

The Art of Building Economic Models

- Guiding principle of economic model building
 - Should be as simple as possible to accomplish its purpose
- Level of detail that would be just right for one purpose will usually be too much or too little for another
- Even complex models are built around a simple framework

Economic Model Building:

Economic Model Building Frank Neal, Sir Robert Minshull Shone, 1976 Textbook on the theoretics and methodology of economic model construction discusses the use of the scientific method and creative thinking in the construction of dynamic models incl Economic policy models and econometrics models etc One page bibliography *A History of Macroeconometric Model-building* Ronald G. Bodkin, Lawrence Robert Klein, Kanta Marwah, 1991 This major book presents for the first time an authoritative history of developments in macroeconometric modelling since the 1930s It focuses in particular on the construction of mathematical statistical models of entire economies estimated from national accounts and other macroeconomic data International and comparative in scope the book contains chapters prepared by specialists from the different countries concerned This landmark book is indispensable to an understanding of the history and development of large scale econometric models of modern economies *The Methodology of Economic Model Building (Routledge Revivals)* Lawrence A. Boland, 2014-05-01 The major methodological task for modern economists has been to establish the testability of models Too often however methodological assumptions can make a model virtually impossible to test even under ideal conditions yet few theorists have examined the requirements and problems of assuring testability in economics In *The Methodology of Economic Model Building* first published in 1989 Lawrence Boland presents the results of a research project that spanned more than twenty years He examines how economists have applied the philosophy of Karl Popper relating methodological debates about falsifiability to wider discussions about the truth status of models in natural and social sciences He concludes that model building in economics reflects more the methodological prescriptions of the economist Paul Samuelson than Popper's falsificationism This title will prove invaluable to both students and researchers and represents a substantial contribution to debates about the scientific status of economics *The Methodology of Economic Model Building* Lawrence A. Boland, 1991 Model building has been the backbone of modern economic theory over the last 25 years and the major methodological task for each model builder has been to establish the testability of each model developed Too often though seemingly innocent modelling assumptions can make a model virtually impossible to test even under ideal conditions yet few economic theorists have examined the methodological requirements and problems of assuring testability in economics Lawrence Boland considers how economists have applied Popper's views on the need for error detection and testability theories in science The methodological debates these theories have inspired are related to wider debates on empiricism and the truth status of models in the natural and social sciences He concludes by arguing that the practice of model building in economics reflects the methodological prescriptions of Samuelson more than the falsification theory usually attributed to Popper **Model Building in Economics** Lawrence A. Boland, 2014-09-15 Concern about the role and the limits of modeling has heightened after repeated questions were raised regarding the dependability and suitability of the models that were used in the run up to the 2008 financial crash In this book Lawrence Boland provides an overview of the

practices of and the problems faced by model builders to explain the nature of models the modeling process and the possibility for and nature of their testing In a reflective manner the author raises serious questions about the assumptions and judgments that model builders make in constructing models In making his case he examines the traditional microeconomics macroeconomics separation with regard to how theoretical models are built and used and how they interact paying particular attention to the use of equilibrium concepts in macroeconomic models and game theory and to the challenges involved in building empirical models testing models and using models to test theoretical explanations

Economic Modelling at the Bank of England G. B. Henry,2013-03-12 J S FLEMMING The Bank of England s role as a leading central bank involves both formal and informal aspects At a formal level it is an adviser to HM Government whilst at an informal level it is consulted by domestic and overseas institutions for advice on many areas of economic interest Such advice must be grounded in an understanding of the workings of the domestic and international economy a task which becomes ever more difficult with the pace of change both in the economy and in the techniques which are used by professional economists to analyse such changes The Bank s economists are encouraged to publish their research whenever circumstances permit whether in refereed journals or in other ways In particular we make it a rule that the research underlying the Bank s macroeconomic model to which outside researchers have access through the ESRC Economic and Social Research Council macromodelling bureau should be adequately explained and documented in published form This volume expands the commitment to make research which is undertaken within the Economics Division of the Bank of England widely available Included here are chapters which illustrate the breadth of interests which the Bank seeks to cover Some of the research is as would be expected directly related to the specification of the Bank s model but other aspects are also well represented **Principles of Economics, 2Nd Edition** Dwivedi D.N.,2009-11-01 Principles Of Economics Is A Comprehensive Textbook For Undergraduate And Postgraduate Students The Book Begins With A Simple Introduction To Economics As A Social Science Moves On To Basic Economic Problems Of Individuals Firms And The Society Focusin

Computational Interaction Antti Oulasvirta,Per Ola Kristensson,Xiaojun Bi,Andrew Howes,2018 This book introduces a new perspective on how to design user interfaces called Computational Interaction This new method applies principles of computational thinking abstraction automation and analysis to inform our understanding of how people interact with user interfaces

Critical Economic Methodology Lawrence Boland,2005-08-18 Lawrence Boland takes issue with both economic methodologists and practicing economists He argues that there has been too much methodology for methodology s sake and that mainstream economics might benefit by using methodology to take a critical look at economic theory
