**Economic Reform and Social Change in China** Andrew Watson,1992 China s reforms are being hailed as a model of how to transform a centrally planned economy This book shows that reform is not a uniform process and has affected major groups in Chinese society in different ways An Essay on Economic Reforms and Social Change in China Assar Lindbeck,2006 Abstract The author applies a systems oriented holistic approach to China s radical economic reforms during the past quarter of a century He characterizes China s economic reforms in terms of a multidimensional classification of economic systems When looking at the economic consequences of China s change of economic system he deals with both the impressive growth performance and its economic costs The author also studies the consequences of the economic reforms for the previous social arrangements in the country which were tied to individual work units agriculture communes collective firms and state owned enterprises He continues with the social development during the reform period reflecting a complex mix of social advances mainly in terms of poverty reduction and regresses for large population groups in terms of income security and human services such as education and in particular health care Next the author discusses China s future policy options in the social field whereby he draws heavily on relevant experiences in industrial countries over the years The future options are classified into three broad categories policies influencing the level and distribution of factor income income transfers including social insurance and the provision of human services

**Economic Reform and Social Change in China** Andrew Watson,2012-12-06 Economic growth in China has transformed both politics and society Old orthodoxies are painfully being eroded in the drive for reform while new social and cultural tensions are coming to light It has been argued that the cycles of reform and retreat since 1978 which culminated in the Tiananmen Square tragedy were induced by the tensions of the reform process It is clear that the way in which China handles these issues in the future will have major implications for the next phase of the country s development The authors of this book analyse how reform has affected major groups in society such as urban workers rural and urban cadres the army intellectuals and private entrepreneurs They examine the interaction between old attitudes and new needs in such areas as education policing and social control rural administration and the status of women What emerges is a broad insight into China s reform process which looks both at the enormous changes that have come about and at the problems to follow An Essay on Economic Reforms and Social Change in China Assar Lindbeck,2016 The author applies a systems oriented holistic approach to China s radical economic reforms during the past quarter of a century He characterizes China s economic reforms in terms of a multidimensional classification of economic systems When looking at the economic consequences of China s change of economic system he deals with both the impressive growth performance and its economic costs The author also studies the consequences of the economic reforms for the previous social arrangements in the country which were tied to individual work units agriculture communes collective firms and state owned enterprises He continues with the social development during the reform period

reflecting a complex mix of social advances mainly in terms of poverty reduction and regresses for large population groups in terms of income security and human services such as education and in particular health care Next the author discusses China s future policy options in the social field whereby he draws heavily on relevant experiences in industrial countries over the years The future options are classified into three broad categories policies influencing the level and distribution of factor income income transfers including social insurance and the provision of human services

Postiglione,2015-01-28 Market reform financial decentralization and economic globalization have greatly accentuated China s social and regional inequalities Education is expected to address these inequalities in a context of rapid social change including the rise of an urban middle class changed status of women resurgence of ethnic identities growing rural to urban migration and lingering poverty in remote areas But some argue that state policies have not sufficiently addressed inequitable practices and that schools actually perpetuate and reproduce inequities giving rise to a new system of social stratification driven more by market forces than socialist principles Featuring all original previously unpublished material this volume examines this argument through analysis of selected aspects of educational stratification in China during the reform era Chapters focus on the new urban middle class poor rural residents the migrant population in urban areas rural girls and ethnic minorities The contributors are established scholars in the field and they build a conceptual framework for assessing the degree to which China s educational reforms are inclusive equitable and integrative across social categories and groups **China and Globalization** Doug Guthrie,2012-06-14 Choice Outstanding Academic Title 2009 In its quarter century long shift from communism to capitalism China has transformed itself from a desperately poor nation into a country with one of the fastest growing and largest economies in the world Doug Guthrie examines the reforms driving the economic genesis in this compact and highly readable introduction to contemporary China He highlights the social cultural and

So, William S. Tay, 2012 Preface William S Tay and Alvin Y So 1 Development model Alvin Y So 2 Politics Kam Yee Law 3 Social change Xiaogang Wu 4 Law Bin Liang 5 Population Zhongdong Ma 6 Ethnicity Barry Sautman 7 Foreign policy Simon Shen 8 Environment Yok shiu Lee Carlos Wing hung Lo and Anna Ka Yin Lee 9 Urbanization Fulong Wu 10 Higher education Ka ho Mok and Li Wang 11 Religion David A Palmer 12 Literature Ling tun Ngai 13 Cinema Rui Zhang 14 Consumption and leisure Kevin Latham 15 Internet and civil society Guobin Yang *The China Wave* Wei-Wei Zhang, 2012 This Chinese best seller is a geopolitical book for our times It provides an original comprehensive engrossing study on the rise of China its effective yet controversial model of development has become a centrepiece of an unfolding debate within China on the nature future of the world's most populous nation its possible global impact *Social Change in Contemporary China* Wenfang Tang, Burkart Holzner, 2010-11-23 Social Change in Contemporary China offers a wide ranging examination of Chinese institutional change in areas of education religion health care economics labor family and local communities in the post Mao era Based on the pioneering work of sociologist C K Yang 1911 1999 and his institutional diffusion theory the essays analyze and develop the theory as it applies to both public and private institutions The interrelationship of these institutions composes what Yang termed the Chinese system and affects nearly every aspect of life Yang examined the influence of external factors on each institution such as the influence of

Westernization and Communism on family and the impact of industrialization on rural markets He also analyzed the impact of public opinion and past culture on institutions therein revealing the circular nature of diffusion Perhaps most significant are Yang's insights on the role of religion in Chinese society Despite the common perception that China had no religion he uncovers the influence of classical Confucianism as the basis for many ethical value systems and follows its diffusion into state and kinship systems as well as Taoism and Buddhism Writing in the early years of Communism Yang had little hard data with which to test his theories The contributors to this volume expand upon Yang's groundbreaking approach and apply the model of diffusion to a rapidly evolving contemporary China providing a window into an increasingly modern Chinese society and its institutions
