Kyoto's Gion Festival Mark Teeuwen, 2023-01-12 This book focuses on the long history of what is arguably the most prestigious and influential festival in Japan Kyoto's Gion festival It explores this history from the festival's origins in the late 10th century to its post war revival drawing on Japanese historical studies and archival materials as well as the author's participant observation fieldwork Exploring the social and political networks that have kept this festival alive for over a millennium this book reveals how it has endured multiple reinventions In particular it identifies how at each historical juncture different groups have found new purposes for the festival and adapted this costly enterprise to suit their own ends The history of this festival not only sheds light on the development of Japanese festival culture as a whole but also offers a window on Kyoto's history and provides a testing ground for recent festival theory

Tradition, Democracy and the Townscape of Kyoto Christoph Brumann, 2012-08-06 As the historic capital of the country and the stronghold of the nation's most celebrated traditions the city of Kyoto holds a unique place in the Japanese imagination Widely praised for the beauty of its townscape and natural environments it is both a popular destination for tourists and home to one and a half million inhabitants There has been a sustained lively debate about how best to develop the city with a large number of local government officials citizen activists urban planners real estate developers architects builders proprietors academic researchers and ordinary Kyotoites involved in discussions forming a highly peculiar social arena that has no match elsewhere in Japan This book based on extensive fieldwork and interviews provides an ethnographic study of this particular social field It analyses how people in Kyoto deal with their most cherished traditions such as the traditional town houses and the famous Gion matsuri festival which calls into question several of the standard social scientific assumptions about the functions of cultural heritage for present day societies The book looks at the way concerned citizens government bureaucrats and other important players interact with each other over contentious modern buildings often with the best intentions but constrained by set role expectations and by the superior power of national level regulations and agencies This book contributes to debates on the social uses of tradition and heritage and the question of how to create sustainable liveable urban environments
