Going Private Privatizations Around The World:

Going Private Jose Gomez-Ibanez, John R. Meyer, 2011-10-01 In the last decade many countries turned to private sources to provide services formerly offered by public agencies Europeans particularly the British and the French were leaders in this movement Developing countries also experimented extensively with privatization in the 1980s with varying degrees of success Because governments around the world are heavily involved in transportation it is a natural focus of privatization experiments and in many ways has been at the cutting edge *Going Private* examines the diverse privatization experiences of transportation services and facilities Cases are drawn from the United States Asia Europe and Latin America Since almost every country has experimented to some degree with highway and bus privatization the authors focus particularly on these services although they also discuss urban rail transit and airports Highways and buses they explain encompass all three of the most common and basic forms of privatization the sale of an existing state owned enterprise use of private rather than public financing and management for new infrastructure development and contracting out to private vendors public services previously provided by government employees After thoroughly examining these services and discussing the motives for and objections to privatization the authors look at the prospects for privatization in other sectors and industries They assess those circumstances in which privatization is most likely to succeed and those in which it is most likely to fail for political as well as economic reasons The authors conclude that privatization involves many political and social as well as economic dimensions Privatization is usually not simply a matter of efficiency improvements or capital augmentation but also involves such deeply imbedded societal concerns as equity income transfers environmental problems and attitudes toward taxation and the role of government *A Financial-agency Analysis of Privatization* John S. Walker, Geraldo M. Vasconcellos, 1997 The authors argue that resolution of the CEO selection and financial contracting problems can accelerate efficiency gains realized by the enterprise **Privatizing Public Enterprises and Foreign Investment in Developing Countries, 1988-93** Frank Sader, 1995-01-01 Analyzes impact of privatization programs on direct foreign investment DFI Uses econometric techniques to demonstrate that infrastructure privatization is highly correlated with higher levels of subsequent DFI capital inflows *Handbook of Latin American Studies* v 57 *Chinese Workers and Their State* Greg O'Leary, 2019-07-23 This text examines the most economically critical and politically sensitive issues of China's reform process labour market development changing industrial relations and labour state and labour capital conflict It suggests that a system is emerging in China which is a form of capitalism EBOOK: Corporate Finance Foundations - Global edition Stanley Block, Geoffrey Hirt, Bartley Danielsen, 2014-03-16 This Global Edition has been developed specifically to meet the needs of international finance students It continues to offer substantial coverage of the recession and liquidity crisis that engulfed the global economies in the last few years and pays special attention to the banking sector and the critical need for funding that most businesses face The emphasis on analytical approaches to international financial problems is intended to make the content more relevant and

Privatisation, Politics, and Economic Performance in Hungary Zoltan Antal-Mokos,1998-02-05 Why do some privatisations apparently fail to produce expected positive results Economic theory tells us that privatisation should improve efficiency but this book originally published in 1998 suggests that political bargaining in the process of privatisation works against the results we expect to achieve To gain a better understanding of what privatisation is really about power at a firm level needs to be understood Privatisation is a gradually unfolding evolutionary process often with defective corporate governance Politicking can take priority over performance with the result that efficiency is ignored and profitability is affected This is a comprehensive book on privatisation which focuses on micro level behavioural issues and it uses exceptionally rich case evidence to illustrate that privatisation is more about politics than performance

The Treuhandanstalt and Privatisation in the Former East Germany Jutta E. Howard,2018-12-20 This title was first published in 2001 This study explores the operation of the Treuhandanstalt the trust agency responsible for implementing the massive privatization programme launched in the former East Germany in 1990 It evaluates the level of satisfaction that stakeholder groups typically felt with regard to the agency its actions and its achievements

Reframing Education as a Public and Common Good Rita Locatelli,2019-08-19 This book examines the normative principles that

guide the governance of education in particular the notion of education as a public good Determining whether this concept is still valid is a topic of growing importance especially considering the phenomena of increasing privatisation and marketisation in the sector The author posits that the prioritisation of economic aspects of education may lead to the weakening of the role of the State in ensuring equality of opportunity and social justice and thus to a significant risk of considering education as merely a private marketable good The volume argues that considering education as a common good can lead to the strengthening of democratic and participatory approaches to educational governance based on the recognition of education as a shared endeavour and responsibility It will be of interest and value to students and scholars of education as a public good social justice and the wider neoliberalisation of the education sector

The Challenges of Privatization Bernardo Bortolotti, Domenico Siniscalco, 2004-03-11 From 1997 to 2001 more than 4 000 privatization operations have been carried out in more than 100 countries bringing in government revenues of over 1 362 billion dollars The phenomenon which grew exponentially at the end of the 1990s and then abruptly slowed down had dramatic consequences on the performance of state owned enterprises and a significant impact on industrialized countries as well as emerging and less developed economies Yet there have been surprisingly few attempts to provide a systematic empirical account of the privatization process at the worldwide level Why do governments privatize Why do some countries accomplish large scale privatization programmes and others never privatize at all Is privatization a trend or a cycle Furthermore how do governments privatize Do governments really transfer ownership and control of state owned enterprises or does private ownership tend to coexist with public control This book provides some answers to these important questions trying to test research hypotheses set forth by the recent economic theory of privatization Comprehensive cross country empirical analyses carried out over a period of more than twenty years are used in the book to show that privatization has taken place all over the world sometimes spontaneously more often under the pressure of economic and budgetary constraints Several of the goals of the privatization have been met but despite proclamations and programmes only a small minority of countries has carried out a genuine privatization process completely transferring ownership of state owned enterprises to the private sector A lack of political will is to some extent at the root of this reluctance However this reluctance can be traced back partly to structural factors that would make an orderly privatization difficult such as the absence of developed capital markets appropriate regulation and suitable institutions

Legal Aspects of Privatisation Bulent Seven, 2002 The main aims of this thesis are as follows a To present a comprehensive analysis of the concept of privatisation its origins and limits b To identify the legal and institutional framework for privatisation in different European countries from a comparative perspective c To define and analyse particularly legal issues which arise during the privatisation transactions e g labour law competition law etc d To evaluate which features of the successful legal and organisational framework of privatisation have been successful so as to provide guidelines for those individuals and organisations participating in the privatisation exercises This work found

out that there is no simple internationally applicable recipe for privatisation various legal methods and techniques can be used to privatise state owned enterprises Because each country has different circumstances it is impossible to provide a unique model for privatisation each country needs to design its own model according to its circumstances Privatisation is an essential but insufficient element for structural economic reform in the economy and society Privatisation is not a panacea it is not the solution to every economic and administrative problem selling an enterprise to the private sector does not mean an end to all problems Also privatisation is not an overnight process or a magic touch it will be a lengthy process Furthermore a decision that something can be privatised does not mean that it should be privatised In that context privatisation is not good or bad it is an economic and social instrument If it is well designed it may bring substantial benefits to the economy and society In many countries many state owned enterprises particularly the ones which are financially weak have still not been privatised This finding revealed that the privatisation process will be in the political and economic agenda for at least few more decades

Eastern Europe Privatization Yearbook Inc. Ibp,2013-08 2011 Updated Reprint Updated Annually Eastern Europe Privatization Yearbook Major Programs and Projects *Contracting Out Government Services* Paul Seidenstat,1999-06-30 Privatization of government services in the United States has accelerated in the last two decades especially at the state and local levels This work focuses on contracting out the most widely used method of privatization Contributors from academia consulting firms government agencies and private providers discuss the why and how of contracting out and examine the results of contracted services including quality and cost measures of performance Some chapters apply economic theory to contracting out Others examine recent case studies of contracting out initiatives The book begins with a thoughtful essay on the theory of privatization and examines the recent record of use in state and local governments Section 1 takes an overview look at contracting out Section 2 examines contracting in the criminal justice area as well as examples of contracting in such diverse areas as trash collection and the operation of golf courses The final section looks in depth at the mechanics obstacles and effects of contracting The book points out the pluses and minuses of contracting out and points to the lessons that can be learned from the recent history of this privatization technique **The World's Water 2002-2003** Peter H.
