## **Educating For Freedom The Paradox Of Pedagogy:**

Educating for Freedom Donald L. Finkel, William Ray Arney, 1995 The very notion of teaching freedom suggests a paradox Ever since Rousseau the project of liberal education has been situated in the matrix of the teacher student relationship Some theorists have even seen this relationship as erotic Part one of this book explores the educational philosophies of Rousseau Freud Paolo Freire Ivan Illich and Michel Foucault All these thinkers wrestle with the paradox How can such a mutually dependent relationship foster independence The primary vehicle necessary to a liberating education the personal relationship is also the fundamental obstacle to the achievement of genuine liberation After reaching this conclusion the authors turn away from the student teacher relationship and the paradox of pedagogy to examine another type of teaching and learning where two teachers who differ in fundamental ways engage in collegial teaching with students they have in common Collegial teaching is described in its particularity based on the authors experiences at an unusual liberal arts college The Evergreen State College They find that the changed dynamics of equality and the altered structure of authority created by collegial teaching is rewarding for both teachers and students and may be a way out of the paradox of pedagogy to intellectual freedom

American empirical methodological and theoretical contributions to knowledge making teaching and learning and American education from the nineteenth through the twenty first century the most dynamic period of African American educational thought and activism African American thought and activism regarding education burgeoned from traditional academic disciplines such as philosophy and art mathematics and the natural sciences and history and psychology from the Black church as well as from grassroot political social cultural and educational activism with the desire to assess the stake of African Americans in modernity

Educating for Democracy Alan M. Olson, David M. Steiner, Irina S. Tuuli, 2004-08-04 The central conflicts of the world today are closely related to cultural traditional and religious differences between nations As we move to a globalized world these differences often become magnified entrenched and the cause of bloody conflict Growing out of a conference of distinguished scholars from the Middle East Europe and the United States this volume is a singular contribution to mutual understanding and cooperative efforts on behalf of peace The term *paideia* drawn from Greek philosophy has to do with responsible education for citizenship as a necessary precondition for effective democracy The problems discussed here are crucial but not simple How can we find shared ethical principles on which to build international consensus How can religious tolerance make inroads in societies accustomed to restrictive fundamentalism What might bring about de dogmatization of education in the Middle East as a necessary condition for free and rational inquiry and the broader vistas required by democracy All of these issues highlight the underlying question What is education really for Finally the volume confronts the promises and perils of economic globalization Noting that one third of the world's population lives in abject poverty business has become a battlefield where ethics and trust are clearly at stake

The Afrocentric Praxis of Teaching for Freedom Joyce E. King, Ellen E.
