Good Reasons And Persuasive Force A Pragmatic Approach:

Good Reasons and Persuasive Force Thomas M. Olszewsky, 1983 Giving Reasons Lilian Bermejo Luque, 2011-07-31 This book provides a new linguistic approach to Argumentation Theory Its main goal is to integrate the logical dialectical and rhetorical dimensions of argumentation in a model providing a unitary treatment of its justificatory and persuasive powers This model takes as its basis Speech Acts Theory in order to characterize argumentation as a second order speech act complex The result is a systematic and comprehensive theory of the interpretation analysis and evaluation of arguments This theory sheds light on the many faces of argumentative communication verbal and non verbal monological and dialogical literal and non literal ordinary and specialized The book takes into consideration the major current comprehensive accounts of good argumentation Perelman s New Rhetoric Pragma dialectics the ARG model the Epistemic Approach and shows that these accounts have fundamental weaknesses rooted in their instrumentalist conception of argumentation as an activity oriented to a goal external to itself Furthermore the author addresses some challenging meta theoretical questions such as the justification problem for Argumentation Theory models and the relationship between reasoning and arguing

Argumentation and Language — Linguistic, Cognitive and Discursive Explorations Steve Oswald, Thierry Herman, Jérôme Jacquin, 2018-03-08 This volume focuses on the role language plays at all levels of the argumentation process It explores the effects that specific linguistic choices may have in the production and the reception of arguments and in doing so it moves beyond the first necessary descriptive stance provided by current literature on the topic Each chapter provides an original take illuminating one or more of the following three issues the range of linguistic resources language users draw on as they argue how cognitive processes of meaning construction may influence argumentative practices and which discursive devices can be used to fulfil a number of argumentative goals The volume includes theoretical and empirical or applied stances providing the reader both with state of the art reflections on the relationship between argumentation and language and with concrete examples of how this relationship plays out in naturally occurring argumentative practices such as classroom interaction and political parliamentary or journalistic discourse This is a very original timely and welcome contribution to the study of argumentation conducted with the tools of the language sciences The collection of papers relevantly tackles key linguistic discursive and cognitive aspects of argumentative practices whose treatment is underrepresented in mainstream

McKeon, 2024 Arguments figure in our everyday practices of giving reasons For example we use arguments to advance reasons to explain why we believe or did something to justify our beliefs or actions to persuade others to do or to believe something and to advance reasons to worry or to fear that something is true This book is about our uses of arguments to advance their premises as reasons for believing their conclusions i e as reasons for believing that their conclusions are true What exactly is involved when you successfully use an argument to advance the premises as reasons for believing the conclusion Philosopher Matthew W McKeon suggests there is more involved than one might think
