Partakers of the Life Divine S T Kimbrough,2016-06-24 This volume is the first attempt to explore Charles Wesley s understanding of participation in the divine nature often described by the church fathers as deification and or theosis within the full spectrum of his prose and poetical compositions and in relation to many of the church fathers While the Eastern Church has been the primary harbinger of the doctrine of deification from the patristic era to the present Charles Wesley s theology illustrates that this emphasis is by no means absent in the West Though patristic influences on Charles Wesley s thought are primarily through secondary sources such as the writings of Lancelot Andrewes and Richard Hooker as well as through the influence of his brother John this volume underscores prominent resonances with the church fathers The extent of these resonances in Charles s theology as regards participation in the divine nature is so widespread in his writings that they form the matrix of his ideas of salvation perfection and holiness all of which are intimately bound with life lived in and through the Eucharist If taken seriously Charles Wesley s ideas on participation in the divine nature will require a rethinking of the role of Wesleyan theology in spiritual formation and in ecumenical conversation
