Ecology And Religion:

Ecology and Religion John Grim, Mary Evelyn Tucker, 2014-01-02 From the Psalms in the Bible to the sacred rivers in Hinduism the natural world has been integral to the world's religions John Grim and Mary Evelyn Tucker contend that today's growing environmental challenges make the relationship ever more vital This primer explores the history of religious traditions and the environment illustrating how religious teachings and practices both promoted and at times subverted sustainability Subsequent chapters examine the emergence of religious ecology as views of nature changed in religious traditions and the ecological sciences Yet the authors argue that religion and ecology are not the province of institutions or disciplines alone They describe four fundamental aspects of religious life orienting grounding nurturing and transforming Readers then see how these phenomena are experienced in a Native American religion Orthodox Christianity Confucianism and Hinduism Ultimately Grim and Tucker argue that the engagement of religious communities is necessary if humanity is to sustain itself and the planet Students of environmental ethics theology and ecology world religions and environmental studies will receive a solid grounding in the burgeoning field of religious ecology

Gottlieb,2006-11-09 The last two decades have seen the emergence of a new field of academic study that examines the interaction between religion and ecology Theologians from every religious tradition have confronted world religions past attitudes towards nature and acknowledged their own faiths complicity in the environmental crisis Out of this confrontation have been born vital new theologies based in the recovery of marginalized elements of tradition profound criticisms of the past and ecologically oriented visions of God the Sacred the Earth and human beings The proposed handbook will serve as the definitive overview of these exciting new developments Divided into three main sections the books essays will reflect the three dominant dimensions of the field Part one will explore traditional religious concepts of and attitudes towards nature and how these have been changed by the environmental crisis Part II looks at larger conceptual issues that transcend individual traditions Part III will examine religious participation in environmental politics Religion and Ecology Whitney A.
