Education At The Crossroads:

Education at the Crossroads Jacques Maritain, 1943-01-01 The author a modern Catholic writer philosopher sets forth his views on Christian education Education at the Crossroads.... Jacques Maritain, 1957 **Education at a Crossroads** United States. Congress. House. Committee on Education and the Workforce. Subcommittee on Oversight and Investigations, 1998 This document reports on a congressional subcommittee's review of the federal role in education The review included visits to 15 states and testimony from more than 225 principals teachers and other education stakeholders The committee's purpose was to identify the steps that lead in the direction of either excellence or failure The subcommittee found that successful schools and school systems were not the product of federal funding but instead were characterized by parents involved in the education of their children local control emphasis on basic academics and dollars spent on the classroom The central theme of the findings is that the federal government cannot consistently replicate success stories in the form of federal programs Rather the government should empower parents by reducing the family federal tax burden encourage parental choice in education return federal elementary and secondary education funds to states and local school districts through flexible grants use federally funded education programs only for methods backed by reliable replicable research streamline and consolidate federal education programs and reform or eliminate ineffective and inefficient programs In short the federal government should serve education as a research and statistics gathering agency disseminating findings and enabling states to share best practices with each other The report was adopted by the subcommittee by a vote along Republican Democrat party lines of 5-2 The 17 page minority report Crossroads Hearings A Republican Assault on Public Education is printed as an appendix RJM International Education at the Crossroads Deborah N. Cohn, Hilary E. Kahn, 2021-05-11 International Education at the Crossroads captures the essence and complexity of international education in an interconnected and globalized world Written by leading scholars international educators and policy makers the 26 essays in this volume take stock of the unpredictable landscape of international education and demonstrate why international higher education is more essential now than ever before Responding to a timely global moment where education and international engagement are being redefined and practiced in new ways the authors call for a reconsideration of paradigms and critical reflection of the entire field of international education At the same time the authors show how international education is an imperative for the future of learning and the world and also crucially that this work cannot be done in a silo International Education at the Crossroads offers readers a chance to join in the conversation that is as global as it is meaningful in communities the lives of learners and institutions around the world International education requires that everyone the world over work together to produce new knowledge to navigate the crossroads and to collectively chart the directions in which the field will move into the future The Essential Profession: American Education at the Crossroads Recruiting New Teachers, Incorporated, 2001 **Education at a Crossroads** National Conference of State

Higher Education at a Crossroads Paul R. Geisler,2006

The central argument of this book posits that today s American university is dysfunctional or perhaps Dysacademic This affective disorder is traced to the increasingly corporate and performative utilities of many contemporary institutions of higher education Today s commodified and closed university doesn t transform the self as it once did when the pedagogy of Bildung emphasized the development of character and culture by teaching the rules of thought Rather the dysfunctional American university controls constricts and normalizes its subjects according to hyper structured accreditation happy economically driven disciplinary specialization and a priori established standards and outcomes that work to define and transform the effective utility of higher education After deconstructing the discourse of Dysacademia the author outlines his vision for a third curriculum one wrought with complexity self organization and critical open spaces
