Ecology: Crisis and New Vision Richard E. Sherrell, 1971 **The Rights of Nature** Roderick Frazier Nash, 1989-01-17
Charting the history of contemporary philosophical and religious beliefs regarding nature Roderick Nash focuses primarily on changing attitudes toward nature in the United States His work is the first comprehensive history of the concept that nature has rights and that American liberalism has in effect been extended to the nonhuman world A splendid book Roderick Nash has written another classic This exploration of a new dimension in environmental ethics is both illuminating and overdue Stewart Udall His account makes history come alive Sierra So smoothly written that one almost does not notice the breadth of scholarship that went into this original and important work of environmental history Philip Shabecoff New York Times Book Review Clarifying and challenging this is an essential text for deep ecologists and ecophilosophers Stephanie Mills Utne Reader *Ecology, Ethics, and the Future of Humanity* Adam Riggio, 2015-08-18 A book that combines moral and political philosophy with traditions of activism and literature in a background of scientific knowledge and interpretation to build a comprehensive picture of an ecological humanity **Christianity and Ecological Theology** E. M. Conradie, 2006-10-01
There has been a proliferation of publications in the field of Christian ecological theology over the last three decades or so These include a number of recent edited volumes each covering a range of topics and consolidating many of the emerging insights in ecological theology The call for Christian churches to respond to the environmental crisis has been reiterated numerous times in this vast corpus of literature also in South Africa *Ecology and Experience* Richard J. Borden, 2014-04-15 A philosophical and narrative memoir Ecology and Experience is a thoughtful engaging recounting of author Richard J Borden s life entwined in an overview of the intellectual and institutional history of human ecology a story of life wrapped in a life story Borden shows that attempts to bridge the mental and environmental arenas are uncertain but that rigid conventions and narrow views have their dangers too Human experience and the natural world exist on many levels and gathering from both realms gives rise to novel constellations In a blend of themes and approaches based on a lifetime of interdisciplinary inquiry the author wanders these intersections and invites us to exercise our capacities for ecological insight to deepen the experience of being alive and most of all to more fully enrich our lives Contents Foreword by Darron Collins president of the College of the Atlantic Preface Part I Transects and Plots 1 The Arc of Life 2 Ecology 3 Experience 4 Human Ecology 5 Education Part II Facets of Life 6 Time and Space 7 Death in Life 8 Personal Ecology 9 Context 10 Metaphor and Meaning Part III Wider Points of View 11 Kinds of Minds 12 Insight 13 Imagination 14 Keyholes 15 Ecology and Identity 16 The Unfinished Course Part IV Coda *Ecotheology and the Practice of Hope* Anne Marie Dalton, Henry C. Simmons, 2010-09-29 Is there any hope for a more sustainable world Can we reimagine a way of living in which the nonhuman world matters Anne Marie Dalton and Henry C Simmons claim that the ecotheology that arose during the mid twentieth century gives us reason for hope While ecotheologians acknowledge that Christianity played a significant role in

creating societies in which the nonhuman world counted for very little these thinkers have refocused religion to include the natural world To borrow philosopher Charles Taylor s concept they have created a new social imaginary reimagining a better world and a different sense of what is and what should be A new mindset is emerging inspired by ecotheological texts and evident in the many diverse movements and activities that operate as if the hope imparted by ecotheology has already been realized While making this powerful argument Dalton and Simmons also provide an essential overview of key ecotheological thinkers and texts

Wimberley, 2009-05-29 Nested Ecology provides a pragmatic and functional approach to realizing a sustainable environmental ethic Edward T Wimberley asserts that a practical ecological ethic must focus on human decision making within the context of larger social and environmental
