Education Of A French Model:

Chinese Education Models in a Global Age Chuing Prudence Chou,Jonathan Spangler,2016-04-06 China's rise and an increasing emphasis on international education benchmarking and a global recognition of East Asian countries' success in this regard have brought the issue of Chinese education to the forefront of public consciousness. In particular, the concept of a Chinese education model is one that has sparked debate and quickly become a major focus of education research around the world, especially in light of regional achievements vis-à-vis university rankings, bibliometric indices, the Programme for International Student Assessment (PISA), Trends in International Mathematics and Science Study (TIMSS), and other such benchmarks. *Chinese Education Models in a Global Age* tackles this controversial issue head-on by synthesizing a diversity of analyses from a world-class team of twenty-seven authors. It reveals that Chinese education models, which are present in many different geographic and institutional contexts, have an important influence on social and institutional norms as well as individual belief systems and behaviors in China and beyond. The first of its kind, this edited volume establishes a foundation for future research while providing a nuanced and tightly integrated compilation of differing perspectives on the role and impact of Chinese education models worldwide. It is essential reading for all scholars, policymakers, students, parents, and educators interested in the rising demographic and economic influence of people of Chinese descent on education around the world.

The Nordic Education Model in Context Daniel Tröhler, Bernadette Hörmann, Sverre Tveit, Inga Bostad, 2022-08-15 Tracing historical and cultural factors which gave rise to the Nordic Education Model, this volume explores why Northern European education policy has become an international benchmark for schooling. The text explains the historical connection between a Nordic ideal of democracy and schooling and indicates how values of equality, welfare, justice, and individualism might be successfully integrated in national school systems and curricula around the world. The volume also highlights recent debates around the longevity of the Nordic model and explores the risks and challenges posed by international policy and assessment agendas. Exploring how Nordic education policies successfully merge social equity with academic excellence, the book combines cultural, historical, sociological, and philosophical analysis with a deep exploration of curriculum and teaching. This book will be of great interest to researchers, scholars, and postgraduates working across the fields of curriculum, comparative education, cultural studies, and history, and philosophy of education and education policy. Algerian Languages in Education Salim Bouherar, Abderrezzaq Ghafsi, 2022-01-03 This book examines the role of foreign languages and cultures in the Algerian educational system highlighting how cultural imperialism and supremacy persist through damaging language ideologies and the privileging of colonial languages such as French and English The authors challenge the claim that the Algerian educational system can be considered neutral arguing instead that it was and still is the outcome of a conflict between Arabised and Francophone elites serving strategic and ideological objectives rather than cultural or pedagogical goals This book will be relevant to students and scholars of language education language policy and planning and the history and politics of the Arab and Muslim world especially those interested in the influence of Western languages and cultures and the democratisation of educational systems

Duke, 2009 The History of Modern Japanese Education is the first account in English of the construction of a national school system in Japan as outlined in the 1872 document the Gakusei Divided into three parts tracing decades of change the book begins by exploring the feudal background for the Gakusei during the Tokugawa era which produced the initial leaders of modern Japan Next Benjamin Duke traces the Ministry of Education's investigations of the 1870s to determine the best western model for Japan including the decision to adopt American teaching methods He then goes on to cover the eventual reverse course sparked by the Imperial Household protest that the western model overshadowed cherished Japanese traditions Ultimately the 1890 Imperial Rescript on Education integrated Confucian teachings of loyalty and filial piety with Imperial ideology laying the moral basis for a western style academic curriculum in the nation's schools

The Demands of Liberal Education Meira Levinson, 1999-09-23 What should the aims of education be in a liberal society and who should exercise control over education How can children be taught to become good citizens of a pluralistic state The Demands of Liberal Education seeks to answer these questions by drawing upon political theory philosophy of education and empirical research to develop a liberal theory of children's education that is provocative and new The book argues that contrary to the assumptions of many philosophers educators parents and politicians the liberal state is obligated as a matter of justice to help all children develop the capacity for autonomy Levinson argues that liberal governments should exercise much greater control over schools than they now do
