Gijssels, Richard G. Milter, 2012-03-19 Core concepts in education are changing For example professional performance or expertise is not uniquely the fruit of specialist knowledge acquired at professional schools but the sum of influences exerted by a complex web of continuous learning opportunities for which an individual is well or ill prepared by their schools and their workplace The key contributory factors to professional expertise are how professional

schools connect to professional practice how schools prepare graduates for continuous learning and how the workplace endorses continuous development Thus the question this volume addresses how to design learning and working environments that facilitate the integration of these three elements is at the heart of contemporary pedagogical theory The authors also ask a second vital question how do we educate learners that go on to maximize their life s learning opportunities by regulating their own ongoing learning Learning at the Crossroads of Theory and Practice argues that with the theory of learning at a crossroads this is an unprecedented opportunity for learning about learning The book sheds light on different elements of this challenge integrating theory and practice in business education generating and fully exploiting workplace learning opportunities and enriching our classrooms by coupling theoretical knowledge with the richness of real life experience *Increasing Student Engagement and Retention in E-Learning Environments* Charles Wankel, Patrick Blessinger, 2013-04-02 Web 2 0 and blended learning technologies are reshaping and reframing the practice of teaching and learning in higher education This volume critically examines new research on how e learning technologies are being used in higher education to increase learner engagement and retention *Technological Developments in Education and Automation* Magued Iskander, Vikram Kapila, Mohammad A. Karim, 2010-01-30 Technological Developments in Education and Automation includes set of rigorously reviewed world class manuscripts dealing with the increasing role of technology in daily lives including education and industrial automation Technological Developments in Education and Automation contains papers presented at the International Conference on Industrial Electronics Technology Automation and the International Conference on Engineering Education Instructional Technology Assessment and E learning which were part of the International Joint Conferences on Computer Information and Systems Sciences and Engineering *Culture & Context in Human Behavior Change* Lois Yamauchi, 2005 This book provides an interdisciplinary perspective on theory research and applications in human behavior change Chapters from clinical developmental and community psychology and education are united by common principles and an emphasis on culture and context The contributions of Roland Tharp to each of these fields are highlighted The roles of parents teachers peers families schools and neighborhoods are explored Topics include behavior therapy child development and culture community programs delinquency prevention youth mentoring instructional conversation school reform teacher professional development and culturally relevant instruction For each topic new research challenges are identified This volume is recommended for a variety of courses in psychology and education **Proceedings of the 8th International Research Conference on Economic and Business (IRCEB 2024)** Dediek Tri Kurniawan, Dede Rusmana, 2025-06-27 This is an open access book This conference is one of our special annual events International Research Conference on Economics and Business is the premier forum for the international presentation of new advances and innovation research results in the fields of theoretical experimental and applied Business Economics and Education Research The conference will bring together leading researchers and scientists in the domain of interest from around the world
