*Concepts of Value in European Material Culture, 1500-1900* Bert De Munck, Dries Lyna, 2016-03-09 In contemporary society it would seem self evident that people allow the market to determine the values of products and services For everything from a loaf of bread to a work of art to a simple haircut value is expressed in monetary terms and seen as determined primarily by the objective interplay between supply and demand Yet this price mechanism is itself embedded in conventions and frames of reference which differed according to time place and product type Moreover the dominance of the conventions of utility maximising and calculative homo economicus is a relatively new phenomenon and one which directly correlates to the steady advent of capitalism in early modern Europe This volume brings together scholars with expertise in a variety of related fields including economic history the history of consumption and material culture art history and the history of collecting to explore changing concepts of value from the early modern period to the nineteenth century and present a new view on the advent of modern economic practices Jointly they fundamentally challenge traditional historical narratives about the rise of our contemporary market economy and consumer society

*Raman Spectroscopy in Cultural Heritage Preservation* Howell G. M. Edwards, Peter Vandenabeele, Philippe Colomban, 2022-10-13 This book addresses the application of Raman spectroscopic techniques to a range of diverse problems which arise in the study conservation and restoration of artefacts and sites closely related to our cultural heritage as well as in authentication These themes are naturally wider than what at first might be considered as artworks and archaeological artefacts and the topics include pigments paintings ceramics glass sculpture and patination corrosion textiles industrial archaeology the degradation and preservation of biomaterials mummies and human skeletal remains An interesting feature is the inclusion of modern case studies which describe specific problems and approaches to the Raman spectral analysis of items important to our cultural heritage The text is prefaced with an introduction to the important parameters used in nondestructive Raman measurements and also highlights some future applications based upon novel miniaturised instrumentation for in field studies and potential screening work which will identify specimens which would repay further studies in the laboratory An attempt is made to give a snapshot of the state of the art evolution since the beginning of the technique 1970s and to point out potential further development The book is co edited by three international experts with many years experience in the application of Raman spectroscopy to artworks archaeological artefacts and in the investigation of materials and sites for cultural heritage preservation and each editor has undertaken to write individual chapters and different topics personally The adopted approach is designed to convey the sort of information which has become available from the adoption of analytical Raman spectroscopy to different problems in the field of cultural heritage preservation through the spectral interrogation of artefacts and how the interpretation of the spectral data can assist museum curators archaeologists and cultural heritage historians in the preservation and conservation of ancient materials and sites a particular advantage in this respect is the ability of Raman spectroscopy to determine generally in a strictly noninvasive procedure at the laboratory or on site with mobile instruments the presence of both organic and inorganic components in a particular specimen together nondestructively without any chemical and mechanical pretreatment being undertaken which is an essential requirement for rare and valuable samples An important aside from this work is the means of spectral identification of ongoing biodeterioration and biological colonisation in specimens in storage and the effects of environmental deterioration such as humidity and temperature upon their integrity

his vast knowledge of Jewish lore unfolds layer after layer in a most intricate way His sharp eye for detail renders the images he executed a valid representation of contemporary visual culture The iconography of the Nuremberg Miscellany with its 55 decorated leaves featuring 25 text illustrations falls into two main categories biblical themes and depictions of daily life both sacred and mundane While the biblical illustrations rely largely on artistic rendering and interpretation of texts the depictions of daily life are founded mainly on current furnishings and accoutrements in Jewish homes The customs and rituals portrayed in the miscellany attest not only to the local Jewish Minhag but also to the influence and adaptation of local Germanic or Christian rites They thus offer first hand insights to the interrelations between the Jews and their neighbors Examined as historical documents the images in the Nuremberg Miscellany are an invaluable resource for reconstructing Jewish daily life in Ashkenaz in the early modern period In a period from which only scanty relics of Jewish material culture have survived retrieving the pictorial data from images incorporated in literary sources is of vital importance in providing the missing link Corroborated by similar objects from the host society and with descriptions in contemporary Jewish and Christian written sources the household objects as well as the ceremonial implements depicted in the manuscript can serve as effective mirrors for the material culture of an affluent German Jewish family in the Early Modern period The complete Nuremberg Miscellany is reproduced in the appendix of this book
