The Unification of German Education Val Dean Rust, Diane Rust, 1995 This study of the integration of East and West German education following the collapse of the German Democratic Republic in 1989 focuses on policy formation and implementation during this period of great social and political turbulence It is the result of a research project undertaken shortly after the unification The authors lived in East Germany for a full year looking carefully at individual schools vocational training centers teacher colleges and universities

They asked macro analytic questions What are the conditions in which educational policy is successfully formulated How is this educational policy implemented What are the consequences of this policy From the start West Germany demanded a complete dismantling of the educational system in the former German Democratic Republic West German political leaders insisted as a condition of unification that all important agreements concerning education made by the GDR states be accepted by the new states The authors research shows that even before the unification East Germans had already opted for a system consistent with West German education law However the West Germans disregarded these changes and imposed their own version of reform on East Germany The study reveals that in this period of confusion the East Germans did not fully analyze the implications of the imposed conditions which now have unforeseen negative consequences The German situation is of great interest to all educators particularly students of educational policy making as well as researchers in political science economics and sociology Teacher Education in Industrialized Nations Ivan Z. Holowinsky, Nobuo K.

Shimahara, 2014-04-08 The original essays in this volume examine reform related issues in teacher education in Great Britain Canada Japan Ukraine United States and Western Europe A distinguished group of educators reviews the social context of the teacher the economics and value of teaching the pace of change government policy and teacher control of the profession and the evolving role of the teacher and education system in the face of political and social upheaval Women, Education, and Development in Asia Grace C.L. Mak, 2013-11-26 This volume of twelve original essays examines the interplay between

women s education and development and if and how it has changed women s status in selected nations in Asia Educational expansion in recent decades have benefitted women in Asia at least in quantitative terms Industrialization has also created room for increased waged employment for them However the relative openness of these systems has not been paralleled at the cultural level Women in Asia which remains largely patriarchal are thus caught in contradictions This volume examines how women use and compromise with opportunities and limits in education the role of education in their economic participation and the enhancement and tension brought to their family roles The volume is edited from a cross national perspective The chapters each covering a nation rest on a common framework Each begins with a brief historical account of education for women It then investigates the extent women have been able to take advantage of them What follows is an analysis of how women use their education in the labor market and in the family Society s definition of women s roles in the family often acts to reduce the effect of schooling on women s economic participation This interplay is further complicated by such factors as social class and or caste religion and ethnicity **Education and the Scandinavian Welfare State in the**

Year 2000 Arild Tjeldvoll, 2013-10-31 This significant contribution to comparative education presents an authoritative discussion of the recent changes in Denmark Finland Iceland Norway and Sweden The implementation of a democratic educational policy in Scandinavia has been affected by the dominance of the Protestant Church mass immigration from Third World nations a growing belief in rugged individualism newfound respect for privatization and the market economy and the

increasing unemployment of the technical revolution Education has been unable to adapt rapidly enough to meet the changing needs of this transformed Scandinavia In this comprehensive collection of articles contributors present their findings thoughts and concerns for the Scandinavia of both the 90s and the future **Education and Disability in**

Cross-Cultural Perspective Susan Jeanne Peters,2013-11-26 A radical departure from previous chronicles of education for people with disabilities this book views special education from a broader perspective Its central thesis is that cultural values and expectations play a dominant role in understanding the structure and function of special education While theories of the social construction of disability have been written about in a growing body of research since the 1960s no attempt has been made to create a cross cultural framework This work offers such a framework Eight chapters written by educators in each country s educational system cover the following nations China Great Britain Hungary Japan Iran Pakistan United States and Zimbabwe Historical discussions in each chapter provide a context for current practice An index and illustrations are also included *Qualitative Educational Research in Developing Countries* Michael Crossley,Graham Vulliamy,2013-10-15 This collection of 11 original in depth accounts of qualitative research and evaluation in developing countries argues that such innovative methods offer considerable advantages over traditional methods With examples drawn from Asia Africa the South Pacific Central America and the Caribbean each chapter focuses upon a specific method such as qualitative interviews fieldwork or document analysis and considers related theoretical and practical issues Key issues addressed include the identification of appropriate research questions access research ethics practitioner research case study evaluation North South collaboration and the potential of qualitative research for policy making and theory **Gender Issues in**

International Education Maggie Wilson,Sheena Erskine,2013-10-31 This book discusses equal opportunity for education in a global context Research findings from all over the world including Africa Asia Australia Europe and North America are presented Wilson and Erskine have compiled chapters addressing current gender issues as well as specific problems facing policy makers and professionals alike **Third World Education** Anthony R. Welch,2002-05-03 This book debunks the argument that quality in education can only be achieved by limiting or trading off equality The quality of schooling is a major issue for Third World nations across the globe However there is no single measure which is universally accepted Whether it is as some economists might argue an issue of the number of desks per classroom or one of national sovereignty is widely disputed Defining equality in education becomes increasingly difficult in an era of globalization in which there exists a wide gap between rich and poor both within and between nations In the context of an international move towards New Right politics and neo liberal economic ideologies both the quality and equality of education are imperiled This book argues that any worthy definition of quality education must include the interests and participation of the underprivileged **Three**

Decades of Peace Education around the World Robin J. Burns,Robert Aspeslagh,2014-01-14 First Published in 1996 The current world order poses new challenges to the theory and practice of peace education Drawing on data gathered from

around the world Burns and Aspeslagh focus on how peace is presented in formal and informal educational settings and what effects ideologies have in shaping that presentation The book views peace education in the context of education about other major social and political issues and in a variety of geopolitical settings exploring factors that affect the generation selection organization transmission and evaluation of knowledge for peace Following a review of major approaches to policy and praxis in peace education the editors draw on original research to offer interpretations based on pragmatic normative and conceptual approaches to the individual the state and the role of political literacy The use of a comparative educational framework that goes beyond curriculum studies and descriptive case studies presents a perspective that is innovative and timely The volume includes both bibliography and index **Quality Education for All** Dean H. Nielson, William K.

Cummings, 2014-04-08 Modern education conceived in the late 18th century and expanded in the early 19th century to promote enlightenment and social equality may finally be nearing its institutional limit Over the past decade following nearly a century of steady gains there has been little further advancement in modern education The modern system has proved effective in serving the interests of the established core of contemporary society but ineffective in reaching for the periphery The contributors to this volume offer various corrective approaches to correct this state of affairs **Educational**

Restructuring in the Context of Globalization and National Policy Holger Daun, 2002 This study posits that global change is being driven mainly by financial forces new patterns of economic growth and market ideology It then goes on to examine the forces opposing such globalizing processes such as religious and ethnic social movements throughout Africa Asia and Latin America **Social Justice and Third World Education** Timothy J. Scrase, 2014-05-01 First Published in 1997 The impact of international social change is already having a marked effect on the Third World in their internal policies budgets and development programs This collection of original articles addresses the importance of education in the creation of social and developmental policies the effect of international changes on education investment of limited resources in Third World nations the control of third world elites over education and its continuation the place of women and ethnic minorities in the educational schemes of the Third World nations examined and country regional case studies Africa India China South America Politics of Classroom Life Nobuo Shimahara, 1998 First Published in 1998 Routledge is an imprint of Taylor
