common to all types of comparison      Studies in Comparative Education United States. Office of Education, 1954 1955  
 Education in Viet Nam by D C Lavergne and Abul H K Sassani 1957 Supplement Higher education 1957 Guide for the  
 evaluation of academic credentials from the Latin American republics by Adela R Freeburger 1965 The development of  
 education in Nepal by Hugh Bernard Wood      *Critical Issues in South African Education* Charl C. Wolhuter, 2020-12-31 The  
 main thesis of this book is that given that South African education faces major challenges the BRICS Brazil Russia India  
 China and South Africa constellation of states offers thus far overlooked a valuable tertium comparationis a source of  
 international comparative perspectives to inform the domestic scholarly discourse on education This book first investigates  
 the national contexts and development of education in the BRICS countries arguing that this grouping represents a valuable  
 but yet overlooked field for illuminating South African education issues with international perspectives The book consists of  
 chapters arguing for and illustrating this thesis from a variety of angles Common to all chapters is that authors used the  
 comparative method in education that is comparing the national education system in their education societal context  
 interrelationships of the BRICS countries The chapters focus on a number of critical issues in South African education  
 including the language of learning and teaching issue the alignment of the world of education with the world of work early  
 childhood education and the development of world class universities Regarding the last for example China has been the  
 terrain of the most intensive national projects of establishing world class universities with Project 985 Project 211 and the  
 Double First Class University project The chapters demonstrate what South Africa in approaching her education issues can  
 learn from the experience of the BRICS countries      *Utilization, Misuse, and Development of Human Resources in the Early  
 West Indian Colonies* M.K. Bacchus, 2006-01-01 This comprehensive study of the development of education in the West Indies  
 between 1492 and 1854 examines the shifts which occurred within the nature of the education programs provided for the  
 masses Believing existing theories of educational change are too limiting Bacchus has blended detailed analysis of such  
 important factors as the changing role of the state the conflicting educational objectives among the dominant groups and  
 their differences with the missionary societies providing popular education to better understand how these changes came  
 about He attributes greater importance to the role of the masses who increasingly asserted their views about the type of  
 education they wanted for their children The book demonstrates how instructional programs developed in the West Indies  
 not as the result of a rational curriculum development process but rather through a series of compromises made to  
 accommodate the views of various influential groups Education and curriculum evolved by way of a show yet constant  
 changing dialectical process Such an insightful work will arouse the interest of scholars and students of educational  
 development particularly those studying the West Indies      **Knowledge Hierarchies in Transnational Education** Jing  
 Qi, 2015-04-24 Transnational education seeks equivalence in standards and or relevance of outcomes through the transfer of  
 Western theories concepts and methods Utilising a critique interpretative approach Jing Qi argues that equivalence

relevance oriented approaches to transnational education assume the legitimacy of the global knowledge hierarchy Euro American educational theories are imposed as defaults in non Western educational communities of imagined consensus Grounded in a study of a five year transnational teacher education and community capacity building program in Northern Chile the book investigates the relationships between theoretical knowledge knowledge hierarchies and critique Transnational education communities are recognised as sites of critiques where conflictual and conceptual dissensus disrupts global and local knowledge hierarchies Critique is deployed by educational actors in their everyday engagement in transnational education to stage dissensus which constantly re draws the lines of possibility for knowledge co construction A matrix mapping system is designed to chart and theorise the Chilean educational actors critiques along the trail of concept translation learning application and innovation of knowledge hierarchies which operate at and across global transnational local and the newly created local global levels This book examines how these critiques modulate the ascendancy of knowledge hierarchies to enfranchise non western educational actors for theoretical knowledge production that addresses local needs Knowledge Hierarchies in Transnational Education will be of key value to researchers academics and postgraduate students in the fields of international education teacher education and globalisation **Bulletin** ,1965

**Social Justice Education** Kathleen Skubikowski, Catharine Wright, Roman Graf, 2023-07-14 This book addresses the combination of pedagogical curricular and institutional commitments necessary to create and sustain diversity on campus Its premise is that the socially just classroom flourishes in the context of a socially just institution and it invites faculty and administrators to create such classrooms and institutions This book grew out of a project involving deans and directors of teaching centers and diversity offices from six institutions to instigate discussions among teachers and administrators about implementing socially just practices in their classrooms departments and offices The purpose was to explore how best to foster such conversations across departments and functions within an institution as well as between institutions This book presents the theoretical framework used and many of the successful projects to which it gave rise Recognizing that many faculty have little preparation for teaching students whose backgrounds culture and educational socialization differ from theirs the opening foundational section asks teachers to attend closely to their and their students relative power and positionality in the classroom and to the impact of the materials resources and pedagogical approaches employed Further chapters offer analytical tools to promote inquiry and change The concluding sections of the book demonstrate how intra and inter institutional collaborations inspired teachers to rise to the challenge of their campuses commitments to diversity Among the examples presented is an initiative involving the faculty development coordinator and faculty from a wide range of domains at DePauw University who built upon an existing ethics initiative to embed social justice across the curriculum In another professors of mathematics from three institutions describe how they collaborated to create socially just classrooms that both serve mathematical learning and support service learning or community based learning activities The final essay by a student from the Maldives describing how she navigated the chasm between life in an American college and her family circumstances will reinforce the reader s commitment to establishing social justice in the academy This book provides individual faculty faculty developers and diversity officers with the concepts reflective tools and collaborative models as well as a wealth of examples to confidently embark on the path to
