marked as it has ever been In a landmark analysis of the current state of Britain's regional development Philip McCann utilises current statistics examines historical trends and makes pertinent international comparisons to assess the state of the nation The UK Regional National Economic Problem brings attention to the highly centralised top down governance structure that the UK deploys and demonstrates that it is less than ideally placed to rectify these inequalities The North South divide in the UK has never been greater and the rising inequalities are evident in almost all aspects of the economy including productivity incomes employment status and wealth Whilst the traditional economic dominance of London and its hinterland has continued along with relative resilience in the South West of England and Scotland in contrast the Midlands the North of England Northern Ireland and Wales lag behind by most measures of prosperity This inequality is greatly limiting national economic performance and the fact that Britain has a below average standard of living by European and OECD terms has been ignored The UK s economic and governance inequality is unlikely to be fundamentally rebalanced by the current governance and connectivity trends although this definitive study suggests that some areas of improvement are possible if they are well implemented This pivotal analysis is essential reading for postgraduate students in economics and urban studies as well as researchers and policy makers in local and central government SOCIAL AND ECONOMIC **DEVELOPMENT - Volume IV** Salustiano del Campo ,Tomoko Hamada ,Giancarlo Barbiroli,Saskia Sassen, Eleonora Barbieri-Masini, Paul Nchoji Nkwi, Owen Sichone, Abubakar Momoh, 2010-11-15 Social and Economic Development is a component of Encyclopedia of Development and Economic Sciences in the global Encyclopedia of Life Support Systems EOLSS which is an integrated compendium of twenty one Encyclopedias The Theme on Social and Economic Development provides the essential aspects and a myriad of issues of great relevance to our world such as Socioeconomic Developmental Social Work Perspectives on Contemporary Socioeconomic Development Sustainable Development of Natural Resource Capital Sustainable Development Of Human Resource Capital Intellectual And Knowledge Capital For Sustainable Development At Local National Regional And Global Levels Economic And Financial System Development Information And Knowledge Institutional And Infrastructure System Development Information And Knowledge Basic Principles Of Sustainable Development Environmental Economics And Sustainable Development Implementing Sustainable Development In A Changing World Economic Sociology Its History And Development The Socioeconomics Of Agriculture Agricultural And Rural Geography Impact Of Global Change On Agriculture Human Nutrition An Overview The Role Of Inter And Nongovernmental Organizations Nongovernmental Organizations Social And Cultural Development Of Human Resources This 8 volume set contains several chapters each of size 5000 30000 words with perspectives issues on social and Economic Development These volumes are aimed at the following five major target audiences University and College students Educators Professional practitioners Research personnel and Policy analysts managers and decision makers and NGOs Social and Economic Development is a component of Encyclopedia of Development and Economic Sciences in the global Encyclopedia of Life

for African policymakers is to ensure that urban development is orderly and that the process is inclusive and emphasizes the protection of the environment hence green growth Inner City Regeneration Robert K.
