Ecotourism And Development:

Ecotourism and Conservation in the Americas Amanda Stronza, William H. Durham, 2008 Using several case studies regional overviews and thematic analyses this book evaluates the pros and cons of ecotourism for communities and ecosystems Focusing on the Americas it draws perspectives from private tour operators non governmental conservation and development organizations local and indigenous communities and tourism researchers Ecotourism Development in India Seema Bhatt, Syed Liyakhat, 2008 Ecotourism is a term debated upon by practitioners all over the world The initiatives carried out in the name of ecotourism have adversely affected people and the environment The indigenous and local communities have raised voices against such steps at local national and international levels However sustainable ecotourism tourism carried out within certain defined norms can lead to the development of the people Ecotourism Development in India attempts to present a comprehensive and analytical perspective on the development of ecotourism in India This book showcases the key policies and legal frameworks linked to ecotourism development at national and international levels The consequences of large scale models of ecotourism in terms of responses and impacts both negative and positive are presented through select case studies It is intended to facilitate effective formulation and implementation of conservation and development policies and practices Ecotourism Stephen Page, Ross Kingston Dowling, 2002 This title offers a synthesis of the burgeoning literature on ecotourism with a necessarily selective approach to the key debates issues and prospects for ecotourism Ecotourism, NGOs and Development Jim Butcher, 2007-03-12 This topical book examines the advocacy of tourism as sustainable development in a range of NGOs and within the general literature It offers a timely critique of key assumptions underlying ecotourism s status as sustainable development **Ecotourism** Megan Epler Wood, 2002 This publication intended as a preparatory document for the World Ecotourism Summit in Quebec 2002 reviews the current status and trends in ecotourism globally the challenges ahead and the lessons learned in over 15 years of ecotourism development involving a broad range of stakeholders The document incorporates comments and suggestions from recognized academics NGO representatives and inter governmental agencies such as WTO IUCN and UNEP It provides an overview of the history and current thinking on what constitutes ecotourism what constitutes an ecotourism experience and considers the components of successful ecotourism The author considers the roles of various stakeholders industry both in originating and destination countries NGOs communities women government development agencies and researchers The document ends with a useful list of resource documents and organizations Ecotourism Development in Costa Rica Andrew P. Miller, 2012-08-17 Ecotourism Development in Costa Rica The Search for Oro Verde by Andrew P Miller examines the use of ecotourism as a development strategy in Costa Rica and its applicability to other Central American states Ecotourism provides an important environmental check on industry giving the environment a voice by making its preservation an economic necessity due to the number of people who derive their income from it The move away from

agriculture to ecotourism is a natural fit because many of those who are engaged in agriculture have extensive knowledge of plants and animals that can be utilized by the ecotourism industry The use of ecotourism as a development strategy is distinctive For ecotourism to succeed it must preserve the natural environment but it must do so in a way that does not preclude growth in other sectors of the economy Miller shows how the successful pursuit of foreign direct investment coupled with Costa Rica's immense biodiversity and its attractiveness to tourists is key to understanding the success of the Costa Rican economy Many of the preferences that ecotourists have for a vacation destination also help create an amenable atmosphere for business These factors include political and social stability high quality of life low levels of corruption economic freedom high levels of education and a suitable infrastructure The most important part of this research is its development of strategies based upon the Costa Rican model that would be useful for other states in the region When looking at whether states can replicate the development strategy of Costa Rica environmental sustainability is an important concern Ecotourism Development in Costa Rica is an essential text for students and scholars interested in Latin American politics and history development studies and environmental sustainability Sustainable Ecotourism in Central America Andrew P. Miller, 2016-09-30 Sustainable Ecotourism in Central America Comparative Advantage in a Globalized World examines the factors necessary for Nicaragua Panama and Belize to implement an economic development model based on the growth of ecotourism and foreign direct investment In order to determine what factors are necessary to implement this model this book analyzes the state of ecotourism development in Costa Rica and the lessons that the Costa Rican case can provide for other Central American states It also assesses the effects of globalization and the increasing implementation of free market policies on the development of ecotourism The book ultimately argues that globalization and neoliberalism have made it more likely that states will be able to adopt a development model based on ecotourism and foreign direct investment due to the manner in which neoliberalism and globalization help to create ever increasing economic interconnectedness and openness While globalization has served to shrink the world and make it easier for people to travel the economic openness of neoliberalism has facilitated global flows of both tourists and international capital into every corner of the world Understanding the way globalization and neoliberalism interact with ecotourism development and foreign direct investment is the key to formulating policy recommendations for states in Central America to jumpstart their economic development **Ecotourism** Anton Krause, Erich Weir, 2009 Ecotourism can be conceptualised as a reconciliation of tourism and environmentalism The environmentalist dimension of ecotourism involves environmental education and financial support of nature conservation Extensive and intense human activity has altered the balance of ecosystems to the detriment of the natural environment The movement of people capital goods and services has caused different types of ecosystem changes including deforestation Marine ecotourism offers contemporary attractive alternatives to marine resource use within marine protected areas MPAs This book reviews our current state of knowledge on the development effects and management of ecotourism in MPAs

identifies factors affecting the appropriateness success and sustainability of ecotourism in MPAs and highlights research and practice priorities in the future Also summarised in this book are the documented impacts of recreational uses on the coastal marine environment of the Mediterranean These range from the impact of recreational boating on seagrass meadows the effects of scuba diving on hard sessile benthic invertebrates and the possible disturbance of marine mammals by whale and dolphin watching activities Other chapters in this book analyse the current state of the art of ecotourism in Cameroon an overview of present status quo of ecotourism and its educational activities with its utilisation of wild animals in Japan the effects of coastal ecotourism and water quality in the Yucatan Peninsula and the impact of tourism management on a population of infant monkeys The findings suggest that tourism leads to high levels of stress aggression and infant loss at this site Several recommendations are offered to minimise harmful effects to help ensure that natural behavioural patterns are fostered

Indigenous Ecotourism Heather Zeppel,2006-01-01 This volume reviews indigenous ecotourism as a special type of nature based tourism and examines the key principles of conservation and community benefits from indigenous owned and operated ecotourism businesses or joint ventures It compares indigenous ecotourism in developed and developing countries and provides global case studies of indigenous ecotourism projects in the Pacific Islands Africa Latin America and Southeast Asia The book analyses key factors and constraints for sustainable development of Indigenous ecotourism and explores the growing links between biodiversity conservation ecotourism and indigenous rights It will appeal to practitioners researchers and students in ecotourism and sustainable tourism indigenous studies conservation natural resource management and community development
