Key Contested Issues in Criminology and Criminal Justice

Anthony Walsh, 2025-09-24 *Key Contested Issues in Criminology and Criminal Justice* addresses the key issues within criminology and criminal justice that are strongly contested among scholars in the field. Covering 18 different themes, the book identifies the ways in which different issues are contested and demonstrates how biopsychosocial concepts and methods can inform most of them. It is divided into four broad sections. The first section examines philosophical issues such as the value of philosophy in criminology, criminal justice, the role of ideology in our disciplines, and the issues of human nature and free will versus determinism. The second section explains the biopsychosocial perspective that provides the framework used in exploring the various issues. It explores the possibility of integrating the natural sciences with criminology, behavioral and molecular genetics, evolutionary theory, and neuroscience. It also considers issues related to child maltreatment, brain development, and the role of rationality vis-à-vis emotion in decision making. The third section examines crime causation and contains chapters on social learning versus control theories, radical critical theories, the relationship between intelligence and criminal behavior, issues of socioeconomic status, SES, poverty, and crime, and whether religion is a barrier or bridge to antisocial behavior. The final section looks at four issues in criminal justice: the police, abolition, the movement, the nature of punishment, and its justifications by the criminal justice system, and issues in sentencing and the death penalty. *Key Contested Issues in Criminology and Criminal Justice* will be of value to students and scholars in criminology and criminal justice as well as to criminal justice practitioners. , 1991 Diagnostic Dilemmas in Child and Adolescent Psychiatry Christian Perring, Lloyd Wells, 2014-03-13 Though many of the ethical issues important in adult mental health are of relevance in the child, there are a considerable number of issues special to children. Many of the dilemmas faced pertain to diagnosis, treatment, the protection of the child, as well as the child's own developing intelligence and moral judgement. In addition, there are cases where the interests of the parents may conflict with the interests of the child. For example, the interests of a mother with schizophrenia might best be served by her continuing to look after her child, but the child's interests might require that a substitute placement be found. *Diagnostic Dilemmas in Child and Adolescent Psychiatry* is the first in the IPPP series to explore this highly complex topic. It brings together a collection of clinicians and philosophers who consider a range of topics central to the diagnosis and treatment of children and adolescents affected by mental disorders. **Rutter's Child and Adolescent Psychiatry** Anita Thapar, Daniel
