Fight Over Nuclear Power:

The Electric War Sheldon M. Novick, 1976 **The Fight Over Nuclear Power** Fred Henry Schmidt, David Bodansky, 1976 *ERDA Energy Research Abstracts*, 1977 **The National Politics of Nuclear Power** Benjamin K. Sovacool, Scott Victor Valentine, 2012-05-16 This book offers a comprehensive assessment of the dynamics driving and constraining nuclear power development in Asia Europe and North America providing detailed comparative analysis The book formulates a theory of nuclear socio political economy which highlights six factors necessary for embarking on nuclear power programs 1 national security and secrecy 2 technocratic ideology 3 economic interventionism 4 a centrally coordinated energy stakeholder network 5 subordination of opposition to political authority and 6 social peripheralization The book validates this theory by confirming the presence of these six drivers during the initial nuclear power developmental periods in eight countries the United States France Japan Russia the former Soviet Union South Korea Canada China and India The authors then apply this framework as a predictive tool to evaluate contemporary nuclear power trends They discuss what this theory means for developed and developing countries which exhibit the potential for nuclear development on a major scale and examine how the new renaissance of nuclear power may affect the promotion of renewable energy global energy security and development policy as a whole The volume also assesses the influence of climate change and the recent nuclear accident in Fukushima Japan on the nuclear power industry s trajectory This book will be of interest to students of energy policy and security nuclear proliferation international security global governance and IR in general *New Social Movements In Western Europe* Kriesi Hanspeter, Ruud Koopmans, Jan Willem Duyvendak, Marco G. Giugni, 2015-03-24 First published in 1996 Routledge is an imprint of Taylor Francis an informa company Warnke Nomination United States. Congress. Senate. Committee on Foreign Relations, 1977 Report of the Interagency Task Force on the Health Effects of Ionizing Radiation United States. Interagency Task Force on the Health Effects of Ionizing Radiation, 1979 **Energy Abstracts for Policy Analysis**, 1984-07 The Integrated Workplace, 1999 **Arms Control and Technological Innovation** David Carlton, Carlo Schaerf, 2024-11-02 First published in 1977 Arms Control and Technological Innovation is primarily concerned with three subjects the causes of the arms race the consequences of the arms race to the world and the control of the arms race Written by experts in the field it brings themes like new technologies and new weapon systems new tactics to replace tactical nuclear weapons in Europe the Anglo American nuclear relationship strategic arms limitation and military strategic concepts and a new approach to strategic arms limitation and reduction The book argues that the principal problem of the arms race according to several lectures is that weapons and delivery systems technology have developed so much as to threaten the survival of civilization itself The pace of technological change is proceeding more rapidly than ever before and there is serious doubt whether political institutions are adapting to this change in time to avoid devastating consequences to the world This book is a must read for scholars and researchers of military and strategic studies

international relations international politics and geopolitics Global Warming Joseph Patrick Noonan,2009-04 The pundits would have you believe that global warming will cause the end of the Earth and they have a lot of firepower on their side Should you be afraid of global warming And if so what is so threatening about it Consider the answers to these questions and others including Why do global doomers support wildlife conservation if animals exhale carbon dioxide which contributes to the buildup of greenhouse gases in the atmosphere What place do electric cars have in fighting global warming if they will never be able to travel the distances that regular cars can Even if you travel 300 miles on one charge how do you get back at the end of a long trip Can using ethanol really solve the problem or does it create even greater woes Written with a conservative bent Global Warming will help you wade through the arguments of hypocrites so you can take a fresh look at global warming and what can be done to prevent its potential harmful effects **ERDA Energy Research Abstracts** United States. Energy Research and Development Administration,1977 **Energy and International War** Clifford Singer,2008 Will international wars where energy resources play a central role continue to hold sway over life and death for industrialized nations or is this a transient phase in the evolution of industrial societies This book answers this question by tracing the history of energy and conflict from antiquity through the epic hot and cold wars of the twentieth century to expected outcome of the war in Iraq It points the way to the end of wars over control of fossil fuels and demonstrates why these may be the last major international wars over other resources as well This book is a must read for anyone interested in the future of energy use or international conflict Readers will find in it an illuminating overview of the sweep of historical events The book further provides a compelling explanation of how a thorough understanding of the evolutionary direction of these events challenges the conventional wisdom that resource wars are endemic to the nature of industrial society thus offering a fresh view on one of the most important challenges of our time Congressional Record United States. Congress,1994 *Environmental Case for Nuclear Power* Robert C. Morris,2000-07 Morris a retired chemistry teacher argues against opponents of nuclear power saying they overestimate its danger He compares fossil fuels and nuclear power asserting that nuclear power offers a vast potential improvement over toxic pollution by fossil fuel use while arguing that other alternatives like solar power are inadequate in themselves to support the world s current population Annotation copyrighted by Book News Inc Portland OR

Report United States. Interagency Task Force on the Health Effects of Ionizing Radiation,1979 **Networks of Power** Robert Perrucci,Harry R. Potter, Large organizations particularly corporations possess considerable resources and with that comes considerable power often extending beyond a single community or nation state Networks among large corporations enhance that power to the point that they exert a major impact on national and multinational economies and policies influencing decision making to achieve their own goals Networks of Power applies interorganizational analysis to the study of power in three main areas national policy domains community influence structures and national corporate structures The main body of the text is comprised of original research by the leading authorities in the field and covers such areas as

national policy decisions in health and energy corporate structure innovative theoretical and methodological approaches and a critical review of network analysis of interorganizational relations and power Also presented is an agenda for future research

Nature and the Iron Curtain Astrid Kirchhof, J. R. McNeill, 2019-06-05 In *Nature and the Iron Curtain* the authors contrast communist and capitalist countries with respect to their environmental politics in the context of the Cold War Its chapters draw from archives across Europe and the U S to present new perspectives on the origins and evolution of modern environmentalism on both sides of the Iron Curtain The book explores similarities and differences among several nations with different economies and political systems and highlights connections between environmental movements in Eastern and Western Europe
