in the fields of development economics and development studies Much has happened in the developing world since the appearance of the second edition in 2002 The period has seen remarkable growth rates in countries such as China and India the accession of a number of post communist economies to the European Union financial crisis in Argentina and continuing desperate poverty in many African countries This third edition reflects these developments and includes new material on the following Cypher and Dietz s text is the development economics text par excellence as it takes a much more practical hands on view of the issues facing developing countries than its overly mathematical rivals It will appeal to all those studying this important subject area national systems of innovation including information technology in India the ongoing impact of globalization the continuing programmes of foreign aid across all developing countries Contemporary Economic Issues in Developing Countries John Baffoe-Bonnie, Mohammed Khayum, 2003-04-30 Important lessons for policy makers are provided here as contributors evaluate the effectiveness of domestic economic policies and the recommendations of international organizations such as the World Bank regarding the economic development of developing countries Challenges posed by debt problems corruption population dynamics poverty and the absence of adequate human and physical capital are highlighted Contributors cast doubts on the conclusions of the prevailing theories of economic development with patterns of economic change over the course of the 20th century Their findings point out the issue of inadequate social capability as a critical factor in understanding the lack of economic development in many developing countries They suggest that contemporary theorizing tends to pinpoint necessary but insufficient conditions for the successful implementation of development strategies in these countries
