American Book Publishing Record, 2000 **Subject Guide to Books in Print**, 1971 **Faster, Further, Higher** Philip Jarrett, 2002 This volume concentrates on the key developments that prepared the way for the sophisticated civil and military aeroplanes of the 21st century The first chapter makes a study of the way transonic and supersonic aerodynamics have shaped aeroplane design The next essay explains how aerodynamic developments have led to technological developments in the cockpit to keep pace with the faster speeds and higher altitudes possible The third major step in post war aircraft technology came with the development of in flight refuelling technologies and the next chapter covers this Succeeding chapters cover such technological developments as the use of new materials the need to make jet engines more fuel efficient developments in avionics and the problems of mass producing high technology aircraft The Series Editor Philip Jarrett is a freelance author editor and consultant specializing in aviation He has been editor of *Aeroplane* the Royal Aeronautical Society's newspaper assistant editor of *Aeroplane Monthly* and production editor of *Flight International* **The British National Bibliography** Arthur James Wells, 2000 Cockpit Design in the Military Aircraft of the Future, 1991

lift and direct side force capabilities Program efforts included an assessment of basic pilot tasks in fighter mission using the configuration direct force and high acceleration design features Cockpit functional capabilities were tailored to satisfy operational needs providing for normal flight and combat phases of the mission Several configuration design alternatives were evaluated by USAF pilots in a static simulation cockpit evaluation phase Resulting objective and subjective measures allowed ranking of configuration concepts Several principal areas for future high acceleration cockpit development were defined Author **The Design and Development of the Hawker Hunter** Tony Buttler, 2014-08 This book covers in detail the design and development of the Hawker Hunter jet fighter from its inception in the late 1940s A list of UK squadrons and users is included and a large number of photos and 3 view drawings are available including models of unbuilt designs

International Anthropometric Variability and Its Effects on Aircraft Cockpit Design Kenneth W. Kennedy, AIR FORCE AEROSPACE MEDICAL RESEARCH LAB WRIGHT-PATTERSON AFB OH., 1976 This paper is concerned with high performance single seat military aircraft cockpits and the problems encountered in accommodating them to the anthropometric requirements of foreign military users These problems often are very difficult Design changes invariably required to cope with any significant anthropometric differences are fraught with seemingly insurmountable economic and engineering problems Still malaccommodation in aircraft not only produces a condition in which the product is inconvenient to operate but one in which the user's safety and the basic mission of the aircraft can be compromised **Fighter aircraft design** North Atlantic Treaty Organization.
