Good Care Painful Choices:

Good Care, Painful Choice Richard J. Devine, CM, 2004-09-01 Good Care Painful Choices surveys the ethical decisions that must be made by ordinary people who deal with medicine today ranging from beginning life issues such as test tube babies and surrogate motherhood to end of life issues such as advance directives patient refusal of treatment and physician assisted suicide This third edition gives special attention to partial birth abortion and to recent discoveries in genetics involving stem cells cloning and eugenics The strength of the book comes from its foundation in basic moral principles that stress personhood moral decision making and conscience Decidedly Christian the book gives special emphasis to the Roman Catholic tradition It will be welcomed by Catholics by Christians of all denominations and by anyone interested in a careful overview of contemporary medical ethics BOOK JACKET Title Summary field provided by Blackwell North America Inc All Rights Reserved

Painful Choices David Mechanic, 1989-01-01 More than ever society faces painful choices in the allocation of resources for health care How it makes these choices and how wise they are will determine the quality and character of health care for years to come David Mechanic examines existing and impending dilemmas the American health care system must manage as it confronts these choices He explores conceptual approaches to health and health care showing how these translate into research and defines a strategy for informed choice The result is a masterful volume by one of our leading medical sociologists at the peak of his career Mechanic looks at the continuing emphasis on biomedical technology in the context of growing economic constraints as medical care becomes more expensive and demands become greater He examines the discrepancy between public expectations and how health care is actually provided and points out increasing discordance between demographic trends and disease patterns and the medical system's emphasis on acute care Of particular concern is the enormous gap between entitlements for medical care and the increasing need for long term care This gap is of particular concern because of the United States's enormous investment in health care which now consumes 11 percent of the Gross National Product Although there is no particular consensus on what is an appropriate level of investment in health policymakers are impatient with the medical system's apparent inability to control costs and are concerned as well about the competition for resources between health and other sectors Mechanic examines new trends such as managed care and transformation of the role of those who provide health care from patient advocates to allocators of services a crucial distinction The choices that will have to be made in the next decades are difficult They will also be painful but they are inevitable The key challenge will be to respond to the anxieties of the 37 million uninsured children and adults the growing numbers of frail elderly and the needs of patients with serious mental illness and other chronic disabilities All of this must be accomplished while maintaining a high level of service for the rest of the population and without breaking the bank To achieve this Mechanic argues health services must be shaped to enhance function and quality of life and not simply in response to technological imperatives In its profound understanding of the social and political context in which

competitive initiative the growth of regulation new health care systems and approaches for making research sensitive to patients are all evident Painful Choices provides a framework for responsive and meaningful policy analysis

The Most Painful Choice Beth Miller, 2023-03-31 When Champ a German Shepherd was adopted from a local breed rescue his family hoped and expected to spend many fun filled years with him However Champ suffered physically and mentally from neglect and trauma from his first years of life Despite numerous treatments Champ was never able to overcome that trauma to become a normal dog and his family made the painful decision to give him peace through behavior euthanasia This work serves not only as an account of Champ s life and his family s attempts to help him but also as a resource on behavior euthanasia which is a compassionate choice for unmanageable aggression reactivity bites or severe anxiety Investigating the potential causes of these issues chapters examine scientific research on dog behavior and emotions

Medicine, Health Care, & Ethics John F. Morris, 2007-04 From its earliest beginnings the Catholic Church has cared for the sick and dying of the world as an extension of the healing ministry of Jesus As a natural consequence Catholics have regularly addressed moral issues relating to health care long before the term bioethics was coined Beginning with a deeply nuanced holistic understanding of the human person as their foundation Catholic scholars have developed a person centered ethic with which to approach ethical dilemmas that is understandable and defensible in the light of natural human reason yet which is compatible with the teachings and doctrine of the Church emphasizing the harmony of faith and reason within the Catholic moral tradition *Medicine Health Care and Ethics* adds to this rich tradition with a collection of contemporary essays that represent the very best efforts of current Catholic scholarship in the field of health care and medical ethics The book begins with an introductory section that explains the basic foundations of the personalist approach to ethics and its development within Catholic thought The remaining parts of the book address timely topics such as artificial reproduction contraception abortion euthanasia genetic engineering stem cell research cloning and health care reform Each author brings a fresh perspective and a wealth of knowledge on these issues that will benefit Catholics as well as non Catholics With general overviews for each section and topic specific bibliographies to guide further study this volume is designed to provide a greater understanding and deeper appreciation of the Catholic perspective on health care and medicine for both newcomers and seasoned students of bioethics alike In today s culture of pluralism and diversity the Catholic tradition has much wisdom to contribute to society s consideration of contemporary problems in medicine and health care This collection of essays is offered in the spirit of open and honest dialogue for all who are seeking to understand that tradition

Rationing Health Care André den Exter, Martin Buijsen, M. A. J. M. Buijsen, 2012 Medical need is a factor in health care access decision making but merit considerations are becoming important too In the shortening of waiting time priority arrangements are considered and or introduced based on non medical criteria Simultaneously in terms of financing health status has become important due to payment arrangements limited insurance package options etc At the same time health status disparities due to socioeconomic inequalities seem to be increasing Under these circumstances confronted with increased health spending it is expected that rationing will become more eminent Due to this the emerging relevant questions are Who will be responsible for rationing the market governments bureaucrats physicians or others How does it function explicit or implicit What are relevant and acceptable selection criteria QALYs DALYs health status sex age etc To what extent is current rationing just What can be done to make it more just

The Caregiving Zone Peggy Flynn, 2006-11-08 a unique opportunity to learn about caregiving from a true veteran and practitioner of the art Jon D Kaiser M D Physician and Author of *Healing HIV Coping with illness and dying is a challenge* How do we allocate resources What are the rights and responsibilities of the sick and those tending them Can the burdens of caregiving be blessings in disguise In *The Caregiving Zone* Peggy Flynn founder and director of The Good Death Institute describes the everyday challenges of

caregiving She encourages us to think about illness and death as incontrovertible realities that can be anticipated and made less burdensome for everyone involved Death is hard but it doesn't have to be hideous Using personal stories and reflections Ms Flynn illuminates life in the Zone with understanding and empathy She suggests that individuals and families take charge of the inevitable by confronting their fears and preparing for illness and death before events overtake them She envisions a program designed for families or groups of friends who want to be proactive about the inevitable The Caregiving Zone illustrates how both giving and receiving care can provide opportunities and rewards in addition to burdens Sometimes with insight information and compassion the benefits can outweigh the costs
