Authenticity in and through Teaching in Higher Education Carolin Kreber, 2013-02-11 What does it mean to be authentic Why should it matter whether or not we become more authentic How might authenticity inform and enhance the social practice of the scholarship of university teaching and by implication the learning and development of students *Authenticity in and through Teaching* introduces three distinct perspectives on authenticity the existential the critical and the communitarian and shows what moving towards greater authenticity involves for teachers and students when viewed from each of these angles In developing the notion of the scholarship of teaching as an authentic practice this book draws on several complementary ideas from social philosophy to explore the nature of this practice and the conditions under which it might qualify as authentic Other concepts guiding the analysis include virtue being communicative action power critical reflection and transformation *Authenticity in and through Teaching* also introduces a vision of the scholarship of teaching whose ultimate aim it is to serve the important interests of students These important interests it is argued are the students own striving and development towards greater authenticity Both teachers and students are thus implicated in a process of transformative learning including objective and subjective reframing redefinition and reconstruction through critical reflection and critical self reflection on assumptions It is argued that in important ways this transformative process is intimately bound up with becoming more authentic Rather than being concerned principally with rendering research evidence of what works the scholarship of teaching emerges as a social practice that is equally concerned with the questions surrounding the value desirability and emancipatory potential of what we do in teaching The scholarship of teaching therefore also engages with the bigger questions of social justice and equality in and through higher education The book combines Carolin Kreber's previous research on authenticity with earlier work on the scholarship of teaching offering a provocative fresh and timely perspective on the scholarship of university teaching and professional learning *Going Public*

David Pritchard, Kelli Pritchard, Dean Merrill, 2008-04-01 Greater is he who is in you than he who is in the world 1 John 4:4 Taking this verse at face value provides the perfect opportunity to prove it in the educational setting of our children say the authors of *Going Public* By nurturing the life and power of Christ within them students will be ready to stand against negative influences no matter the environment even bringing light to a dark place They will also benefit from many of the services that the public school system has to offer Readers of this practical guide will learn how moms and dads have a strategic role to play in the ongoing development of their school age children Discover what the Bible says about education the three most important things to teach your public school child how to shape your child through teachable moments the importance of getting involved at school and why everyone should homeschool in addition to public school **Academics**

Going Public Marybeth Gasman, 2016-07-01 *Academics Going Public* makes the case for academics to enter the public sphere and simultaneously gives them the tools to do so This important book helps faculty members who want to become more active on a national scale and would like to move beyond publication in scholarly journals and books Expert contributors explore how to have a voice about salient higher education issues and engage traditional media new medias policymakers funders and the general public Chapters offer best approaches and concrete strategies for diverse audiences helping faculty have an impact on society by becoming more publicly engaged and writing for broader audiences in more inclusive ways This critical guide also covers strategies for confronting obstacles academics might encounter along the way and presents tactics for responding to controversy and backlash *An Alternate Pragmatism for Going Public* Jim

Webber, 2018-03-15 *An Alternate Pragmatism for Going Public* interrogates composition's most prominent responses to contemporary K-16 education reform By going public teachers scholars and administrators rightfully reassert their expertise against corporate political standards and assessments like the Common Core Complete College America and the Collegiate Learning Assessment However author Jim Webber shows that composition's professional imperative for self defense only partly fulfills the broader aims of going public which include fostering public participation that can assess and potentially affirm the public good of professional judgment Drawing on the pragmatic democratic tradition Webber envisions an alternate rhetoric of professionalism one that not only reasserts compositionists' expertise but also expands opportunities for publics to authorize this expertise While this public inquiry and engagement may not safeguard professional standing against neoliberal reform it reorients composition toward an equally important goal enabling publics to gauge the adequacy of the educational standardization so often advocated by contemporary reform *An Alternate Pragmatism for Going Public* shows how public engagement can serve composition's efforts related to going public **Going Public** Arlene Stein, Jessie

Daniels, 2017-02-21 At a time when policy discussions are dominated by I feel instead of I know it is more important than ever for social scientists to make themselves heard When those who possess in depth training and expertise are excluded from public debates about pressing social issues such as climate change the prison system or healthcare vested interests can sway

public opinion in uninformed ways Yet few graduate students researchers or faculty know how to do this kind of work or feel empowered to do it While there has been an increasing call for social scientists to engage more broadly with the public concrete advice for starting the conversation has been in short supply Arlene Stein and Jessie Daniels seek to change this with *Going Public* the first guide that truly explains how to be a public scholar They offer guidance on writing beyond the academy including how to get started with op eds and articles and later how to write books that appeal to general audiences They then turn to the digital realm with strategies for successfully building an online presence cultivating an audience and navigating the unique challenges of digital world They also address some of the challenges facing those who go public including the pervasive view that anything less than scholarly writing isn't serious and the stigma that one's work might be dubbed journalistic *Going Public* shows that by connecting with experts policymakers journalists and laypeople social scientists can actually make their own work stronger And by learning to effectively add their voices to the conversation researchers can help make sure that their knowledge is truly heard above the digital din *Volumes Of Me #3 Going Public* Hod Doering, 2014-05-15 This *Volumes Of Me 3 Going Public* represents my third year of writing and saving poetry 1991 Where I wrote longer poems in my first year I began to write shorter more succinct poems this year The *Going Public* of the subtitle for this year reflects the fact that I found a public forum to share my poetry **This Little Kiddy Went to Market** Sharon Beder, Wendy Varney, Richard Gosden, 2009-05-20 This book investigates the way that corporations are strategically shaping children to be hyper consumers as well as the submissive employees and uncritical citizens of the future Sharon Beder shows how marketers and advertisers are targeting ever younger children in a relentless campaign transforming children's play into a commercial opportunity and taking advantage of childish anxieties She presents an alarming picture of how a child's social development through education health care and nutrition has become an ordered conveyor belt of consumerist conditioning Focusing on education in particular she also shows how difficult children are taught from an early age that pharmaceuticals can be used to discipline them or to make them happy **Flip the System** Jelmer Evers, René Kneyber, 2015-06-26 Education is threatened on a global scale by forces of neoliberalism through high stakes accountability privatization and a destructive language of learning In all respects a GERM Global Education Reform Movement has erupted from international benchmark rankings such as PISA TIMSS and PIRL causing inequity narrowing of the curriculum and teacher deprofessionalization on a truly global scale In this book teachers from around the world and other educational experts such as Andy Hargreaves Ann Lieberman Stephen Ball Gert Biesta Tom Bennett and many more make the case to move away from this uneducational economic approach to instead embrace a more humane more democratic approach to education This approach is called flipping the system a move that places teachers exactly where they need to be at the steering wheel of educational systems worldwide This book will appeal to teachers and other education professionals around the world **So What Makes Our Teaching Christian?** Robert W. Pazmino, 2008-09-22 This work explores a perennial

Rhetorical Education In America Cheryl Jean Glenn, 2009-03-15 A timely collection of essays by prominent scholars in the field on the past present and future of rhetoric instruction From Isocrates and Aristotle to the present rhetorical education has consistently been regarded as the linchpin of a participatory democracy a tool to foster civic action and social responsibility Yet questions of who should receive rhetorical education in what form and for what purpose continue to vex teachers and scholars The essays in this volume converge to explore the purposes problems and possibilities of rhetorical education in America on both the undergraduate and graduate levels and inside and outside the academy William Denman examines the ancient model of the citizen orator and its value to democratic life Thomas Miller argues that English departments have embraced a literary research paradigm and sacrificed the teaching of rhetorical skills for public participation Susan Kates explores how rhetoric is taught at nontraditional institutions such as Berea College in Kentucky where Appalachian dialect is espoused Nan Johnson looks outside the academy at the parlor movement among women in antebellum America Michael Halloran examines the rhetorical education provided by historical landmarks where visitors are encouraged to share a common public discourse Laura Gurak presents the challenges posed to traditional notions of literacy by the computer the promises and dangers of internet technology and the necessity of a critical cyber literacy for future rhetorical curricula Collectively the essays coalesce around timely political and cross disciplinary

issues Rhetorical Education in America serves to orient scholars and teachers in rhetoric regardless of their disciplinary home and help to set an agenda for future classroom practice and curriculum design **After the Public Turn** Frank Farmer, 2013-04-15 In *After the Public Turn* author Frank Farmer argues that counterpublics and the people who make counterpublics citizen bricoleurs deserve a more prominent role in our scholarship and in our classrooms Encouraging students to understand and consider resistant or oppositional discourse is a viable route toward mature participation as citizens in a democracy Farmer examines two very different kinds of publics cultural and disciplinary and discusses two counterpublics within those broad categories zine discourses and certain academic discourses By juxtaposing these two significantly different kinds of publics Farmer suggests that each discursive world can be seen in its own distinct way as a counterpublic an oppositional social formation that has a stake in widening or altering public life as we know it Drawing on major figures in rhetoric and cultural theory Farmer builds his argument about composition teaching and its relation to the public sphere leading to a more sophisticated understanding of public life and a deeper sense of what democratic citizenship means for our time
