Spies,2018-03-21 Is large scale immigration to Europe incompatible with the continent's generous and encompassing welfare states Are Europeans willing to share welfare benefits with ethnically different and often less well off immigrants Or do they regard the newcomers as undeserving and their claim for welfare rights as unjustified These questions are at the heart of what has to become known as the New Progressive Dilemma debate and the predominant answers given to them are rather pessimistic Pointing to the experiences of the US where a multi racial society in combination with a longstanding history of immigration encounters very limited welfare provision many Europeans fear that the continent's new immigrant based heterogeneity may push it toward more American levels of redistribution But are the conflictual US experiences really resembled in the European context *Immigration and Welfare State Retrenchment* addresses this question by connecting the New Progressive Dilemma debate with comparative welfare state and party research in order to analyse the role ethnic diversity plays for welfare reforms in the US and Europe Whereas the combination of racial patterns and party politics had and still has serious consequences for the US welfare system the general message of the book is that these are not resembled in the Western European context While many Europeans are very critical of immigration and willing to ban immigrants from welfare benefits both the institutional design of European welfare programs and the economically divided anti immigrant movement prevent immigration concerns from translating into actual retrenchment in the core areas of welfare **Labour**

Immigration in Southern Europe Cristobal Mendoza, 2018-05-08 This title was first published in 2003 Research on migration into southern Europe has paid little consideration to the ways of incorporating immigrants into labour markets and the impact these foreign born workers have on local labour markets Neither has much attention been given to the character of labour markets that enables these workers to find a job This book fills that gap by exploring case studies of African employment in Spain and Portugal Using cross border perspectives this book provides in depth analysis of common trends across borders such as immigrant employment in manual low skilled jobs uneven immigrant involvement in labour markets and the impact of national characteristics economies and political environments The result is a study which should be useful for migration specialists economic geographers and labour market analysts alike Immigrant Integration in Europe Angela Paparusso, 2021-08-08 This topical book sheds light on immigrants subjective well being by analysing the main factors associated with self reported life satisfaction among immigrants and natives It thereby draws upon subjective components of well being which are now receiving growing attention in well being research It also fills in a gap in migration research which has not yet focused on the study of immigrants well being Starting from a broader focus on Europe the book then looks more closely at Italy This is a key country in the immigration policy field in Europe but where the study of immigrants integration from a subjective perspective has been rarely addressed so far The book provides suggestions for constructing and implementing immigration and integration policies by not only taking into account the needs of the host societies but also the experiences opinions requirements and expectations of immigrants This book is very useful for academic and policy researchers working on immigrant integration issues *Language Learning of Adult Migrants in Europe* Glenn S. Scoville, 1991 *The Migrants Table* Krishnendu Ray, 2004-09 To most of us the food that we associate with home our national and familial homes is an essential part of our cultural heritage No matter how open we become to other cuisines we regard home cooking as an intrinsic part of who we are In this book Krishnendu Ray examines the changing food habits of Bengali immigrants to the United States as they deal with the tension between their nostalgia for home and their desire to escape from its confinements As Ray says This is a story about rice and water and the violations of geography by history Focusing on mundane matters of immigrant life for example what to eat for breakfast in America he connects food choices to issues of globalization and modernization By showing how Bengali immigrants decide what defines their ethnic cuisine and differentiates it from American food he reminds us that such boundaries are uncertain for all newcomers By drawing on literary sources family menus and recipes for traditional dishes

The Influence of Small States on Superpowers Richard L. Bernal, 2015-07-22 The conventional wisdom is that small developing countries exert limited if any influence on the foreign policy of superpowers in particular the United States This book challenges that premise based on the experience of the small developing country of Jamaica and its relations with the United States It raises the question if the foreign policy of the United States can be influenced by even a small developing country should Washington be worried

Border Jumping and Migration Control in Southern Africa Francis Musoni, 2020-04-07 With the end of apartheid rule in South Africa and the ongoing economic crisis in Zimbabwe the border between these Southern African countries has become one of the busiest inland ports of entry in the world As border crossers wait for clearance crime violence and illegal entries have become rampant Francis Musoni observes that border jumping has become a way of life for many of those who live on both sides of the Limpopo River and he explores the reasons for this including searches for better paying jobs and access to food and clothing at affordable prices Musoni sets these actions into a framework of illegality He considers how countries have failed to secure their borders why passports are denied to travelers and how border jumping has become a phenomenon with a long history especially in Africa Musoni emphasizes cross border travelers active participation in the making of this history and how clandestine mobility has presented opportunity and creative possibilities for those who are willing to take the risk

Immigration and Regional Integration in a Globalizing World Christopher C. White, 2015-10-08 In Immigration and Regional Integration in a Globalizing World Christopher White makes an important contribution to the immigration debate by investigating the relationship between two of the most important forces shaping the current international system international migration and regional integration The ability to manage the movement of people across national borders is considered one of the primary responsibilities of the nation state but international migration always involves more than one country The world has become increasingly globalized and international migration has followed suit The vast majority of states have come to realize that successful and effective migration policies involve cooperation and coordination with other states sometimes by choice and sometimes by necessity However these efforts both regionally and globally are often highly contentious and result in conflict internally and externally Managing migration and integration are key concerns for governments in nearly every region of the world and will take on even greater importance as globalization and technological advances shrink distances and bring us closer together White uses an evidence based approach to understanding immigration and economic integration to debunk the migration myth that sees a strong connection between these two factors Contrary to prevailing assumptions the main argument is that there is no substantial relationship between the international

migration and regional integration despite the political rhetoric that generates enormous fear and anxiety surrounding these issues Instead of conflating them countries can consider the benefits of integration policies without worrying about migration and can consider migration policies without concern for integration This book is for anyone concerned about the issue of immigration and its relationship to trade liberalization and regional integration From Migrants to Refugees Jill Rosenthal,2023-10-06 In From Migrants to Refugees Jill Rosenthal tells the history of how Rwandan migrants in a Tanzanian border district became considered either citizens or refugees as nation state boundaries solidified in the wake of decolonization Outlining the process by which people who have long lived and circulated across the Rwanda Tanzania border came to have a national identity Rosenthal reveals humanitarian aid s central role in the ideological processes of decolonization and nation building From precolonial histories to the first Rwandan refugee camps during decolonization in the 1960s to the massive refugee camps in the 1990s Rosenthal highlights the way that this area became a testing ground for novel forms of transnational aid to refugees that had global implications As local and national actors refugees and international officials all attempted to control the lives and futures of refugee groups they contested the authority of the nation state and the international refugee regime This history Rosenthal demonstrates illuminates how tensions between state and international actors divided people who share a common history culture and language across national borders
