Economics The Culture Of A Controversial Science:

Economics Melvin W. Reder, 1999-01-15 Since the 1930s economists have increasingly emphasized the scientific quantitative side of their field which has directed research to topics that can be elaborated through mathematical models Economist Melvin Reder argues that this ongoing historical shift has been the result of pressure from two directions from society's demand that expert advice be based on scientific findings and from economists themselves who have wanted to view their own profession as a science Economics The Culture of a Controversial Science describes the profession of economics as it has developed in response to these challenges **Economics, Culture and Development** Eiman O.

Zein-Elabdin, 2017-09-19 This book examines the treatment of culture and development in the discipline of economics thereby filling a conspicuous gap in current literature Economics has come a long way to join the cultural turn that has swept the humanities and social sciences in the last half century This volume identifies some of the issues that major philosophies of economics must address to better grasp the cultural complexity of contemporary economies This book is an extensive survey of the place of culture and development in four theoretical economic perspectives Neoclassical Marxian Institutional and Feminist Organized in nine chapters with three appendices and a compendium of over 50 interpretations of culture by economists this book covers vast grounds from classical political economy to contemporary economic thought The literatures reviewed include original and new institutionalism cultural economics postmodern Marxism economic feminism and the current culture and development discourse on subjects such as economic growth in East Asia businesswomen entrepreneurs in West Africa and comparative development in different parts of Europe Zein Elabdin carries the project further by borrowing some of the insights from postcolonial theory to call for a more profound rethinking of the place of culture and of currently devalued cultures in economic theory This book is of great interest for those who study Economic development International relations feminist economics and Economic geography The Visionary Realism of German Economics Erik S.

Reinert, 2019-02-15 The Visionary Realism of German Economics forms a collection of Erik S Reinert's essays bringing the more realistic German economic tradition into focus as an alternative to Anglo Saxon neoclassical mainstream economics Together the essays form a holistic theory explaining why economic development by its very nature is a very uneven process Herein lie the important policy implications of the volume The Oxford Handbook of Economic Geography Gordon L.

The Economics of Economists Alessandro Lanteri, Jack Vromen, 2014-06-05 The profession of academic economics has been widely criticized for being excessively dependent on technical models based on unrealistic assumptions about rationality and individual behavior and yet it remains a sparsely studied area This volume presents a series of background readings on the profession by leading scholars in the history of economic thought and economic methodology Adopting a fresh critique the contributors investigate the individual incentives prevalent in academic economics describing economists as rational actors who react to their intellectual environment and the incentives for economic research Timely topics are addressed including the financial crisis and the consequences for the discipline as well as more traditional themes such as pluralism in research academic organizations teaching methodology gender issues and professional ethics This collection will appeal to scholars working on topics related to economic methodology and the teaching of economics

Fact and Fiction in Economics Maki, 2002-12-12 There is an embarrassing polarization of opinions about the status of economics as an academic discipline as reflected in epithets such as the Dismal Science and the Queen of the Social Sciences This collection brings together some of the leading figures in the methodology and philosophy of economics to provide a thoughtful and balanced overview of the current state of debate about the nature and limits of economic knowledge Authors with partly rival and partly complementary perspectives examine how abstract models work and how they might connect with the real world they look at the special nature of the facts about the economy and they direct attention towards the academic institutions themselves and how they shape economic research These issues are thus analysed from the point of view of methodology semantics ontology rhetoric sociology and economics of science

Today Marianne A. Ferber, Julie A. Nelson, 2020-05-22 The 1993 publication of Marianne A Ferber and Julie A Nelson's Beyond Economic Man was a landmark in both feminist scholarship and the discipline of economics and it quickly became a handbook for those seeking to explore the emerging connections between the two A decade later this book looks back at the progress of feminist economics and forward to its future offering both a thorough overview of feminist economic thought and a collection of new high quality work from the field's leading scholars **The New Palgrave Dictionary of Economics**

Economics S. Charusheela, Eiman Zein-Elabdin, 2013-04-15 In the last half century economics has taken over from anthropology the role of drawing the powerful conceptual worldviews that organize knowledge and inform policy in both domestic and international contexts Until now however the colonial roots of economic theory have remained relatively unstudied This book changes that The wide array of contributions to this book draw on the rapidly growing body of postcolonial studies to critique both orthodox and heterodox economics This book addresses a large gap in postcolonial studies which lacks the type of sophisticated analysis of economic questions that it displays in its analysis of culture The intellectual and disciplinary terrain covered within this book spans economics history anthropology philosophy literary theory political science and women's studies The Other Canon of Economics, Volume 2 Erik Reinert, 2024-02-13 Other Canon

Economics Essays in the Theory and History of Uneven Economic Development brings together key essays on development economics from one of the most prolific and important development economists and historians of economic policy today Erik S Reinert argues through essays ranging from 1994 to 2020 that neo classical economics damages developing countries the theory of comparative advantage leaves out a number of factors which make economic activities qualitatively different as carriers of economic growth Based on a long intellectual tradition started by the Italian economists Giovanni Botero 1589 and Antonio Serra 1613 and later used in virtually all presently industrialised countries Reinert shows that the country which exports increasing returns goods e g high end manufacture has advantages over the country which exports diminishing returns goods e g commodities This has important implications for today s development strategies that Reinert argues should be seen as industrial strategies

Liberalism against Liberalism Javier Aranzadi, 2006-04-18 The defence of the market and economic freedom have been the main objectives of the investigations by liberal thinkers such as Milton Friedman Gary Becker F Hayek and L Von Mises Bearing in mind that the first two economists are the maximum exponents of the Chicago School and the last two of the Austrian School it is often concluded that the theories of both schools are similar This book demonstrates that in reality there is no convergence or complementariness to be found between both schools of thought The anthropological categories contributed by Mises allow us to understand all human phenomena from the view of the man who acts In this view economics is part of a philosophical system whose core is the creative capacity of people Becker s work on the other hand is concentrated on the generalization of the homo economicus as the basis for explaining all human behaviour He generalizes the maximizing principle to explain all human reality and extends the scope of the application of a so called scientific and technical view of the world In this key volume an important read for those in the fields of economic theory and political economy Javier Aranzadi argues in essence that the tradition of Hayek and Mises encourages a humanistic liberalism whereas the Chicago School proposes only a technical humanism

40 Years of Research on Rent Seeking 2 Roger D. Congleton, Arye L. Hillman, Kai A. Konrad, 2008-08-01 The last survey of the rent seeking literature took place more than a decade ago Since that time a great deal of new research has been published in a wide variety of journals covering a wide variety of topics The scope of that research is such that very few researchers will be familiar with more than a small part of contemporary research and very few libraries will be able to provide access to the full breadth of that research This two volume collection provides an extensive overview of 40 years of rent seeking research The volumes include the foundational papers many of which have not been in print for two decades

They include recent game theoretic analyses of rent seeking contests and also applications of the rent seeking concepts and methodology to economic regulation international trade policy economic history political competition and other social phenomena The new collection is more than twice as large as any previous collection and both updates and extends the earlier surveys Volume I contains previously published research on the theory of rent seeking contests which is an important strand of contemporary game theory Volume II contains previously published research that uses the theory of rent seeking to analyze a broad range of public policy and social science topics The editors spent more than a year assembling possible papers and although the selections fill two large volumes many more papers could have been included
