*Flora of Barro Colorado Island* Thomas B. Croat,1978 Florenwerke Panama      **Ecology and Behaviour of North American Black Bears** Roger A. Powell,John Wayne Zimmerman,David Erran Seaman,1997 What main factors affect mammalian home range size and dynamics To what extent do constraints on home range characteristics vary between the sexes This book aims to address these issues by concentrating the authors expertise and experience in studies of home ranges in general and focusing on their studies of black bears of the Pisgah Forest North Carolina in particular The authors provide an overview of the black bears and methods for their study before discussing concepts of home range developing predictive habitat quality models addressing influences of food production on social organization and exploring the mating behaviour of male bears      **Social Behavior and Communication** P. Marler,2013-03-09 Other books in this series focus on behavior at the individual level approached from the viewpoints of biochemistry anatomy physiology and psychology In this volume we show how the functioning nervous systems of interacting individuals are coordinated with the ultimate creation of complex social structures The intricacies of an individual's nervous system have been subject to intense inquiry and research at the chemical cellular and organ levels has made remarkable progress Work at the social level has been conducted somewhat independently by way of behavioral phenomena and communicative interactions With the emergence of a large body of information from neurobiology the beginnings of an integrated approach are possible New data on social functions are presented in the chapters to follow and the forward looking reader may wish to reflect on how they clarify understanding of interactions between two or more independent nervous systems The outcome is harmonious social structure and improvement in the inclusive fitness of group living individuals We believe that there is in prospect a new way of looking at social function that will ultimately increase our understanding of the highest and most complex levels of neurobiology The modern approach to the study of social behavior involves more than the recording of interactions between animals Each individual brings to the process of social interaction the implications of its prior genetic and experiential history      ,
