Discourses of Globalisation, Ideology, Education and Policy Reforms Joseph Zajda, Suzanne Majhanovich, 2022-03-28 This book presents a global overview of discourses of globalization current research in education and education policy reforms It first examines globalisation education and policy research and reforms in education including coverage of main trends in education and policy reforms globally as well as specific policy issues such as equity inclusive schooling and quality education for all Next it offers a comparative perspective in evaluating the ambivalent and problematic relationship between

globalisation ideology the state and education reforms globally One significant impact of globalization on education policy and reforms is the competitive comparison of education systems These comparisons are usually based on common achievement tests such as TIMSS PIRLS and PISA Major policy reforms are frequently justified with reference to these achievement data The book features coverage of education reforms globally and academic achievement syndrome Not only do the chapters offer a timely analysis of current issues shaping education policy research but the book also contains ideas concerning the future directions that education and policy reforms could take to offer more democratic and equitable education Respective chapters critically assess the dominant discourses and debates on education and policy reforms By doing so it provides a comprehensive view of the diverse and intersecting discourses on globalisation and policy driven reforms in education Japan's Cultural Policy Toward China, 1918-1931 See Heng Teow, 2020-03-23 Most existing scholarship on Japan's cultural policy toward modern China reflects the paradigm of cultural imperialism In contrast this study demonstrates that Japan while motivated by pragmatic interests international cultural rivalries ethnocentrism moralism and idealism was mindful of Chinese opinion and sought the cooperation of the Chinese government Japanese policy stressed cultural communication and inclusiveness rather than cultural domination and exclusiveness and was part of Japan's search for an East Asian cultural order led by Japan China however was not a passive recipient and actively sought to redirect this policy to serve its national interests and aspirations The author argues that it is time to move away from the framework of cultural imperialism toward one that recognizes the importance of cultural autonomy internationalism and transculturation

**The Cross-cultural Transfer of Educational Concepts and Practices** Masahiro Tanaka, 2005-05-16 This book analyses comparatively the creation of American and Japanese universities on the model of German universities largely in the late nineteenth century and the reform of German and Japanese universities on the model of American universities after the end of the Second World War The argument is that transferring educational concepts and practices from one cultural context to another involves not merely a transfer but a transformation How and why this transformation occurs is what this book is about More precisely it is suggested that transformation of educational concepts and practices during their cross cultural movement can be understood within a theoretical perspective that is proposed and developed in the book This book is divided into six chapters Chapter One as the introduction analyses several scholars approaches to the aspects of educational transfer then attempts to construct a theoretical perspective for the book on the processes of change in educational concepts and practices during their movement across cultures Chapters Two and Three offer two narratives to investigate how German university concepts and practices were transmuted as a consequence of local actors efforts to import these concepts and practices into Japan and the United States Chapters Four and Five provide another two narratives to examine how American university concepts and practices were altered as a result of American actors attempts to export these concepts and practices to Japan and Germany Chapter Six as the conclusion through reflecting on the four narratives given in the main chapters re

examines the ways in which the theoretical perspective of this book is useful to understand the processes of transformation of educational concepts and practices during their movement from one culture to another

**'Benefits Bestowed'?** J. A. Mangan, 1988 The study of the European Union has historically been a theoretical battleground Since the 1990s new theoretical directions such as neo institutionalism multi level governance and constructivism have provided a new impetus However despite these new inroads empirical work has often remained sociologically and empirically underspecified This volume seeks to bridge the gap between theory and fieldwork by developing an actor centred political sociology In doing so the volume engages in a critical dialogue with the constructivist framework and proposes to build on its insights through a sociological hardening centred on European actors The renewal of European studies through political sociology is only useful if it generates new understandings through empirical observation This volume seeks to take a new tack on constructivism by asking what it is that Europe constructs by looking at three areas social spaces and professions policy problems and policies and policy instruments such as the Eurobarometer
