Stroup, 2003 Authors James D Gwartney Richard L Stroup Russell S Sobel and David Macpherson believe that a course on principles of economics should focus on the power and relevance of the economic way of thinking It is this belief and corresponding writing approach that has made *Macroeconomics Private and Public Choice* one of South Western Thomson Learning s most solid and enduring texts Throughout this text the authors integrate applications and real world data in an effort to make the basic concepts of economics come alive for the reader *Economics* William J. Baumol, Alan S. Blinder, 2003 Ever since the First Edition *Economics Principles and Policy* was predicated on the view that practical issues and developments in the economy should influence the content of an introductory economics course This book contains its share of theoretical material But the theory is not merely an exercise in making students miserable it is driven by issues that are real and current And every discussion of theory is related to applications so as to offer students a continuing sense of the relevance of the material to reality Publisher
