Education For Action 4e:

Educational Curricula Jennifer N. Casey, 2008 In formal education a curriculum plural curricula is the set of courses and their content offered at a school or university As an idea curriculum stems from the Latin word for race course referring to the course of deeds and experiences through which children grow and mature in becoming adults Crucial to the curriculum is the definition of the course objectives that usually are expressed as learning outcomes and normally include the program s assessment strategy These outcomes and assessments are grouped as units or modules and therefore the curriculum comprises a collection of such units each in turn comprising a specialised specific part of the curriculum So a typical curriculum includes communications numeracy information technology and social skills units with specific specialised teaching of each This book presents research on educational curricula from around the world The Wiley Handbook of Action Research in Education Craig A. Mertler, 2019-02-06 Comprehensive overview of the theoretical conceptual and applied practical presentations of action research as it is found and conducted solely in educational settings The Wiley Handbook of Action Research in Education is the first book to offer theoretical conceptual and applied practical presentations of action research as it is found and conducted solely in educational settings Covering primarily PK 12 educational settings the book utilizes a cross section of international authors and presentations to provide global perspectives on action research in education Part I of The Wiley Handbook of Action Research in Education focuses on various foundational aspects and issues related to action research Part II is centered on chapters that present theories and principles that help to guide the use of action research in educational contexts Part III focuses on specific applications of educational action research in practice Part IV provides an outlet for seven educational practitioners to share their experiences in conducting action research Each of these authors also discusses the importance and value that action research has had on him or her both professionally and personally Discuss action research in PK 12 as well as in higher education settings The first book to focus on the importance and application of action research exclusively in educational settings Offers world perspectives on action research in education Written by a team of international scholars The Wiley Handbook of Action Research in Education is an excellent book for advanced undergraduate students graduate students and scholars studying and or researching educational action research **Fanon, Education, Action** Erica Burman, 2018-07-23 Bridging childhood studies pedagogy and educational theory critical psychology and postcolonial studies this unique book reads the role and functions of the child and childhood as both cultural motif and as embodied life condition through the work of Frantz Fanon Based on innovative readings of Fanon and postcolonial cultural studies the book offers new insights for critical pedagogical and transformative practice in forging crucial links not only between the political and the psychological but between distress therapy and personal and political learning and transformation Structured around four indicative and distinct forms of child read from Fanon s texts Idiotic Traumatogenic Therapeutic Extemic the author discusses both educational and therapeutic practices The pedagogical links

the political with the personal and Fanon's revolutionary psychoaffective account offers vital resources to inform these. Finally the book presents child as method as a new analytical approach by which to read the geopolitical which shows childhood education and critical psychological studies to be key to these at the level of theory method and practice. By interrogating contemporary modalities of childhood as modern economic and political tropes the author offers conceptual and methodological resources for practically engaging with and transforming these. This book will be vital and fascinating reading for students and scholars in psychology psychoanalysis education and childhood studies gender studies postcolonial studies and mental health.

Creating Holistic Technology- Enhanced Learning Experiences Lee Yong TAY, Cher Ping LIM, 2013-02-11. Creating Holistic Technology Enhanced Learning Experiences. Tales of a Future School in Singapore. Editors Lee Yong TAY and at the same time to live together in an increasingly diverse and complex society and to reflect on and interpret fast changing information. In such a new world order the holistic development of our students namely in the cognitive aesthetics physical social and moral leadership and global domains is pivotal. This edited book provides descriptive and interpretive accounts of how an elementary school in the Future Schools Singapore programme creates holistic technology enhanced learning experiences for its students at the classroom and school levels. By documenting these accounts and linking them to student learning outcomes the school will lead the way in providing possible models for the seamless and pervasive integration of information and communication technologies ICT into the curriculum for the holistic development of our students.

Values and Virtues in Higher Education Research. Jean McNiff, 2016-06-10. Values and Virtues in Higher Education Research centres on practitioners studying and researching their practices in higher education settings in order to improve those practices for the benefit of others and themselves. Making research public is a key aspect of ensuring the quality of educational research and educational practices. Values and Virtues in Higher Education Research raises questions and develops conversations about why higher education practitioners should study and improve their work how this may be done and what might be some of the benefits of doing so. What we do as practitioners is influenced by and linked with what we value what we believe is good. Improving practices therefore involves becoming aware of and interrogating the values that enter into and inform those practices a study of practices becomes a study of the relationships between the practices in question and their values base. From an international group of contributors in this growing field this book provides strong theoretical resources and case study material that shows how this transformation may be achieved including topics such as Theorising practices to show personal and organisational accountability. Developing inter professional and inter disciplinary dialogues for social transformation. Establishing communities of inquiry in higher education and other workplace settings. Reconceptualising professional education as research informed practice. Locating educational theory in the real world for human and environmental wellbeing. Showing the evolution of theory through critical engagement this text will be a valuable companion for lecturers students and professional developers in higher education. This book will form core reading for those

who are interested in engaging in practice based research and as additional reading for those whose aim is to broaden their thinking in relation to the role of values and virtues in educational research Jean McNiff is an independent researcher and writer Professor of Educational Research at York St John University and Visiting Professor at Oslo and Akershus University College Beijing Normal University and Ningxia Teachers University She is also the author of key texts *Action Research Principles and Practice* You and Your Action Research Project and Writing Up Your Action Research Project
