## Gold And Other Precious Metals:

Gold and Other Precious Metals Claudia Gasparrini, 2012-12-06 The literature on gold deposits has increased exponentially during the past eight years The books on gold geology and exploration cover in most cases certain geographical areas for example Gold in Canada etc or they contain papers presented at symposia and congresses The approach often missing in other texts is the one which combines geology with mineralogy and the recovery problems and which addresses the earth scientist as well as the extractive metallurgist Dr Claudia Gasparrini has managed to fill this gap very well She builds a bridge from the ore geology aspect to the mineralogical parameters and proper ties specifically for the ore dressing engineer and although to a lesser extent for the exploration geologist With her book she helps to stop blind one sided recovery attempts and points aptly to the importance of mineralogical and largely physical properties such as the mineral intergrowth and the role of associated minerals The intergrowth determines important steps of the metallurgical processes and some of the associated minerals may mess up the recovery procedure I am convinced that engineers and scientists will recognize and acknowledge that the approach presented in the present book needs to be introduced everywhere and not only in very few places As a matter of fact the small company needs it just as badly if not more than the large one I wholeheartedly support the author's intention to prove

Gold and Other Precious Metals Claudia Gasparrini, 2000 A view of gold and other precious metal extractions from a new and wider angle taking in both the earth and the metallurgical sciences To name but a small number of the topics covered Occurrences of gold and silver minerals in their ores Photomicrographs of refractory and amenable minerals ores The use of irregular gold and silver distributions for efficient planning of the extraction process Microanalytical techniques Descriptions of uranium and many base metals for comparison Written with a broad audience in mind from the manager of operations to the metallurgist for the field geologist or other earth scientist and for the professor and student alike
