Financing Public Universities Marcel Herbst, 2007-05-16 Financing Public Universities addresses newer practices of resource allocation which tie funding to indicators of performance The gist of these efforts is to raise the quality of institutional systems Performance based budgeting and funding of public universities is part of broader efforts to reform public management and it is being promoted and implemented by various government agencies around the globe In particular European universities with their normally strong governmental ties or higher education systems molded on European universities are prime targets of such reforms Performance funding has made its inroads in attempts to grant university systems managerial autonomy autonomy was to be granted in exchange for funding modes which are tied to the measurement of performance indicators Unfortunately performance based budgeting or funding measures cannot meet the various expectations they do not raise the quality of teaching or learning they do not raise research performance they take back a great deal of managerial autonomy which is commonly judged to be essential for the well being of higher education institutions in particular research universities and they act as automata in place of proper governance and management Financing Public Universities addresses policy makers higher education administrators scholars and students of higher education management After an introduction to the theme and to the book Chapter 1 Financing Public Universities covers the evolution of mass higher education and the associated curtailment of funding Chapter 2 the public management reform debate Chapter 3 within which performance based budgeting or funding evolved Chapter 4 sketches alternative governance and management modes which can be used instead Chapter 5 and epitomizes inertia or challenges Chapter 6 Four appendices cover more technical matters such as a comparative exposition of the research performance of universities by nation Appendix C and examples of funding systems in the UK and in the USA Appendix D *World Yearbook of Education 2006* Jenny Ozga, Terri Seddon, Thomas S. Popkewitz, 2013-01-11 This volume considers the ways in which educational research is being shaped by policy across the globe Policy effects on research are increasingly influential as policies in and beyond education drive the formation of a knowledge based economy by supporting increased international competitiveness through more effective evidence based interventions in schooling education and training systems What consequences does this increased steering have for research in education How do transnational agencies make their influence felt on educational research How do national systems and traditions of educational research and relations with policy respond to these new pressures What effects does it have on the quality of research and on the freedom of researchers to pursue their own agendas The 2006 volume of the World Yearbook of Education explores these issues focusing on three key themes globalising policy and research in education steering education research in national contexts global local politics of education research The 2006 volume has a truly global reach incorporating transnational policy perspectives from the OECD and the European Commission alongside national cases from across the world in contrasting contexts that include North and South America

Canada France Singapore China Russia and New Zealand The range of contributions reflect how pervasive these developments are how much is new in this situation and to what extent evidence based policy pressures on research in education build on past relationships between education and policy This book considers the impact of the steering processes on the work and identities of individual researchers and considers how research can be organised to play a more active role in the politics of the knowledge economy and learning society

Alger,2016-07-01 A comprehensive account and frank assessment of federal involvement in education is long overdue Education policy expert Vicki E Alger remedies this deficiency with her book Failure The Federal Miseducation of America s Children As its title indicates Failure makes no effort to sugar coat its findings Created in 1979 after a lobbying campaign that spanned generations the Department of Education has failed to live up to its promises Federal involvement whether related to testing funding or academic curricula has failed to abide by the Constitution s implication that education must remain the domain only of state and local governments and private institutions Most of all the central government s pervasive meddling in education has failed America s school children and their parents Education policy has long been mired in controversies often with opposing sides missing the mark Failure helps us step back from the skirmish du jour and redirects our focus to the big picture showing us what s gone wrong over the decades and the institutional causes of these failures It also offers a bold blueprint for returning the federal government to its constitutional role and for cultivating an educational system that meets the needs of students and parents rather than bureaucrats Concerned citizens of every stripe will benefit from Failure s history of federal education policy its brutally honest report card for the Department of Education its look at education systems across the globe and its ambitious policy recommendations Failure might even succeed in reframing the way the federal education establishment thinks about education policy
