Evolution and Path Dependence in Economic Ideas Pierre Garrouste,Stavros Ioannides,European Association for Evolutionary Political Economy,2001-01-01 Since the 1980s there has been a renewed interest in attempts to introduce a sense of history into economic literature In this text the authors argue that it is not possible to explain a state of the world without first analyzing the processes that lead to that state *Competition, Diversity and Economic Performance* C. A. Tisdell,2013-02-01 Ecological and economic systems share some fundamental characteristics that Clem Tisdell has beautifully illuminated He has given us a much better handle on the roles of competition diversity evolution and sustainability in complex interdependent ecological and economic systems Our ability to build a sustainable and desirable future fundamentally depends on this integrated understanding Robert Costanza Portland State University US This thought provoking book explores the influences of market competition and diverse behaviours of economic agents on economic performance particularly dynamic economic performance Clem Tisdell illustrates within evolutionary dynamic and static contexts how diversity can improve or impede economic performance He addresses the fact the role of diversity in improving economic performance has been neglected by economic theorists by making economic diversity a focal point of economic analysis In particular special attention is given to the value of economic diversity and economic imperfections in improving the performance of economic processes in particular identified situations Limitations of using market like mechanisms for managing public bodies and business firms are discussed and the value of business cooperation economic mutualism as a means for improving economic performance is examined It is also observed that as economies develop different forms of economic competition and business cooperation evolve Challenging yet accessible this book will prove a stimulating read for academics and students in the fields of economics industrial organization and business and management

Introductions of the earlier edition as well as the comprehensive previously unpublished essay *What is Austrian Economics* and a new Introduction. The essay is a comprehensive overview of the central themes of the book from a somewhat different perspective than in the book itself. It supplements the analysis in the book. The new Introduction explains that the 2007–8 financial crisis and recent developments in behavioural economics have made the book more relevant than ever before. *Austrian Economic Re-examined* develops and systematizes the fundamental principles of the Austrian tradition to the analysis of rational expectations, business cycles, monetary theory, competition and monopoly, and capital theory. This Handbook will be an indispensable reference work for practitioners and scholars as well as for those in an enforcement environment. **Evolutionary Economics: Program and Scope** Kurt Dopfer, 2012-12-06. *Evolutionary Economics: Program and Scope* offers a fresh look at the paradigmatic foundations and basic theoretical propositions of economics. Twelve authors, each of them with his own distinct contribution to economics, make a step forward by reinterpreting major areas of micro and macroeconomics in line with modern evolutionary thinking. This volume offers a unified approach to economics that allows recent developments in various strands of Evolutionary Economics to be integrated and major positions of Neoclassical Economics to be reconsidered. The chapters on Evolutionary Macro Economics explore macro areas such as the division of labor and knowledge, technology and institutions, population thinking, meso economics, techno-economic trajectories, and industrial sectors. By telescoping structure into time, they highlight the processes of structural change and co-evolution between technologies and institutions and provide a causal explanatory core for a modern evolutionary theory of economic growth and economic development. The chapters on Evolutionary Micro Economics offer insights into the knowledge-based theories of the firm and take up the issues of cognitive and behavioral routines. The contributions explore the processes of complex human choice, creativity, and adaptation in selective and path-dependent environments. The discussions make an essential contribution to the cognitive and behavioral foundations of a modern institutional economics. **Competition Law and Economics in Australia, Volume I** Julie Clarke, Allan Fels, Brent Fisse, Deborah Healey, Mel Marquis, John Middleton, Rhonda Smith, 2025-02-27. Australian competition law the courts and tribunal and the competition system established by the Competition and Consumer Act Volume II assesses consumer protection law the digital economy enforcement remedies and sanctions and the Australian competition regime from a comparative perspective This volume alongside its companion Competition and Consumer Law Principles Enforcement and Comparative Perspectives is an authoritative treatise that will interest the broader competition law and policy community around the world Together they provide essential insights for academics researchers practitioners policymakers and regulators

Entrepreneurship and Economic Progress Randall Holcombe,2007-01-24

Entrepreneurship is the engine of economic progress but mainstream economic models of economic growth tend to leave out the entrepreneurial elements of the economy This new book from Randall Holcombe begins by identifying areas in which evolutionary and Austrian approaches differ from the academic mainstream literature on economic growth before moving on to distinguish growth from progress The author then analyzes economic models of the firm based on the idea that it is entrepreneurship that drives economic progress The book should prove to be a natural successor to recent Routledge books by Frederic Sautet and David Harper

Epistemics of Development Economics Kofi Kissi Dompere,Manzur Ejaz,1995-08-22 The effective use of development economic theories in practice is limited the authors contend by the lack of explicit criterion for judging their scientific content The directional progress of critical research and teaching is also constrained by this deficiency This study advances a meta theory designed to assist in evaluating the scientific validity of theories in economic development and how these theories can be improved to assist social practice Using this model the study then examines existing theories dividing them into explanatory and prescriptive theories The explanatory theories include the stage based theories of Marx Schumpeter and Rostow and factor based theories including capital based human capital based and technology based theories The prescriptive theories include explanatory theory based prescriptions interventionist prescriptive theories and theories of economic planning In conclusion the authors contend that modern analysis of development economics is plagued with logical ills misleading notions and a weak theoretical structure that lacks scientific appeal Most of the theories except for those of Marx and Schumpeter neglect an analysis of the mechanism of change
