communities the geographies of space and place gender and ethnicity This book examines some of the causes and responses to educational inequalities and focuses upon poor urban contexts where educational disadvantage is at its most concentrated and where educational policy and practice has over time proliferated It questions how wider inequities experienced by young people in urban contexts generate educational inequalities and disadvantage detailing explicitly what an equitable approach to education might look like Included in the book is an innovative educational equity framework and toolkit with illustrative policy and practice case studies bringing together unique scholarship and analysis to examine future educational policy in a holistic comprehensive and equitable way It will be valuable reading for postgraduate students researchers and policy makers with an interest in education and educational equity Resources for Educational Equity Merle Froschl, Barbara Sprung, 2017-04-28 This title first published in 1988 provides a comprehensive compilation of resources to help teachers and policy makers locate the materials they need to create equitable curriculum and classroom environments While its primary focus is on girls and women Resources for Educational Equity takes a comprehensive approach to equity encompassing concerns of gender race and disability This title will be of interest to both students of education and to educators **Trends** in Educational Equity of Girls & Women Yupin Bae, 2000 This statistical report responds to a request by Congress for a report on educational equity for girls and women The report assembles a series of indicators that examine the extent to which males and females have access to the same educational opportunities avail themselves of these opportunities perform at the same level succeed at the same rate and obtain the same benefits Data are drawn mainly from surveys conducted by the National Center for Education Statistics The report begins with an overview that summarizes the major findings A series of 44 indicators follows beginning with preparation for school and moving through elementary and secondary education to postsecondary education with a consideration of outcomes of education Data show that in school and in college females are now doing as well or better than males on many indicators and that the large gaps in educational attainment that once existed between men and women have in most cases been eliminated and in others have significantly decreased Women continue to lag behind males in mathematics and science achievement in high school and they are less likely to major in these fields in college Women are still under represented in doctoral and first degree professional programs although they have made substantial gains in the last 25 years Contains 57 tables and 63 figures SLD **Hearing on Women's** Educational Equity Act United States.
