Fighter Aces John Sadler, Rosie Serdiville, 2017-08-19 A readable and entertaining introduction to aerial combat in the series that would be excellent for someone with an early interest in military history Army Rumour Service Just over a decade after the first successful powered flight fearless pioneers were flying over the battlefields of France in flimsy biplanes Though the infantry in their muddy trenches might see aerial combat as glorious and chivalric the reality was very different and undeniably deadly new Royal Flying Corps subalterns in 1917 had a life expectancy of eleven days In 1915 the term ace was coined to denote a pilot adept at downing enemy aircraft and top aces like the Red Baron Ren Fonck and Billy Bishop became household names The idea of the ace continued after the 1918 Armistice but as the size of air forces increased the prominence of the ace diminished But still the pilots who swirled and danced in Hurricanes and Spitfires over southern

England in 1940 were and remain feted as the Few who stood between Britain and invasion. Flying aircraft advanced beyond the wildest dreams of Great War pilots; the top fighter aces of World War II would accrue hundreds of kills though their life expectancy was still measured in weeks, not years. World War II cemented the vital role of air power and postwar innovation gave fighter pilots jet-powered fighters enabling them to pursue duels over huge areas above modern battlefields. This entertaining introduction explores the history and cult of the fighter ace from the first pilots through late twentieth century conflicts which leads to discussion of whether the era of the fighter ace is at an end.

Aces Against Japan II Eric Hammel, 2007-10. This engrossing new collection of 38 first person accounts by American World War II fighter aces is coupled with a clear overview of America's far-flung air war against Japan and a clear appreciation of the burgeoning industrial might backing the American war effort.

Fighter aces of World War II, 2012. Day Fighter Aces of the Luftwaffe 1939-42 Neil Page, 2021-10-01. A pictorial history of Hitler's fighter pilots that will be of great interest to aircraft modelers and aviation historians alike.

AMPS Indianapolis Military and aviation history enthusiasts have always been interested in the fighter pilots of Hitler's Luftwaffe. Around five hundred Luftwaffe fighter pilots were awarded the Knight's Cross, accumulating huge numbers of missions flown. A similar number achieved more than forty victories, more than the two leading USAF and RAF fighter pilots. Indeed, some of their stories are extraordinary. Fighting from the Arctic Circle to the North African deserts, from the Caucasus in the East to Normandy in the West, the German fighter pilot flew and fought until he was shot down, flown out, wounded, or killed in action. A handful survived from first to last. This first volume of *Day Fighter Aces of the Luftwaffe* traces the story of the Luftwaffe's day fighter arm, *der Tagjagd*, from its inception to 1942. Organized campaign by campaign, this chronological account interweaves brief biographical details, newly translated personal accounts, and key moments in the careers of a host of notable and lesser-known Luftwaffe aces.

Richard Bong Pete Barnes, 2009-08. Wisconsin-born Richard Bong was the highest-rated flying ace in World War II, famous for having shot down 40 Japanese planes during a 3-year career as a fighter pilot. The recipient of a Silver Star and a Congressional Medal of Honor, Bong was killed after the war in a flying accident just months after marrying the love of his life, Marge Vattendahl.

Badger Biographies is a series intended to integrate reading and Wisconsin history for 4th through 8th grade students or for ELL/ESL high school students.
