book investigates the ways in which young people around the world are prepared to undertake their roles as citizens. It presents the international results from the third cycle of the study IEA's International Civic and Citizenship Education Study ICCS 2022. Based on data from 24 countries or benchmarking participants from Europe, Latin America and Asia, ICCS 2022 studies contexts for and learning outcomes of civic and citizenship education in a wide range of national contexts at the beginning of the third decade of the 21st Century. It responds to both enduring and emerging challenges of educating young people in a world where contexts of democracy and civic participation continue to change. The study addresses issues related to young people's engagement through digital technologies, migration and diversity, perceptions of the political system, global citizenship and education for sustainable development. Further, it contains data that reflects civic-related aspects of recent developments such as students' perceptions of restrictions in response to national emergencies and their trust in scientists. Over the past 50 years, the IEA has conducted comparative research studies in a range of domains focusing on educational policies, practices and outcomes in many countries around the world. Prior to ICCS 2022, the IEA had conducted four international comparative studies of civic and citizenship education with a first survey implemented in 1971, a second in 1999, a third in 2009 and a fourth in 2016. ICCS 2022 data allows education systems to evaluate the strengths of educational policies from a comparative perspective and to measure progress in achieving critical social objectives of their educational policy agendas.
