

Childs River Restoration Project

Former pond north of Carriage Shop Road (2019)

Reconstruction of the stream channel and wetland (April 2021)

The Childs River is a 2-mile long stream flowing south from Johns Pond through Mashpee and Falmouth to Waquoit Bay. The river is part of the Waquoit Bay estuary watershed and located within the U.S. Fish and Wildlife Service's Mashpee National Wildlife Refuge. For more than 150 years, the Childs River has been impacted by humans including addition of a dam for milling and upstream cranberry farming. The Childs River Restoration Project is focused on restoring a more healthy and natural system through the removal of the dam, replacement of the Carriage Shop Road culvert, reconstruction of the stream channel in the former ponds behind the dam, and reconstruction of the stream channel and wetland within the former Farley and Garner cranberry bogs. Led and managed by the Falmouth Rod & Gun Club, many project partners have helped move this project from conceptual ideas (2017) to final designs (2019), permitting (2020), and construction (2020-2021). The Childs River now enters a new phase of its evolution - recovering from centuries of impact and providing new habitat for fish and other wildlife.

This project was completed with support from the following partners:

This project was funded by the U.S. Fish and Wildlife Service and the USFWS National Coastal Wetlands Conservation Grant program, U.S. Environmental Protection Agency Southeast New England Program Watershed Grants through collaboration with Restore America's Estuaries, the Mashpee Community Preservation Committee, the Falmouth Community Preservation Committee, the Falmouth Rod and Gun Club, the Massachusetts Division of Ecological Restoration, the Massachusetts Environmental Trust (driver for a Better Environment Grants Program, the Sporting, Safety, Conservation and Education Fund (SSCEF), Trust (United) Cape Cod, the Falmouth Fund of the Cape Cod Foundation, and Ducks Unlimited.
