Fieldwork The Human Experience:

Fieldwork Robert Lawless, Vinson H. Sutlive, Mario D. Zamora, 2021-10-15 Featuring a mix of American and Third World anthropologies FIELDWORK concentrates on the experiences of investigators studying the inner workings of society by entering into the life of its members There is an obvious paradox here anthropologists are both observers and participants Despite attempts to remain objective the fieldworker comes to think and act as a member of the target culture Without this personal involvement ethnographic study becomes sterile but because of it detached scientific objectivity is impossible However disciplined subjectivity is attainable through clarification of the human variations in fieldwork This book explores the fascinating variations ranging from a chapter by the dean of the American anthropology Charles Wagley in which he relates his experiences in the 1930s among the Indians in the highlands of Guatemala to one on recent fieldwork in an Arizona school district Each chapter offers a unique perspective on the important issues of fieldworker identity and its development in traditional and modern fieldwork Fieldwork and Families Association for Social Anthropology in Oceania. Meeting, 1998-01-01 Ethnographic fieldwork is prolonged intensive participatory and of necessity highly personal Its organization and execution are influenced by the researcher's gender age ethnicity personality and other individual factors In this text a group of experienced authors examine the interplay between their family situation and their fieldwork

Fieldwork, Participation and Practice Marlene de Laine, 2000-12-19 This timely and topical look at the role of ethics in fieldwork takes into account some of the major issues confronting qualitative researchers The main purposes of this book are twofold to promote an understanding of the harmful possibilities of fieldwork and to provide ways of dealing with ethical problems and dilemmas To these ends examples of actual fieldwork are provided that address ethical problems and dilemmas and posit ways of dealing with them **A Handbook for Social Science Field Research** Ellen Perelman, Sara R.

Curran, 2006-01-24 This text contains a collection of essays and bibliographies providing both novice and experienced scholars with invaluable and accessible insights as well as references to a select list of critical texts pertaining to a wide array of social science methods and practices useful when doing fieldwork **Sex, Sexuality, and the Anthropologist** Fran Markowitz, Michael Ashkenazi, 1999 Sex in the field the dilemma of whether to cover up or display sexual identities and desires during the course of anthropological fieldwork is one of the best kept secrets in the discipline Contending that the conventional pose of a genderless asexual ethnographic researcher is impossible to sustain this volume brings sex and sexuality into the open as essential components of ethnographic study that must be overtly recognized and proactively addressed Sex Sexuality and the Anthropologist recounts the real life experiences of anthropologists who are forced to acknowledge that their hosts in the field view them as gendered beings in a social context not as asexual objective observers Far from controlling the research environment and defining the terms of interviewer informant relationships these researchers find they must engage in a process of negotiating their position including their sexual position within the

communities they study Ranging from public baths in Austria to lesbian bars in Taiwan and from Mexico to Nigeria to Finland to Japan Sex Sexuality and the Anthropologist raises critical questions about ethnographers reflexivity subjectivity and detachment confronting the challenge of a holistic approach to the anthropological enterprise **Encyclopedia of**

Self in Ethnographic Fieldwork Marilena Papachristophorou,2025-01-02 This provocative book presents a methodological proposal for teaching ethnographic fieldwork applying interdisciplinary tools inspired from performance theory acting experiential anthropology and existential psychotherapy At the same time it constitutes a theoretical and methodological trajectory mapping the history of ethnographic fieldwork through highly characteristic moments along with the author s own personal journey in the field in terms of a lifetime project Starting from the assumption that ethnographic fieldwork constitutes a deeply human experience the book proposes a step further towards the performative dimension of an ethnographic condition inspired by the Stanislavski method which in practice complements performance theory issues it is argued that participant observation offers an intermediate identity for the ethnographer through a conscious management of the social role dictated by their research participants this ethnographic mediation of the Self may also have psychotherapeutic effects mainly through conscious management of self diversity and reflexivity in ethnographic writing Ethnographic fieldwork is thus highlighted as a performative stage and a field of deep transformations for the ethnographer s identity **A Different Drummer** Bruce Alden Cox,Jacques M. Chevalier,Valda Blundell,1989 This volume is a collective

production by Carleton University's anthropology caucus for use in introductory courses in cultural anthropology. It is an alternative to available textbooks which the caucus feels are mainly American in orientation and not respectful of third and fourth world peoples. *International Encyclopedia of Geography, 15 Volume Set* Noel Castree, Michael F. The Secret Lives of Anthropologists Bonnie L. Hewlett, 2019-11-26. This book addresses the difficult conditions researchers may face in the field and provides lessons in how to navigate the various social, political, economic, health and environmental challenges involved in fieldwork. It also sheds important light on aspects often considered secret or taboo. From anthropologists just starting out to those with over forty years in the field, these researchers offer the benefit of their experience conducting research in diverse cultures around the world. The contributions combine engaging personal narrative with consideration of theory and methods. The volume emphasizes how being adaptable and aware of the many risks and rewards of ethnographic research can help foster success in quantitative and qualitative data collection. This is a valuable resource for students of anthropological methods and those about to embark on fieldwork for the first time.

The Anthropological Lens James L. Peacock, 2001-12-13. Anthropology is a complex, wide-ranging and ever-changing field. This clear, coherent and well-crafted book is a revised version of a very successful text first published in 1986, designed to supplement standard textbooks and monographs. It covers the central concepts, distinctive methodologies and philosophical as well as practical issues of cultural anthropology, and it is accessible to the anthropological novice and of value to the professional. The updated version covers current issues in cultural anthropology and includes topics such as globalization, gender, post-modernism and public issues, and reflects changes in

perspective and language **Ethnographic Fieldwork** Antonius C. G. M. Robben, Jeffrey A. Sluka, 2012-01-24 Newly revised Ethnographic Fieldwork An Anthropological Reader Second Edition provides readers with a picture of the breadth variation and complexity of fieldwork The updated selections offer insight into the ethnographer s experience of gathering and analyzing data and a richer understanding of the conflicts hazards and ethical challenges of pursuing fieldwork around the globe Offers an international collection of classic and contemporary readings to provide students with a broad understanding of historical methodological ethical reflexive and stylistic issues in fieldwork Features 16 new articles and revised part introductions with additional insights into the experience of conducting ethnographic fieldwork Explores the importance of fieldwork practice in achieving the core theoretical and methodological goals of anthropology Highlights the personal and professional challenges of field researchers from issues of professional identity fieldwork relations activism and the conflicts hazards and ethical concerns of community work *Stumbling Toward Truth* Philip R. DeVita, 2000-05-09 The essayists in Stumbling Toward Truth are anthropologists who have paused to share personal experiences that uncover important truths theyve learned by living with and trying to understand others The twenty nine poignant fieldwork tales collected here reveal much about what anthropology can teach about others as well as ourselves the spirit of the ethnographic enterprise and issues of crosscultural humanity and humaneness Readers will discover from these once private stories from around the world that much of what anthropologists learn about themselves and others is totally unanticipated Oftentimes cultural truths and unexpected realities are stumbled upon These lessons none for which social science training offered adequate preparation remain perhaps the most memorable and critical of fieldwork **Women in the Field** Peggy Golde, 1986-07-28 What is it like to be an anthropologist or more specifically a woman anthropologist Here we see highly trained and qualified women anthropologists examining their own efforts to live and work in alien cultures in many parts of the world New chapters have been added to this ground breaking volume and each contributor is in one way or another a pioneer All have chosen to devote their lives and energies to the understanding of worlds not their own All have felt it important to explain what they do why they do it and how they feel about their work Cultures vary widely in their perception of a woman engaged in anthropological field work Each of these women has had to deal with the influence of her gender as well as the subject of her study on the mechanics of establishing a living working relationship with people of another culture The diversity of their responses to the presence of a foreign woman at work in their midst gives the book an invaluable cross cultural perspective as does the great variety of reactions and strategies on the part of the authors themselves Besides providing rare insight into field work in general Women in the Field mirrors the difficulties and delights of any person thrust into an unfamiliar culture **Linguistic Fieldwork** Paul Newman, Martha Susan Ratliff, 2001-06-21 This book is a collection of original essays on the practice of linguistic fieldwork and language documentation Twelve of the leading field linguists in the world have written personal essays about the study of languages in a natural setting Drawing on extensive research

experience they pass on the lessons they have learnt review the techniques that they found worked best in practice and discuss a variety of relevant topics including the attitude of the linguist the structure and content of the work session the varied roles of native speakers and the practical and personal challenges of doing research in an unfamiliar environment Covering a wide range of field areas and written in an accessible manner the book will be indispensable to fieldworkers in linguistics anthropology folklore and oral history
