Education in South Asia and the Indian Ocean Islands Hema

Letchamanan, Debotri Dhar, 2017-12-14 Education in South Asia and the Indian Ocean Islands is a critical reference guide to development of education in Bangladesh Bhutan India Nepal Sri Lanka Comoros Islands Maldives Mauritius Seychelles and Zanzibar The chapters provide an overview of the education system in each country focusing particularly on contemporary education policies and some of the problems countries in this region face during the processes of development Key themes

include the practice of implementation of educational policy and the impact of global and local educational decisions on societies. Due to the demographic scale and the cultural diversity of India, the volume contains a particularly extensive coverage of the distinctive educational issues in this country. Including a comparative introduction to the issues facing education in the region as a whole, this book is an essential reference for researchers, scholars, international agencies, and policy makers.

The Delusion of Knowledge Transfer Susanne Koch, Peter Weingart, 2016-12-13. With the rise of the knowledge for development paradigm, expert advice has become a prime instrument of foreign aid. At the same time, it has been object of repeated criticism: the chronic failure of technical assistance, a notion under which advice is commonly subsumed, has been documented in a host of studies. Nonetheless, international organisations continue to send advisors promising to increase the effectiveness of expert support if their technocratic recommendations are taken up. This book reveals fundamental problems of expert advice in the context of aid that concern issues of power and legitimacy rather than merely flaws of implementation. Based on empirical evidence from South Africa and Tanzania, the authors show that aid-related advisory processes are inevitably obstructed by colliding interests, political pressures, and hierarchical relations that impede knowledge transfer and mutual learning. As a result, recipient governments find themselves caught in a perpetual cycle of dependency, continuously advised by experts who convey the shifting paradigms and agendas of their respective donor governments. For young democracies, the persistent presence of external actors is hazardous; ultimately, it poses a threat to the legitimacy of their governments if their policy making becomes more responsive to foreign demands than to the preferences and needs of their citizens.

The Value of TVET in Advancing Human Development and Reducing Inequalities Randa Hilal, 2022-04-25. This book examines the contribution of Vocational Education and Training to advancing human development and reducing inequality. It uses the example of Palestine as a case study, rich in multi-layered inequalities, some of which are experienced in the region and worldwide, while others are specific to adverse conditions. The case of Palestine provides fertile ground for understanding inequality and human development and for echoing the developed knowledge through to the understanding of Vocational Education and Training and Human Development globally. The book brings original theoretical approaches, evidence of the value of Vocational Education and Training, and contributes to academic debates as well as provides empirical evidence for practitioners and donor community.

Skills for Human Development Lesley Joy Powell, Simon McGrath, 2019-03-15 Focusing on reimagining the purpose of vocational education and training VET and grounded in the reality of a small cohort of young South Africans and an institution seeking to serve them Skills for Human Development moves beyond the inadequacies of the dominant human capital orthodoxy to present a rich theoretical and practical alternative for VET Offering a human development and capability approach it brings social justice to the forefront of the discussion of VET's purpose at the national institutional and individual levels In doing so this book insists that VET should be about enlarging peoples opportunities to live a flourishing life rather than simply being about narrow employability and productivity It argues that human development approaches while acknowledging the importance of work in its broadest sense offer a better way of bringing together VET and development than the current human capital inspired orthodoxy Offering a transformative vision for skills development this book Considers the potential contribution skills development could make to broader human development as well as to economic development Points to an alternative approach to the current and flawed deficit assumptions of VET learners Presents for the first time an alternative evaluative frame for judging VET purpose and quality Presents a timely account of current vocational and education training that is high on the agenda of international policymakers Taking a broad perspective Skills for Human Development presents a comprehensive and unique framework which bridges theory policy and practice to give VET institutions a new way of thinking about their practice and VET policymakers a new way of engaging with global messages of sustainable human development It is a vital resource for those working on the human development and skills approach in multiple disciplines and offers a grounding framework for international policymakers interested in this growing area
