The Economics of Business Enterprise Martin Ricketts, 2002-01-01 This is a most enlightening book written in a most accessible style with periodic in depth treatment of theoretical propositions using diagrams Students studying a variety of economics and business related courses could find this book invaluable David Gray International Journal of Entrepreneurship and Innovation One of the most exciting developments in economics in recent decades has been the emergence of a coherent framework for understanding why organisations have different structures and attributes There is no better way of learning about this fascinating literature on incomplete information and transaction costs than Martin Ricketts s accessible and authoritative book Very highly recommended J H Pencavel Stanford University US Martin Ricketts has succeeded in updating his book with the addition of a completely new section on the burning issue of privatisation policy in East and West along with a very readable exposition of the new micro foundation of property rights theory It is a brilliantly lucid introduction into modern institutional economics exemplified by the theory of the firm the best book of its kind on the market Rudolf Richter University of Saarland Germany To own or not to own To make or to buy To franchise or to manage To contract long or to contract short To trust or not to trust To license or not to license These and other questions are the subject matter of this excellent introduction to the theory of economic organisation This fully updated edition of Martin Ricketts s 1987 book includes New developments in the property rights theory of the firm Further extended treatment of co operative and mutual forms of enterprise Entirely new sections on transactions cost economics and public policy New chapters on the economics of privatisation and the regulation of natural monopoly In addition transaction cost property rights and agency approaches are contrasted and Austrian and evolutionary criticisms of standard theory are explored The author applies these theories to a wide range of questions from the choice of piece rates or time rates in contracting to the debate on Anglo American versus other varieties of capitalism Public policy in the fields of regulation and privatisation is also considered using the same framework Non specialists will find this book to be an accessible introduction to the main theoretical approaches to economic organisation Students and researchers specialising in the fields of economics and business will find that this third updated edition of *The Economics of Business Enterprise* continues to provide stimulating insights suggestive of further research

Transaction Cost Economics and Beyond John Groenewegen, 1995-12-31 This book contains the papers that were presented in 1994 at the conference Transaction Cost Economics and Beyond organized by GRASP at the Tinbergen Institute in Rotterdam It is generally recognized that transaction cost economics TCE is at the heart of the new theory of the firm It is a well established research program with a well developed theoretical framework and

good results in empirical testing However critics consider the approach too limited to understand the essential characteristics of such complex organizations like firms Critics plea convincingly for the need to go beyond the original TCE framework and to develop a more pluralistic approach towards issues of economic organization The new theory of the firm can only be further developed when scholars are willing to debate the issues in an open minded academic way I thank the participants of the conference very much for putting so much effort in writing their papers and for their contribution to an open and stimulating discussion It is my wish that this book contributes to the further development of the theory of the firm and that it helps us to a better understanding of the complexities of economic organization I would like to thank the following organizations for their support the Tinbergen Institute the Vereniging Trust Fonds of the Erasmus University the Faculty of Economics of the Erasmus University and GRASP Group for Research and Advice in Strategic management and Industrial Policy
