Landscapes of Power Sharon Zukin, 1993-03-12 The momentous changes which are transforming American life call for a new exploration of the economic and cultural landscape In this book Sharon Zukin links our ever expanding need to consume with two fundamental shifts places of production have given way to spaces for services and paperwork and the competitive edge has moved from industrial to cultural capital From the steel mills of the Rust Belt to the sterile malls of suburbia to the gentrified urban centers of our largest cities the creative destruction of our economy a process by which a way of life is both lost and gained results in a dramatically different landscape of economic power Sharon Zukin probes the depth and diversity of this restructuring in a series of portraits of changed or changing American places Beginning at River Rouge Henry Ford s industrial complex in Dearborn Michigan and ending at Disney World Zukin demonstrates how powerful interests shape the spaces we inhabit Among the landscapes she examines are steeltowns in West Virginia and Michigan affluent corporate suburbs in Westchester County gentrified areas of lower Manhattan and theme parks in Florida and California In each of these case studies new strategies of investment and employment are filtered through existing institutions experience in both production and consumption and represented in material products aesthetic forms and new perceptions of space and time The current transformation differs from those of the past in that individuals and

institutions now have far greater power to alter the course of change making the creative destruction of landscape the most important cultural product of our time Zukin's eclectic inquiry into the parameters of social action and the emergence of new cultural forms defines the interdisciplinary frontier where sociology geography economics and urban and cultural studies meet

Emerging Global Cities Alejandro Portes, Ariel C. Armony, 2022-12-27 Certain cities most famously New York London and Tokyo have been identified as global cities whose function in the world economy transcends national borders Without the same fanfare formerly peripheral and secondary cities have been growing in importance emerging as global cities in their own right The striking similarity of the skylines of Dubai Miami and Singapore is no coincidence despite following different historical paths all three have achieved newfound prominence through parallel trends In this groundbreaking book Alejandro Portes and Ariel C Armony demonstrate how the rapid and unexpected rise of these three cities recasts global urban studies They identify the constellation of factors that allow certain urban places to become emerging global cities centers of commerce finance art and culture for entire regions The book traces the transformations of Dubai Miami and Singapore identifying key features common to these emerging global cities It contrasts them with global hopeful cities that at one point or another aspired to become global and analyzes how Hong Kong is threatened with the loss of this status Portes and Armony highlight the importance of climate change to the prospects of emerging global cities showing how the same economic system that propelled their rise now imperils their future Emerging Global Cities provides a powerful new framework for understanding the role of peripheral cities in the world economy and how they compete for and sometimes achieve global standing

The Racial Politics of Division Monika Gosin, 2019-06-15 The Racial Politics of Division deconstructs antagonistic discourses that circulated in local Miami media between African Americans white Cubans and black Cubans during the 1980 Mariel Boatlift and the 1994 Balsero Crisis Monika Gosin challenges exclusionary arguments pitting these groups against one another and depicts instead the nuanced ways in which identities have been constructed negotiated rejected and reclaimed in the context of Miami's historical multiethnic tensions Focusing on ideas of legitimacy Gosin argues that dominant race making ideologies of the white establishment regarding worthy citizenship and national belonging shape inter minority conflict as groups negotiate their precarious positioning within the nation Rejecting oversimplified and divisive racial politics The Racial Politics of

Division portrays the lived experiences of African Americans white Cubans and Afro Cubans as disrupters in the binary frames of worth citizenship narratives Foregrounding the oft neglected voices of Afro Cubans Gosin posits new narratives regarding racial positioning and notions of solidarity in Miami By looking back to interethnic conflict that foreshadowed current demographic and social trends she provides us with lessons for current debates surrounding immigration interethnic relations and national belonging Gosin also shows us that despite these new demographic realities white racial power continues to reproduce itself by requiring complicity of racialized groups in exchange for a tenuous claim on US citizenship

and build new schools political organizations and community centers to reshape the cities ethnic landscapes Drawing upon rich and extensive research historian Deborah Dash Moore traces the evolution of a new consensus on the boundaries of Jewish life and what it means to be Jewish Most American Jews have families or friends who have chosen to live in these urban paradises Many others have visited or vacationed under their palm trees Now the vibrant Jewish culture of these cities comes to life through Moore s skillful weaving of individual voices dreams and accomplishments To the Golden Cities is an epic saga of an essential moment in American Jewish history the shaping of a new postwar Judaism for the second half of the twentieth century

organizations trying to bring relief in an ever more violent and dangerous world are often betrayed and misused and have increasingly lost sight of their purpose Humanitarian relief workers writes David Rieff are the last of the just And in the Bosnias the Rwandas and the Afghanistans of this world humanitarianism remains the vocation of helping people when they most desperately need help when they have lost or stand at risk of losing everything they have including their lives Although humanitarianism s accomplishments have been tremendous including saving countless lives the lesson of the past ten years of civil wars and ethnic cleansing is that it can do only so much to alleviate suffering Aid workers have discovered that while trying to do good their efforts may also cause harm Drawing on firsthand reporting from hot war zones around the world Bosnia Rwanda Congo Kosovo Sudan and most recently Afghanistan Rieff describes how the International Committee of the Red Cross Doctors Without Borders the International Rescue Committee CARE Oxfam and other humanitarian organizations have moved from their founding principle of political neutrality which gave them access to victims of wars to encouraging the international community to take action to stop civil wars and ethnic cleansing This advocacy has come at a high price By calling for intervention whether by the United Nations or by coalitions of the willing humanitarian organizations risk being seen as taking sides in a conflict and thus jeopardizing their access to victims And by overreaching the humanitarian movement has allowed itself to be hijacked by the major powers at times becoming a fig leaf for actions those powers wish to take for their own interests or for the major powers inaction Rieff concludes that if humanitarian organizations are to do what they do best alleviate suffering they must reclaim their independence Except for relief workers themselves no one has looked at humanitarian action as seriously or as unflinchingly or has had such unparalleled access to its inner workings as Rieff who has traveled and lived with aid workers over many years and four continents A cogent hard hitting report from the front lines A Bed for the Night shows what international aid organizations must do if they are to continue to care for the victims of humanitarian disasters An Air War with Cuba Daniel C. Walsh,2011-11-16 Since 1985 Radio Marti a Radio Free Europe type station has broadcast American news and propaganda in Cuba Its sister station TV Marti debuted in 1990 Respected operations at the start Radio and TV Marti fell under the influence of the Cuban American National Foundation a group of hard line Cuban exiles who intensified the anti Castro rhetoric the stations sent to the island and promoted its leaders as the heirs to a post Castro Cuba Though the initial goal of the two stations was to increase pro American sentiment among the island nation s citizens the stations have succeeded only in driving the two nations further apart This history of American propaganda broadcasting in Cuba describes how Castro used radio to obtain power explores the impact of Radio and TV Marti on U S Cuba relations including the phenomenon of Cuban rafters and chronicles the domestic political struggles to keep the stations on the air **Land of Sunshine, State of Dreams** Gary R Mormino,2008-09-01 Florida is a story of astonishing growth a state swelling from 500 000 residents at the outset of the 20th century to some 16 million at the end As recently as mid century on the eve of Pearl Harbor Florida was the smallest state in the South At the dawn of the

millennium it is the fourth largest in the country a megastate that was among those introducing new words into the American vernacular space coast climate control growth management retirement community theme park edge cities shopping mall boomburbs beach renourishment Interstate and Internet Land of Sunshine State of Dreams attempts to understand the firestorm of change that erupted into modern Florida by examining the great social cultural and economic forces driving its transformation Gary Mormino ranges far and wide across the landscape and boundaries of a place that is at once America's southernmost state and the northernmost outpost of the Caribbean From the capital Tallahassee a day's walk from the Georgia border to Miami a city distant but tantalizingly close to Cuba and Haiti Mormino traces the themes of Florida's transformation the echoes of old Dixie and a vanishing Florida land booms and tourist empires revolutions in agriculture technology and demographics the seductions of the beach and the dynamics of a graying population and the enduring but changing meanings of a dreamstate Beneath the iconography of popular culture is revealed a complex and complicated social framework that reflects a dizzying passage from New Spain to Old South New South to Sunbelt

The Power of Urban Ethnic Places Jan Lin, 2010-10-18 The Power of Ethnic Places discusses the growing visibility of ethnic heritage places in U.S. society The book examines a spectrum of case studies of Chinese Latino and African American communities in the U.S. disagreeing with any perceptions that the rise of ethnic enclaves and heritage places are harbingers of separatism or balkanization Instead the text argues that by better understanding the power and dynamics of ethnic enclaves and heritage places in our society we as a society will be better prepared to harness the economic and cultural changes related to globalization rather than be hurt or divided by these same forces of economic and cultural restructuring

The Economics of Everglades Restoration Richard Weisskoff, 2005-01-01 The book provides valuable contributions on three related fronts It places past and current debates on ecosystem restoration of the Everglades in a clear systems context that acknowledges feedback between ecosystem quality and economic growth shows for the case of the Everglades that good intentions of providing generous financial support for restoration may lead to undesired effects that actually run counter to the original goal and demonstrates the use of regional modeling tools to develop consistent baseline forecasts and alternative scenarios

Matthias Ruth University of Maryland College Park US The restoration of the Florida Everglades the largest ecosystem restoration project in the world is now underway Missing from the original plan however is a study of the region's cities and farms and the economic impact their growth will make on this already endangered ecosystem This book provides that analysis
