## **Ecology Economics Ethics The Broken Circle:**

*Ecology, Economics, Ethics* F. Herbert Bormann, Stephen R. Kellert, Stephan R... Kellert, Professor F Herbert Bormann, 1991 In this book a distinguished group of environmental experts argues that in order to solve global environmental problems we must view them in a broad interdisciplinary perspective that recognizes the relations the interconnected circle among ecology economics and ethics Currently the circle is broken they say because environmental policy is decided on short term estimations of material return that take little account of the economic or moral burdens that will be borne by future generations if we deplete our resources now      **Creative Actualization** Hugh P. Lister,2008 Is sustainable development a workable solution for today s environmental problems Is it scientifically defensible Best known for applying ecological theory to the engineering problems of everyday life the late scholar James J Kay was a leader in the study of social and ecological complexity and the thermodynamics of ecosystems Drawing from his immensely important work as well as the research of his students and colleagues The Ecosystem Approach is a guide to the aspects of complex systems theories relevant to social ecological management Advancing a methodology that is rooted in good theory and practice this book features case studies conducted in the Arctic and Africa in Canada and Kathmandu and in the Peruvian Amazon Chesapeake Bay and Chennai India Applying a systems approach to concrete environmental issues this volume is geared toward scientists engineers and sustainable development scholars and practitioners who are attuned to the ideas of the Resilience Alliance an international group of scientists who take a more holistic view of ecology and environmental problem solving Chapters cover the origins and rebirth of the ecosystem approach in ecology the bridging of science and values the challenge of governance in complex systems systemic and participatory approaches to management and the place for cultural diversity in the quest for global sustainability      *Ecocide* Franz Broschimmer,2002-09-20 We live in an age of ecocide Changes of enormous ecological significance are occurring on our planet the ozone layer is beginning to disintegrate Since 1970 the world s forests have almost halved A quarter of the world s fish have been depleted 70% of biologists believe the world is now in the midst of the fastest mass extinction of species in the planet s 4 5 billion year history Biodiversity loss is rated as a more serious environmental problem than the depletion of the ozone layer global warming or pollution and contamination How have we

come to this and what can be done to conserve our environment for the future Ecocide examines the facts behind the figures to offer a disturbing account of the ecological impact that the human species has on the planet It shows how we are wilfully destroying our world Highlighting important countermovements who are working for ecological democracy this unique book is essential for anyone who cares about conserving our environment for the future **The Anthropocene and its Future**

Karl Bruckmeier,2024-04-30 This book analyses the complex social and ecological processes of the Great Acceleration the Great Transformation and sustainable development that shape the future of the global society in the twenty first century The first process takes place for a longer time the second over the past thirty years with attempts to build a sustainable economy and society in the global policy of sustainable development The processes and their interaction will be discussed with knowledge from inter and transdisciplinary transformation research social and political ecology and theories of modern society The guiding theoretical concepts for the social ecological transformation will be clarified the concepts of acceleration transformation and sustainable development and the societal and ecological processes they include To obtain a more detailed picture of the changes in the global social ecological system different parts of the global transformation the digital transformation the transformation of food systems and the transformation of modes of living in the social lifeworld are described to show the complex changes in the epoch of the Anthropocene more concretely The global change processes in society and nature are caused by human forces but are difficult to control through policy and governance With the interdisciplinary integration of concepts and knowledge it becomes possible to provide a more detailed picture of the difficulties to achieve a sustainable future society *Social Conflicts and Collective Identities* Patrick G. Coy,Lynne M. Woehrle,2000 Despite the ubiquity of conflict gaps remain in our knowledge of what influences its escalation and resolution How collective identity formation impacts social conflicts is taken up in this text ranging from church and community disputes to international trade disputes and wars The Human Factor in Ecological Research Carol Eckhardt,1998

*General Technical Report PNW-GTR* ,1997 **Green Justice** Thomas M Hoban,Richard O Brooks,2018-02-20 In the nine years since Green Justice first appeared the field we have come to identify as environmental law has taken a number of twists and turns few of which were foreseen by the authors or so far as they know by anyone else Although this edition attempts to account for many of these changes it continues to emphasize what we believed then and continue to believe to be paramount not only for the study of environmental law but for common law based jurisprudence in general Despite the immediacy and crush of daily events closely reasoned analyses of the difficulties and conflicts arising from environmental conflicts as embodied in major cases or key decisions such as we present here provide a stabilizing core around which the swirl of daily events takes place and against which those events must be evaluated We believed then and believe even more strongly now that this is true not only for legal specialists and scholars but for an educated populace as well Thus this casebook

**Climate Change and Arctic Sustainable Development** UNESCO,2009-01-01 The Arctic is undergoing rapid and

dramatic environmental and social transformations due to climate change This has ramifications for the entire planet as change spreads through interconnected global networks that are environmental cultural economic and political Today with the major thrust of research shifting away from deciphering causes and monitoring trends the central preoccupation of a growing circle of actors has become the exploration of strategies for responding and adapting to climate change But to understand the far reaching nature of climate change impacts and the complexities of adaptation a truly interdisciplinary approach is required Unique in the UN system UNESCO brings together the domains of natural sciences social sciences culture education and communication Given this broad mandate UNESCO favors integrated approaches for monitoring and adapting to climate change in the Arctic fostering dialogue among scientists circumpolar communities and decision makers This book brings together the knowledge concerns and visions of leading Arctic scientists in the natural and social sciences prominent Chukchi Even Inuit and Saami leaders from across the circumpolar North and international experts in education health and ethics They highlight the urgent need for a sustained interdisciplinary and multi actor approach to monitoring managing and responding to climate change in the Arctic and explore avenues by which this can be achieved Publisher s description      **Good Growing** Leslie A. Duram, 2005-01-01 Compelling portraits of organic farmers bring to life facts and figures in an extensive overview of the phenomenal growth in recent years of organic production and consumption

*Ecologies of the Heart* E. N. Anderson, 1996-03-28 There is much we can learn about conservation from native peoples says Gene Anderson While the advanced nations of the West have failed to control overfishing deforestation soil erosion pollution and a host of other environmental problems many traditional peoples manage their natural resources quite successfully And if some traditional peoples mismanage the environment the irrational value some place on rhino horn for instance has left this species endangered the fact remains that most have found ways to introduce sound ecological management into their daily lives Why have they succeeded while we have failed In *Ecologies of the Heart* Gene Anderson reveals how religion and other folk beliefs help pre industrial peoples control and protect their resources Equally important he offers much insight into why our own environmental policies have failed and what we can do to better manage our resources A cultural ecologist Gene Anderson has spent his life exploring the ways in which different groups of people manage the environment and he has lived for years in fishing communities in Hong Kong Malaysia Singapore Tahiti and British Columbia as well as in a Mayan farmtown in south Mexico where he has studied fisheries farming and forest management He has concluded that all traditional societies that have managed resources well over time have done so in part through religion by the use of emotionally powerful cultural symbols that reinforce particular resource management strategies Moreover he argues that these religious beliefs while seeming unscientific if not irrational at first glance are actually based on long observation of nature To illustrate this insight he includes many fascinating portraits of native life He offers for instance an intriguing discussion of the Chinese belief system known as Feng Shui wind and water and tells of

meeting villagers in remote areas of Hong Kong's New Territories who assert that dragons live in the mountains and that to disturb them by cutting too sharply into the rock surface would cause floods and landslides which in fact it does. He describes the Tlingit Indians of the Pacific Northwest who before they strip bark from the great cedar trees make elaborate apologies to spirits they believe live inside the trees assuring the spirits that they take only what is necessary. And we read of the Maya of southern Mexico who speak of the lords of the Forest and the Animals who punish those who take more from the land or the rivers than they need. These beliefs work in part because they are based on long observation of nature but also and equally important because they are incorporated into a larger cosmology so that people have a strong emotional investment in them. And conversely, Anderson argues that our environmental programs often fail because we have not found a way to engage our emotions in conservation practices. Folk beliefs are often dismissed as irrational superstitions. Yet as Anderson shows, these beliefs do more to protect the environment than modern science does in the West. Full of insights, *Ecologies of the Heart* mixes anthropology with ecology and psychology, traditional myth and folklore with informed discussions of conservation efforts in industrial society to reveal a strikingly new approach to our current environmental crises. **The**

**Environmental Dimensions of Islam** Mū'il Yūsuf 'Izz al-Dīn, 2000. Islamic attitudes are of increasing concern to the Western world and environmental issues claim much attention as well. Perhaps though few non-Muslims realise that there is a distinctive Islamic contribution to the environmental debate; consequently it provides a much needed Islamic input into the world-wide process of consultation on the future of the planet. Born from the 1992 Earth Summit, this book is a major account of Islam's contribution to the environmental debate. Dr Izzi Dien views the topic from historical, theological, philosophical, legal and ethical perspectives, examining such aspects as the Quranic doctrine of Creation, human responsibility and the actions of governments. His conclusions will not only be an invaluable submission to ecological groups but enlighten the general public both inside and outside the Islamic community about Muslim teaching on this area. *The Environmental Dimensions of Islam* is an important book touching on issues of community empowerment and culture. It will challenge those of all faiths and none to reconsider their attitudes towards both the Islamic and the natural world. *Saving Creation* Christopher J.

Preston, 2011-04-15. Holmes Rolston III has long been recognized as the father of environmental ethics. Internationally renowned for the synthesis he has found in evolutionary biology and Christianity, Rolston has followed an immensely interesting life course. In this compelling biography, Rolston's story is traced from childhood to the present, detailing the process by which he has come to hone his profound philosophies. Culled from countless interviews with Rolston himself along with his family and colleagues, this biography is both an engaging life story and a compendium of Rolston's thoughts on the value of nature, resource management, aesthetics, international development and the relationship of culture to nature, wilderness and natural theology. **Saving Creation** Christopher Preston, 2009-03-01.
