Ancient Greek Accentuation Philomen Probert, 2006-03-23 The accent of many Greek words has long been considered arbitrary but amid this inconsistency Philomen Probert discovers some striking features that give clues to the prehistory of the accent system As well as giving a better understanding of the history of Greek accentuation this study yields insights into aspects of Indo European accentuation and into the effects of word frequency on language change

Perspectives on Northern Englishes Sylvie Hancil, Joan C. Beal, 2017-07-10 Northern English has been the object of much attention linguistically over the last thirty

years but scholars have had a tendency to focus on the phonology of the dialects and varieties encountered. The purpose of the present volume is to complement and enrich the existing studies by providing readers with a kaleidoscopic perspective allowing for a holistic interpretation and understanding of Northern English. It includes studies not only on phonology but also on semantics, syntax and sociolinguistics from a synchronic and diachronic point of view with a special emphasis on the process of enregisterment. The varieties covered include Scottish Standard English, Shetland and Northern Ireland as well as varieties from the North of England.

Expanding Circles, Transcending Disciplines, and Multimodal Texts Bernhard Kettemann, Georg Marko, 2003

Celebrating 50 years of ACAL Akinbiyi Akinlabi, Lee Bickmore, Michael Cahill, Michael Diercks, Laura J. Downing, James Essegbey, Katie Franich, Laura McPherson, Sharon Rose, 2021. The papers in this volume were presented at the 50th Annual Conference on African Linguistics held at the University of British Columbia in 2019. The contributions span a range of theoretical topics as well as topics in descriptive and applied linguistics. The papers reflect the typological and genetic diversity of languages in Africa and also represent the breadth of the ACAL community with papers from both students and more senior scholars based in North America and beyond. They thus provide a snapshot on current research in African linguistics from multiple perspectives. To mark the 50th anniversary of the conference, the volume editors reminisce in the introductory chapter about their memorable ACALs.

Concise History of the Language Sciences E.F.K. Koerner, R.E. Asher, 2014-06-28. This book presents in a single volume a comprehensive history of the language sciences from ancient times through to the twentieth century. While there has been a concentration on those traditions that have the greatest international relevance, a particular effort has been made to go beyond traditional Eurocentric accounts and to cover a broad geographical spread. For the twentieth century, a section has been devoted to the various trends, schools and theoretical frameworks developed in Europe, North America and Australasia over the past seventy years. There has also been a concentration on those approaches in linguistic theory which can be expected to have some direct relevance to work being done at the beginning of the twenty-first century or those of which a knowledge is needed for the full understanding of the history of linguistic sciences through the last half of this century. The last section of this book reviews the applications of some of these findings. Based on the foundation provided by the award-winning *Encyclopedia of Language and Linguistics*, this volume provides an excellent focal point of reference for anyone interested in the history of the language sciences.

Concessive constructions in varieties of English Ole Schützler, 2023-11-10. This volume presents a synchronic investigation of concessive constructions in nine varieties of English based on data from the International Corpus of English. The structures of interest are complex sentences with a subordinate clause introduced by *although*, *though* or *even though*. Various functional and formal features are taken into account: i) the semantic/pragmatic relation that holds between the propositions involved; ii) the position of the subordinate clause; iii) the conjunction that is used; and iv) the syntax of the subordinate clause. By exploring patterns of variation from a

Construction Grammar perspective the study works towards an explanatory model whose point of departure is at the functional semantic pragmatic level and which makes hierarchically organised predictions for different formal levels clause position choice of connective and realisation of the subordinate clause It treats concessives as complex form function pairings and develops arguments and routines that may inform quantitative approaches to constructional variation more generally *Selected Papers from the Hall of Harmonious Wind* Liu Ts'un-Yan, 2023-10-09 **Phonetica**, 1998
