Ecology, 1995-06-01 *Price List and Order Form for Reading/language Arts Instructional Materials*, 1995 **El-Hi Textbooks & Serials in Print, 2005**, 2005 **El-Hi Textbooks & Serials in Print, 2003**, 2003 **Eco-Sufficiency and Global Justice** Ariel Salleh, 2009-01-20 As the twenty first century faces a crisis of democracy and sustainability this book brings women academics and alternative globalisation activists into conversation Through studies of global neoliberalism ecological debt climate change and the ongoing devaluation of reproductive and subsistence labour these uncompromising essays by women thinkers expose the limits of current scholarship in political economy ecological economics and sustainability science **El-Hi Textbooks & Serials in Print, 2000**, 2000 *Environmental Philosophy in Asian Traditions of Thought* J. Baird Callicott, James McRae, 2014-03-11 *Environmental Philosophy in Asian Traditions of Thought* provides a welcome sequel to the foundational volume in Asian environmental ethics *Nature in Asian Traditions of Thought* That volume edited by J Baird Callicott and Roger T Ames and published in 1989 inaugurated comparative environmental ethics adding Asian thought on the natural world to the developing field of environmental philosophy This new book edited by Callicott and James McRae includes some of the best articles in environmental philosophy from the perspective of Asian thought written more recently some of which appear in print for the first time Leading scholars draw from the Indian Chinese and Japanese traditions of thought to provide a normative ethical framework that can address the environmental challenges being faced in the twenty first century Hindu Buddhist Confucian and Daoist approaches are considered along with those of Zen Japanese Confucianism and the contemporary philosophy of the Kyoto School An investigation of environmental philosophy in these Asian traditions not only challenges Western assumptions but also provides an understanding of Asian philosophy religion and culture that informs contemporary environmental law and policy **Ecological Thought in German Literature and Culture** Gabriele Duerbeck, Urte Stobbe, Hubert Zapf, Evi Zemanek, 2017-10-16 The volume offers a survey of the contribution of German literature and culture to the evolution of ecological thought As the field of ecocritical theory and practice is rapidly expanding towards transnational and global dimensions it seems nevertheless necessary to consider the distinct manifestations of ecological thought in various cultures In this sense the volume demonstrates in twenty six essays from different disciplines how German literature philosophy art and science have contributed in unique ways to the emergence of ecological thought on national and transnational scale The volume maps the most important and characteristic of these developments both on a theoretical and on a textual analytical level It is structured in five parts ranging from proto ecological thought since early modern times part I to major theoretical approaches part II environmental history part III and ecocritical case studies part IV to ecological visions in different media and art forms part V The four editors have widely published and are actively involved in ecocritical literary and cultural studies The group of editors consists of two scholars of German literature and cultural studies Gabriele Duerbeck and Urte Stobbe both University of Vechta a scholar in German

and comparative literature Evi Zemanek University of Freiburg as well as a scholar of Anglo American ecoliterature and ecocriticism Hubert Zapf All of them are involved in various projects and research networks on ecology and literature The contributors of the individual chapters likewise are all experts in their respective fields ranging from German literature history environmental studies art history music and art The book is a unique and readily accessible collection of essays that is of relevance not only for a German and continental European but for a worldwide audience Sustainable Value Chain Management François Maon, Sankar Sen, 2016-04-01 The way organizations manage their value chain has changed dramatically over the past decade Today organizations take account of economic issues but they also adopt a broader perspective of their purpose including social and environmental issues Yet despite its global spread sustainable value chain management remains an uncertain and poorly defined ambition with few absolutes The social and environmental issues that organizations should address easily can be interpreted as including virtually everything Current literature on the topic seeks to understand the effects and management of initiatives dealing with diversity human rights safety philanthropy community and environment However the penetration of social and environmental considerations into value chain management is described as desire lacking reality thereby making the idea a patchy success The objective of this research anthology is to investigate different angles of sustainable value chain management The book's 27 chapters fill holes and explore new fields the chapters are organised in five sections Sustainable value chains context drivers and barriers Sustainable value chains managing activities Sustainable value chains managing networks and collaboration Sustainable value chains integrative perspectives and Sustainable value chains specific sectorial and industry perspectives *Beyond Cyberpunk* Graham J. Murphy, Sherryl Vint, 2010-06-10 This book is a collection of essays that considers the continuing cultural relevance of the cyberpunk genre into the new millennium Cyberpunk is no longer an emergent phenomenon but in our digital age of CGI driven entertainment the information economy and globalized capital we have never more been in need of a fiction capable of engaging with a world shaped by information technology The essays explore our cyberpunk realities to soberly reconsider Eighties era cyberpunk while also mapping contemporary cyberpunk The contributors seek to move beyond the narrow strictures of cyberpunk as defined in the Eighties and contribute to an ongoing discussion of how to negotiate exchanges among information technologies global capitalism and human social existence The essays offer a variety of perspectives on cyberpunk's diversity and how this sub genre remains relevant amidst its transformation from a print fiction genre into a more generalized set of cultural practices tackling the question of what it is that cyberpunk narratives continue to offer us in those intersections of literary cultural theoretical academic and technocultural environments **Pushing Past the Human in Latin American Cinema** Carolyn Fornoff, Gisela Heffes, 2021-06-01 Pushing Past the Human in Latin American Cinema brings together fourteen scholars to analyze Latin American cinema in dialogue with recent theories of posthumanism and ecocriticism Together they grapple with how Latin American filmmakers have attempted to push past the human and

destabilize the myth of anthropocentric exceptionalism that has historically been privileged by cinema and has led to the current climate crisis While some chapters question the very nature of this enterprise whether cinema should or even could actualize such a maneuver beyond the human others signal the ways in which the category of the human itself is interrogated by Latin American cinema revealed to be a fiction that excludes more than it unifies This volume explores how the moving image reinforces or contests the division between human and nonhuman and troubles the settler epistemic partition of culture and nature that is at the core of the climate crisis As the first volume to specifically address how such questions are staged by Latin American cinema this book brings together analysis of films that respond to environmental degradation as well as those that articulate a posthumanist ethos that blurs the line between species

Ecological Democracy Roy Morrison, 1995 Offering a broad based critique of industrialism Morrison explores currently emerging ecological democracies such as the Mondragon Cooperative system in Spain the Seikatsu Cooperative Clubs in Japan and Coop Atlantic in Canada He outlines a dramatic revitalized participatory democracy which includes community control of finances a social wage cooperative economies demilitarization and a solar transition and shows how to get there from here

Educating for a Culture of Social and Ecological Peace Anita L. Wenden, 2012-02-01 Acknowledging the dual notions of danger and opportunity that present themselves in contemporary social and ecological crises this book explores how both peace and environmental education can transform the way we think and what we value The book outlines the link between social violence and ecological degradation and the need to educate for the purpose of achieving social and ecological peace Specialists in peace and environmental education offer a holistic and integrated approach on educating about these problems and challenges They also provide educational strategies such as curricular frameworks and pedagogical innovations appropriate for both formal and informal settings and case studies and examples that illustrate their application

Hicks, Tribes, and Dirty Realists Robert Rebein, 2021-10-21 Robert Rebein argues that much literary fiction of the 1980s and 90s represents a triumphant if tortured return to questions about place and the individual that inspired the works of Hawthorne Melville Twain Faulkner and other giants of American literature Concentrating on the realist bent and regional orientation in contemporary fiction he discusses in detail the various names by which this fiction has been described including literary postmodernism minimalism Hick Chic Dirty Realism ecofeminism and more Rebein's clearly written nuanced interpretations of works by Raymond Carver Cormac McCarthy Don DeLillo Louise Erdrich Dorothy Allison Barbara Kingsolver E Annie Proulx Chris Offutt and others will appeal to a wide range of readers

Postcolonial Green Bonnie Roos, Alex Hunt, 2010-09-23 Postcolonial Green brings together scholarship bridging ecocriticism and postcolonialism Since its inception ecocriticism has been accused of being inattentive to the complexities that colonialism poses for ideas of nature and environmentalism Postcolonial discourse on the other hand has been so immersed in theoretical questions of nationalism and identity that it has been seen as ignoring environmental or ecological concerns This collection demonstrates that

ecocriticism and postcolonialism must be understood as parallel projects if not facets of the very same project a struggle for global justice and sustainability The essays in this collection span the globe and cover such issues as international environmental policy land and water rights food production poverty women s rights indigenous activism and ecotourism They consider all manner of texts from oral tradition to literary fiction to web discourse Contributors bring postcolonial theory to literary traditions such as that of the United States not typically seen in this light and conversely bring ecocriticism to literary traditions such as those of India and China that have seen little ecological analysis Postcolonial Green boasts a global geographical breadth diversity of critical approach and increasing relevance to the issues we face on a world stage Contributors Neel Ahuja University of North Carolina Chapel Hill Pavel Cenkl Sterling College Sharae Deckard University College Dublin Ursula K Heise Stanford University Jonathan Highfield Rhode Island School of Design Alex Hunt West Texas A M University Upamanyu Pablo Mukherjee Warwick University Patrick D Murphy University of Central Florida Bonnie Roos West Texas A M University Caskey Russell University of Wyoming Rachel Stein Siena College Sabine Wilke University of Washington Laura Wright Western Carolina University Sheng yen Yu National Taipei University of Technology Gang Yue University of North Carolina Chapel Hill Xiamen University

Empire and Environment Jeffrey Santa Ana, Heidi Amin-Hong, Rina Garcia Chua, Xiaojing Zhou, 2022-10-24 Empire and Environment argues that histories of imperialism colonialism militarism and global capitalism are integral to understanding environmental violence in the transpacific region The collection draws its rationale from the imbrication of imperialism and global environmental crisis but its inspiration from the ecological work of activists artists and intellectuals across the transpacific region Taking a postcolonial ecocritical approach to confronting ecological ruin in an age of ecological crises and environmental catastrophes on a global scale the collection demonstrates how Asian North American Asian diasporic and Indigenous Pacific Island cultural expressions critique a de historicized sense of place attachment and belonging In addition to its thirteen chapters from scholars who span the Pacific each part of this volume begins with a poem by Craig Santos Perez The volume also features a foreword by Macarena Gomez Barris and an afterword by Priscilla Wald

Extremism in America George Michael, 2013-12-10 The American Republic was born in revolt against the British crown and ever since political extremism has had a long tradition in the United States To some observers the continued presence of extremist groups and the escalation of their activities portends the fragmentation of the country while others believe such is the way American pluralism works The word extremism often carries negative connotations yet in 1964 Barry Goldwater famously said Extremism in the defense of liberty is no vice Extremism in America is a sweeping overview and assessment of the various brands of bigotry prejudice zealotry dogmatism and partisanship found in the United States including the extreme right the antiglobalization movement Black Nationalism Chicano separatism militant Islam Jewish extremism eco extremism the radical antiabortion movement and extremist terrorism Many of these forms of single minded

intolerance are repressed by both the state and society at large but others receive significant support from their constituencies and enjoy a level of respectability in some quarters of the mainstream The essays in this volume written by area specialists examine the relationship between these movements and the larger society dissect the arguments of contemporary American anarchist activists look at recent trends in political extremism and suggest how and why such arguments resonate with a considerable number of people

Resources in Education ,2001 On the Cognitive, Ethical, and Scientific Dimensions of Artificial Intelligence Don Berkich,Matteo Vincenzo d'Alfonso,2019-01-28 This edited volume explores the intersection between philosophy and computing It features work presented at the 2016 annual meeting of the International Association for Computing and Philosophy The 23 contributions to this volume neatly represent a cross section of 40 papers four keynote addresses and eight symposia as they cut across six distinct research agendas The volume begins with foundational studies in computation and information epistemology and philosophy of science and logic The contributions next examine research into computational aspects of cognition and philosophy of mind This leads to a look at moral dimensions of man machine interaction as well as issues of trust privacy and justice This multi disciplinary or better yet a disciplinary investigation reveals the fruitfulness of erasing distinctions among and boundaries between established academic disciplines This should come as no surprise The computational turn itself is a disciplinary and no former discipline whether scientific artistic or humanistic has remained unchanged Rigorous reflection on the nature of these changes opens the door to inquiry into the nature of the world what constitutes our knowledge of it and our understanding of our place in it These investigations are only just beginning The contributions to this volume make this clear many encourage further research and end with open questions
