United States, Financial and Economic Crisis Rafael D. Mota, 2012-12-07 The United States had a financial and economic crisis during the presidency of Reagan because of the plastic money policy Those years became the beginning of the citizens credit card debt however during the Bush Jr government a financial attack happened in United States history known as 9 11 The critical crisis began in the real estate market affecting Obamas economic policy in his early presidential years After that the economy had been growing At times it downsized but bounced back to recovery in 2010

The Robin Hood Lies Frank Merlo, 2012-09-29 The Socialists take from the Rich and give to the Poor and the Elites become the Masters of our Universe The Elites are usually very charismatic and successfully influence the masses by giving good speeches They seduce our children into believing there is no God that there is no right or wrong and that everything is grey In this political environment our children do not question President Obamas ties to William Ayers of the terrorist group the Weather Underground whom he describes as a mentor or his vote for Abortion on Demand which was far to the Left of Hillary Clinton Nor do they challenge the negative attacks on Michelle Bachman who raised 23 foster children and yet is described as a bad person Together we are on a path to godlessness if no one stops the Elites from demeaning Christian ministers as old school superstitious dinosaurs who are merely relics from antiquity

The Walls around Opportunity Gary Orfield, 2024-04-16 The case for race conscious education policy In our unequal society families of color fully share the dream of college but their children often attend schools that do not prepare them and the higher education system gives the best opportunities to the most privileged Students of color hope for college but often face a dead end For many young people racial inequality puts them at a disadvantage from early childhood The Walls around Opportunity argues that colorblind policies have made college inaccessible to a large share of students of color and reveals how policies that acknowledge racial inequalities and set racial equality goals can succeed where colorblindness has failed Gary Orfield paints a troubling portrait of American higher

education explaining how profound racial gaps imbedded in virtually every stage of our children's lives pose a major threat to communities of color and the nation He describes how the 1960s and early 1970s was the only period in history to witness sustained efforts at racial equity in higher education and how the Reagan era ushered in today's colorblind policies which ignore the realities of color inequality Orfield shows how this misguided policy has resegregated public schools exacerbated inequalities in college preparation denied needed financial aid to families and led to huge price increases over decades that have seen little real gain in income for most Americans Now with a new afterword that discusses the 2023 Supreme Court decision to outlaw affirmative action in college admissions this timely and urgent book shows that the court's colorblind ruling is unworkable in a society where every aspect of opportunity and preparation is linked to race and reveals the gaps in the opportunity pipeline while exploring the best ways to address them in light of this decision *Pull Your Head Out Of Your Assumptions What Teachers Know About Teaching* Matthew J. Macaluso M. Ed., 2015-11-18 Teachers know things that parents policy makers education professors and boards of education don't They know how hard the job can be They know how students react to a grade They know how family dynamics and home life impact academic performance They know how misguided policies impact the other teachers that they work with All the techniques you learn in your teacher prep classes work well with the compliant student In their own words seventeen teachers and administrators from the Northeast describe their work among their students From teacher preparatory programs to dealing with national education reform classroom technology and boards of education teachers reflect with brutal honesty the incredible things that they see and hear every day and every year in their classrooms and schools **Hi-Lites of Philosophy and Theology** William H. McNeely, 2005 With the backdrop of ancient civilizations vividly and expertly described McNeely a brilliant researcher and scientist takes the reader on a whirlwind tour of how the world has been affected by differing philosophical and theological themes with a particular emphasis on the future of democracy in these United States *American Workers, Colonial Power* Dorothy B. Fujita Rony, 2003-03-04 Historically Filipina o Americans have been one of the oldest and largest Asian American groups in the United States In this pathbreaking work of historical scholarship Dorothy B Fujita Rony traces the evolution of Seattle as a major site for Philippine immigration between World Wars I and II and examines the dynamics of the community through the frameworks of race place gender and class By positing Seattle as a colonial metropolis for Filipina os in the United States Fujita Rony reveals how networks of transpacific trade and militarism encouraged migration to the city leading to the early establishment of a Filipina o American community in the area By the 1920s and 1930s a vibrant Filipina o American society had developed in Seattle creating a culture whose members including some who were not of Filipina o descent chose to pursue options in the U S or in the Philippines Fujita Rony also shows how racism against Filipina o Americans led to constant mobility into and out of Seattle making it a center of a thriving ethnic community in which only some remained permanently given its limited possibilities for employment The book addresses class distinctions as well as gender relations

and also situates the growth of Filipina o Seattle within the regional history of the American West in addition to the larger arena of U S Philippines relations

Taking Christianity to China Samuel Paul Garner,1976 Beginning early in the 19th century the American missionary movement made slow headway in China Alabamians became part of that small beachhead After 1900 both the money and personnel rapidly expanded peaking in the early 1920s By the 1930s many American denominations became confused and divided over the appropriateness of the missionary endeavor Secular American intellectuals began to criticize missionaries as meddling do gooders trying to impose American Evangelicalism on a proud ancient culture By examining the lives of 47 Alabama missionaries who served in China between 1850 and 1950 Flynt and Berkley reach a different conclusion Although Alabama missionaries initially fit the negative description of Americans trying to superimpose their own values and beliefs on heathen they quickly learned to respect Chinese civilization The result was a new synthesis neither entirely southern nor entirely Chinese Although previous works focus on the failure of Christianity to change China this book focuses on the degree to which their service in China changed Alabama missionaries And the change was profound In their consideration of 47 missionaries from a single state their call to missions preparation for service in China living working contacts back home cultural clashes political views internal conflicts and gender relations the authors suggest that the efforts by Baptist Methodist and Presbyterian missionaries from Alabama were not the failure judged by many historians In fact the seeds sown in the hundred years before the Communist revolution in 1950 seem to be reaping a rich harvest in the declining years of the 20th century when the number of Chinese Christians is estimated by some to be as high as one hundred million
