Galper, 2010-12-01 Reform of the United States tax system has become a central political issue Assessing Tax Reform is a concise nontechnical book to help general readers and students understand the tax reform issues Congress is now debating Henry Aaron and Harvey Galper lay out the major alternative proposals and analyze principles of taxation that can be used for judging them They explore the issues surrounding a move to a comprehensive income tax a cash flow tax and the value added tax or other consumption based taxes They show the conflicts and opportunities resulting from large current government deficits and the move for tax reform In addition to clarifying the problems that must be solved if large scale long term reform is to be achieved the authors describe alternative strategies for increasing revenues quickly They also present their own program for a fair efficient and less complex tax structure They conclude with an examination of the political pitfalls that continue to make any major improvements in the tax system hard to enact **Future Survey Annual 1985**

Michael Marien, 1987-01-01 **Anthropology, Economics, and Choice** Michael Chibnik, 2011-11-01 In the midst of global recession angry citizens and media pundits often offer simplistic theories about how bad decisions lead to crises Many economists however base their analyses on rational choice theory which assumes that decisions are made by well informed intelligent people who weigh risks costs and benefits Taking a more realistic approach the field of anthropology carefully looks at the underlying causes of choices at different times and places Using case studies of choices by farmers artisans and bureaucrats drawn from Michael Chibnik's research in Mexico Peru Belize and the United States Anthropology Economics and Choice presents a clear eyed perspective on human actions and their economic consequences Five key issues are explored in depth choices between paid and unpaid work ways people deal with risk and uncertainty how individuals decide whether to cooperate the extent to which households can be regarded as decision making units and the tragedy of the commons the theory that social chaos may result from unrestricted access to commonly owned property Both an accessible

primer and an innovative exploration of economic anthropology this interdisciplinary work brings fresh insight to a timely topic **Donkey Work** Patrick Andelic,2024-11-13 What happened to the Democratic Party after the 1960s In many political histories the McGovern defeat of 1972 announced the party's decline and the conservative movement's ascent What the conventional narrative neglects Patrick Andelic submits is the role of Congress in the party's and the nation's political fortunes In **Donkey Work** Andelic looks at Congress from 1974 to 1994 as the Democratic Party's stronghold and explores how this twenty year tenure boosted and undermined the party's response to the conservative challenge If post 1960s America belongs to the conservative movement Andelic asks how do we account for the failure of so much of the conservative agenda especially the shrinking of the federal government Examining the Democratic Party's unusual durability in Congress after 1974 **Donkey Work** disrupts the narrative of inexorable liberal decline since the 1970s and reveals the ways in which liberalism and conservatism actually developed in tandem The book traces the evolution of ideologies within the Democratic Party particularly the emergence of neoliberalism suggesting that this political philosophy was as much an anticipation of America's right turn as a reaction to it as factions vied for control of the party Congress itself both strengthened and weakened liberal resistance to the conservative movement By putting the focus on Congress and legislative politics in contrast to the presidential synthesis that dominates US political history Andelic's book offers a new deeply informed perspective on two turbulent decades of American politics a perspective that alters and expands our understanding of how we arrived at our present political moment **Stagnation and Renewal in Social Policy** Gosta

Esping-Andersen,2024-11-01 These essays analyze the ideological and historical sources of the apparent reversal of the pattern of welfare state expansion in the United States Great Britain and Western and Eastern Europe **Essays on Economic Decisions Under Uncertainty** Jacques Drèze,1990-05-25 Professor Dreze is a highly respected mathematical economist and econometrician This book brings together some of his major contributions to the economic theory of decision making under uncertainty and also several essays These include an important essay on Decision theory under moral hazard and state dependent preferences that significantly extends modern theory and which provides rigorous foundations for subsequent chapters Topics covered within the theory include decision theory market allocation and prices consumer decisions theory of the firm labour contracts and public decisions **Aggregate Economic Choice** Harland W. Carrillo,2003 Psychologists and economists often ask similar questions about human behaviour This volume brings

together contributions from leaders in both disciplines The editorial introduction discusses methodological differences between the two which have until now limited the development of mutually beneficial lines of research Psychologists have objected to what they see as an excessive formalism in economic modelling and an unrealistic degree of sophistication in the behaviour of individuals while economists criticize the absence of a general psychological framework into which most results can be fitted and the lack of welfare implications in their theories The editors encourage scholars to exploit the strengths of each discipline the ability of psychologists to understand the feelings and motivation of individuals and the experience of economists to develop normative frameworks The editors then highlight the links between the contributions by grouping them according to central themes in the study of rationality and well being 1 The causes and consequences of irrational behaviour 2 The role of anticipatory feelings and imperfect self knowledge on decision making 3 The way in which memory of past events and cost of thinking affect current decisions 4 The interaction between anticipated and remembered utility and its effects on the welfare of individuals 5 Experimental practice on how to perform controlled experiments to test hypotheses This exciting volume provides an excellent point of entry for anyone interested in the interface between economics and psychology
