management has become an important academic subject. The contributors to this volume have guaranteed its survival as such by undertaking this review in order that they and others working in the field may take account of a range of agendas and initiatives. The outcome must be a fresh stance and a new sense of direction to enable a study of educational management to meet the needs of teachers and their schools in the new millennium. Educational Research: Educational Management brings together important original contributions from leading thinkers in the field. Edited by some of the key figures in educational management today, chapters examine the following key areas: Has self management achieved the success predicted for it? What should be the nature of professional development for educational leaders? To what extent can education benefit by drawing from practice in business and industry? Can theory inform management practice in education? How can research contribute to educational improvement? How can leaders help improve classroom practice? Educational Management is one of the major outcomes of the ESRC Economic and Social Research Council seminar series which aimed to redefine educational management in the light of the many developments in policy, practice, theory and research since the subject became established in the 1970s.

Educational Management: Educational leadership Harry Tomlinson, 2004 *Educational Management* Margaret Preedy, Ron Glatter, Rosalind Levačić, 1997. This new collection of readings draws together three major and interrelated priorities for the educational manager: developing and maintaining quality; using resources effectively; and establishing a strategic overview and direction for the organization. In explaining these three concerns, the book aims to help educational managers to improve their own practice by encouraging critical reflection on management processes and on how conceptual frameworks and research evidence can contribute to more effective professional performance in schools and colleges. The collection has a strongly practical flavour, focusing on frameworks, ideas and approaches that teachers can test out and develop in their own professional contexts. It includes material based on a wide range of educational settings, enabling managers to transcend sector boundaries in their thinking and to draw on insights from other sectors. This volume forms part of the Leadership and Management in Education series. This four book series provides a carefully chosen selection of high quality readings on key contemporary themes in educational management: professional development; reflection on practice; leadership; team working; effectiveness and improvement; quality; strategy and resources. The series will be an important resource for classroom teachers and lecturers as well as those holding designated management posts in schools and colleges and will provide a valuable basis for professional development programmes.
