and immortality of the mind The Politics of Immortality in Rosenzweig, Barth and Goldberg Mårten Björk, 2022-04-21 Highlighting the central importance of theological configurations of immortality and eternal life from 1914-1945 Mårten Björk explores the key writings of Franz Rosenzweig, Karl Barth and Oskar Goldberg to situate their ideas in relation to the political turmoil of the period including the rise of social Darwinism, nationalism and fascism. The conversations happening among Christian and Jewish theologians and philosophers on the nature of immortality and eternal life during the period constitute what Björk calls a politics of immortality. The speculative question of eternal life became a way to address the meaning of a good life in a period when millions of lives were lost to war camps and prisons. This book shows how theology was related to central political concepts and ideas of the era, revealing how the question of immortality pursued by Rosenzweig, Barth and Goldberg became a way to resist the reduction of life to race, blood and soil. By situating the exact political consequences of theological and metaphysical theories of immortality and eternal life, Björk's discussion of Rosenzweig, Barth and Goldberg confronts the perennial question on the relation between life and death and exposes the important connections between political theology and philosophical posthumanism.

The Age of Insight Eric Kandel, 2012-03-27 A brilliant book by Nobel Prize winner Eric R. Kandel. *The Age of Insight* takes us to Vienna 1900 where leaders in science, medicine and art began a revolution that changed forever how we think about the human mind, our conscious and unconscious thoughts and emotions, and how mind and brain relate to art. At the turn of the century, Vienna was the cultural capital of Europe. Artists and scientists met in glittering salons where they freely exchanged ideas that led to revolutionary breakthroughs in psychology, brain science, literature and art. Kandel takes us into the world of Vienna to trace in rich and rewarding detail the ideas and advances made then and their enduring influence today. The Vienna School of Medicine led the way with its realization that truth lies hidden beneath the surface. That principle infused Viennese culture and strongly influenced the other pioneers of Vienna 1900. Sigmund Freud shocked the world with his insights into how our everyday unconscious aggressive and erotic desires are repressed and disguised in symbols, dreams and behavior. Arthur Schnitzler revealed women's unconscious sexuality in his novels through his innovative use of the interior monologue. Gustav Klimt, Oscar Kokoschka and Egon Schiele created startlingly evocative and honest portraits that expressed unconscious lust, desire, anxiety and the fear of death. Kandel tells the story of how these pioneers—Freud, Schnitzler, Klimt, Kokoschka and Schiele—inspired by the Vienna School of Medicine in turn influenced the founders of the Vienna School of Art History to ask pivotal questions such as: What does the viewer bring to a work of art? How does the beholder respond to it? These questions prompted new and ongoing discoveries in psychology and brain biology, leading to revelations about how we see and perceive, how we think and feel, and how we respond to and create works of art. Kandel, one of the leading scientific thinkers of our time, places these five innovators in the context of today's cutting-edge science and gives us a new understanding of the modernist art of Klimt, Kokoschka and Schiele, as well as the school of thought of Freud and Schnitzler. Reinvigorating the intellectual enquiry that began in Vienna

Intuition of Distinctness Andrew Melnyk,2024-12-13 This book investigates in unprecedented detail what David Papineau has called the intuition of distinctness its seeming to us when we attend introspectively to a phenomenal property of a current sensation that this property couldn t literally be an electro chemical property of neural activity in a certain tiny region of our brain This book argues that the intuition of distinctness is no mere curiosity since it plausibly underlies much of the widespread feeling both inside and outside philosophy that phenomenal properties or qualia constitute an insuperable obstacle to physicalism or materialism about the mind It goes on to argue against the natural suggestion that this feeling is warranted because the intuition of distinctness somehow gives us genuine reason to reject physicalism about phenomenal properties and to adopt property dualism instead it argues that there is no plausible way in which it could The volume develops a positive view of what phenomenal properties are defending an unorthodox version of representationalism and sketching accounts of what makes our introspective knowledge of phenomenal properties special how introspection could tell us that an introspected property is physical and what the subjectivity of phenomenal properties could be The volume critically surveys previous attempts to explain consistently with physicalism how the intuition of distinctness arises in us Finally it elaborates an explanation of the intuition of distinctness **Consciousness and Second Language Learning**
