Economic Survey Of Communist China:

An Economic Survey of Communist China Yuan-li Wu, 1956 **An Economic Survey of Communist China** Yuan-li Wu, 1956 **The Economy of Communist China, 1949-1969** Chu-yuan Cheng, 2020-08-06 Economic development in mainland China during the first two decades of Communist control provides a typical example for the difficult task to transform a vast underdeveloped agrarian economy into a modern industrial one In the first half of this period a series of massive transformations of social and economic institutions was accompanied by a drafted industrialization program the result was an impressive speed up in economic growth The second decade witnessed an economic crisis 1960-62 and a political upheaval 1966-68 These disruptions marred the economic performance over the period as a whole Consequently the long term growth rate appears to have been only moderate The Economy of Communist China reviews selected aspects of the economy After examining the development strategy it analyzes the quantitative trends and the structural changes The book goes on to analyze the key factors contributing to the earlier growth and the elements responsible for the later disruption and finally assesses the impact of the Cultural Revolution on the Chinese economy and the prospects of the current Third Five Year Plan The text includes a bibliography of selected materials on Chinese economic development **Economic Development of Communist China** Choh-Ming Li, 2023-11-15 Economic Development of Communist China An Appraisal of the First Five Years of Industrialization analyzes the rapid economic transformation in China between 1952 and 1957 under the First Five Year Plan Drawing from Chinese language sources the study focuses on the development of heavy industries like steel with production rising from 1.35 million tons in 1952 to 5.24 million tons by 1957 Soviet aid played a pivotal role contributing to the construction of 156 industrial projects including those in mining energy and machinery The overarching goal was to establish a socialist society through industrialization with heavy industry being prioritized over consumer welfare The plan set ambitious targets including surpassing the United Kingdom in steel production by 1972 though it acknowledged the secondary importance of consumer goods While the industrial progress was notable the study critiques the uneven development particularly in agriculture Despite the rapid industrial growth agricultural investment remained disproportionately low compared to the focus on industrial sectors The government's approach to socialization including collectivization and price control faced challenges in its execution Although some sectors like industry and trade were effectively socialized by 1956 agriculture and other private sectors remained slower to fully transform The study highlights the complexities of the socialist transition questioning the sustainability of such rapid industrialization and its broader economic implications It underscores the critical role of state control Soviet assistance and planned economic strategies in shaping China's industrial trajectory This title is part of UC Press's Voices Revived program which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on
