Golden Age Of Europe From Elizabeth I To The Sun King:

The Golden Age of Europe Hugh Redwald Trevor-Roper, 1987 The Winter King Brennan C. Pursell, 2017-05-15

Elector Palatinate Frederick V the Winter King would be an insignificant figure in the history of Europe were it not for the tremendous conflagration that he helped to ignite Frederick's conflict with Holy Roman Emperor Ferdinand II over the throne of Bohemia plunged Europe into thirty years of savage violence fiery devastation and terrible privation during the first half of the seventeenth century More than simply a biographical study of Frederick The Winter King provides a fresh and compelling study into the causes of the Thirty Years War Examining the early stages of the war through the locus of Frederick it reconciles the forces of confession conscience and constitutionalism that affected Frederick's decision making at critical junctures throughout the crisis By placing constitutionalism rather than religion at the centre of events it offers a subtle yet convincing new account of the conflict Drawing on political and personal correspondence backed up with a wealth of archival and secondary sources Dr Pursell presents Frederick's choices and alternatives and interprets his words and responses to them Considering the war from Frederick's perspective he argues convincingly that the war is best understood not simply as a struggle between Protestant and Catholic powers but rather as an extended constitutional conflict entwining religious and political factors fought within the Holy Roman Empire Sowing Modernity Peter D. McClelland, 2018-09-05

Contrary to those who regard the economic transformation of the West as a gradual process spanning centuries Peter D McClelland claims the initial transformation of American agriculture was an unmistakable revolution He asks when a single crucial question was first directed persistently pervasively and systematically to farming practices Is there a better way McClelland surveys practices from crop rotation to livestock breeding with a particular focus on the change in implements used to produce small grains With wit and verve and an abundance of detail he demonstrates that the first great surge in inventive activity in agronomy in the United States took place following the War of 1812 much of it in a fifteen year period ending in 1830 Once questioning the status quo became the norm for producers on and off the farm according to McClelland the march to modernization was virtually assured With the aid of more than 270 illustrations many of them taken from contemporary sources McClelland describes this stunning transformation in a manner rarely found in the agricultural literature How primitive farming implements worked what their defects were and how they were initially redesigned are explained in a manner intelligible to the novice and yet offering analysis and information of special interest to the expert

The Low Countries at the Crossroads Koen Ottenheim, Krista de Jonge, 2013 This book focuses on the diffusion of architectural inventions from the Low Countries to other parts of Europe from the late fifteenth until the end of the seventeenth century Multiple pathways connected the architecture of the Low Countries with the world but a coherent analysis of the phenomenon is still missing Written by an international team of specialists the book offers case studies illustrating various mechanisms of transmission such as the migration of building masters and sculptors who worked as

architects abroad networks of foreign patrons inviting Netherlandish artists printed models and the role of foreign architects who visited the Low Countries for professional reasons Its geographical scope is as broad as the period under review and includes all European regions where Netherlandish elements were found from Spain to Scandinavia and from Scotland to Transylvania **An Introduction to the Humanities** Neil Anstead,1996 **Whitaker's Books in Print** ,1998
