of statement which requires him to reject its clear and obvious meaning And how does any reader know where to stop once he has embarked on the hazardous and exhilarating path of rejecting what the words say and reconstructing what the author

means In the first and longer part of his work Booth deals with the workings of what he calls stable irony irony with a clear rhetorical intent He then turns to intended instabilities ironies that resist interpretation and finally lead to the infinite absolute negativities that have obsessed criticism since the Romantic period Professor Booth is always ironically aware that no one can fathom the unfathomable But by looking closely at unstable ironists like Samuel Becket he shows that at least some of our commonplaces about meaninglessness require revision Finally he explores with the help of Plato the wry paradoxes that threaten any uncompromising assertion that all assertion can be undermined by the spirit of irony Virgil Made English T. Caldwell,2008-12-08 This study traces the steady decline of classical authority in English literature from the mid seventeenth century and the role of translation in shifting the emphasis away the classical learning The author focuses on Virgil once the most revered of poets but also explores the fate of some of his fellow Ancients *Natural Masques* Jill Campbell,1995 Campbell draws on recent work that sees the eighteenth century as a crucial moment in the history of sexuality and gender and she critiques new treatments of the novel s function in defining domestic femininity **Fictions of the Self, 1550-1800** Arnold Weinstein,2014-07-14 The author charts the interaction between self and world through four major phases whereby the self initially has marginal status the picaresque begins to flourish and court recognition Defoe Marivaux and Fielding glows defiant and tries to impose its will on society and the other Prevost Richardson Goethe and Laclos and finally makes a prophetic inward turn Diderot Sterne and Rousseau He shows how these phases also reflect the development of literature as it moves from mimetic to generative fiction from the power of gesture to that of word Originally published in 1981 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905
